

oil industry founder biography

oil industry founder biography is a topic that unlocks the fascinating story behind the origins of one of the world's most influential industries. This article provides an in-depth look at the lives of key oil industry pioneers, their groundbreaking achievements, and the lasting impact they've had on global economics, technology, and society. Readers will discover the backgrounds, early challenges, visionary strategies, and monumental successes of oil industry founders such as John D. Rockefeller, Marcus Samuel, and Henri Deterding. We'll also explore the historical context, the birth of major oil companies, and the technological innovations that shaped the modern energy landscape. Whether you're a business enthusiast, a history buff, or simply curious about the titans who changed the world through oil, this comprehensive biography offers valuable insights and inspiration. Continue reading to gain a deeper understanding of the men behind the oil revolution, their legacies, and the lessons their journeys offer today.

- Origins of the Oil Industry: Historical Context
- Early Life and Backgrounds of Oil Industry Founders
- Breakthrough Moments and Founding of Oil Empires
- Major Contributions and Innovations
- Challenges, Rivalries, and Industry Expansion
- Legacies and Long-Term Impact on the World

Origins of the Oil Industry: Historical Context

The oil industry's origins date back to the mid-19th century, a period marked by rapid industrialization and a growing demand for reliable energy sources. Before the discovery of commercial oil reserves, societies relied heavily on whale oil, wood, coal, and other traditional fuels. The shift to petroleum revolutionized energy consumption, transportation, and manufacturing worldwide. In 1859, Edwin Drake drilled the first successful oil well in Titusville, Pennsylvania, marking the birth of the modern oil industry. This pivotal event set the stage for ambitious entrepreneurs to explore, extract, and refine oil on a massive scale. The historical context in which oil industry founders operated was defined by technological innovation, economic opportunity, and fierce competition, laying the foundation for global energy markets.

Early Life and Backgrounds of Oil Industry Founders

The individuals who shaped the oil industry came from diverse backgrounds, often rising from modest beginnings to achieve remarkable success. Their early lives were characterized by perseverance,

curiosity, and a keen sense of opportunity. Understanding their backgrounds provides insight into the qualities that enabled them to revolutionize an entire sector.

John D. Rockefeller: Humble Beginnings

John D. Rockefeller, the most iconic oil industry founder, was born in 1839 in Richford, New York. Raised in a modest household, Rockefeller took on various jobs from a young age to support his family. His discipline, attention to detail, and financial acumen became apparent early on, setting the stage for his future as a business magnate.

Marcus Samuel: Trading Roots

Marcus Samuel, founder of what would become Royal Dutch Shell, was born in London in 1853. Coming from a family of importers and traders, Samuel's upbringing exposed him to international commerce and logistics. His entrepreneurial spirit and global outlook helped him recognize the potential of the oil trade beyond national borders.

Henri Deterding: International Visionary

Henri Deterding, a key figure in the creation of Royal Dutch Petroleum, was born in Amsterdam in 1866. With a background in banking and a keen interest in business, Deterding leveraged his expertise to steer the growth of a major oil company. His strategic vision played a pivotal role in shaping the global oil market.

- Many oil industry founders began with limited financial resources.
- Early exposure to commerce and industry was a common trait.
- Resilience and adaptability distinguished successful pioneers.

Breakthrough Moments and Founding of Oil Empires

The establishment of oil empires was marked by bold decisions, innovative thinking, and significant risk-taking. Each founder experienced breakthrough moments that propelled their ventures to the forefront of the industry.

Standard Oil and Rockefeller's Dominance

John D. Rockefeller co-founded Standard Oil in 1870. Through aggressive business tactics, strategic acquisitions, and relentless efficiency, Standard Oil rapidly grew to dominate American oil refining. Rockefeller's use of horizontal and vertical integration set new standards for business organization, making Standard Oil a model of industrial success.

Shell Transport and Trading Company

Marcus Samuel's breakthrough came with the founding of the Shell Transport and Trading Company in 1897. His innovative idea to ship petroleum in bulk using tankers opened new markets and reduced transportation costs. Samuel's vision enabled Shell to compete globally, eventually leading to a merger with Royal Dutch Petroleum.

Royal Dutch Petroleum's Rapid Expansion

Henri Deterding's leadership of Royal Dutch Petroleum in the early 20th century was transformative. Deterding focused on international expansion and technological advancement, securing oil concessions in Indonesia and other regions. The eventual merger with Shell created one of the world's largest oil conglomerates.

1. Founders identified and capitalized on emerging global markets.
2. They invested in infrastructure, such as pipelines and tankers, to scale operations.
3. Strategic mergers and acquisitions fueled rapid growth.

Major Contributions and Innovations

The oil industry's founders introduced numerous innovations that revolutionized energy production, transportation, and commerce. Their contributions extended beyond business strategy to include technological and logistical advancements.

Refining and Distribution Breakthroughs

Standard Oil pioneered efficient refining methods, producing cleaner and more versatile petroleum products. Rockefeller's company also established nationwide distribution networks, ensuring consistent supply and quality. These innovations set new benchmarks for industrial efficiency.

Global Shipping and Storage Solutions

Marcus Samuel's introduction of bulk oil shipping using specially designed tankers transformed international oil trade. This innovation reduced costs and minimized environmental risks, making oil more accessible worldwide. Storage facilities and logistical networks further supported global expansion.

Integrated Business Models

The founders adopted integrated business models, controlling every stage from exploration to sales. This approach allowed for greater efficiency, cost control, and market influence. Their strategies continue to influence the structure of modern energy companies.

- Development of large-scale refineries and transport systems.
- Implementation of business practices that promoted industry consolidation.
- Pioneering vertical and horizontal integration in business operations.

Challenges, Rivalries, and Industry Expansion

The rapid growth of the oil industry was accompanied by intense challenges and fierce rivalries among its founders. Competition for resources, markets, and political influence shaped the evolution of the industry and defined the legacies of its key players.

Regulatory and Legal Obstacles

Standard Oil faced significant legal challenges, culminating in its dissolution by the U.S. Supreme Court in 1911 under antitrust laws. This landmark case set a precedent for government intervention in large monopolies and reshaped the business landscape.

International Competition

The rivalry between Royal Dutch Shell and Standard Oil spurred innovation and global market expansion. Competing for oil concessions, shipping routes, and market share pushed companies to develop new technologies and enter new regions.

Technological and Geopolitical Risks

Operating in volatile environments presented significant risks, including technological failures, political instability, and fluctuating oil prices. The founders' ability to navigate these challenges contributed to their enduring success.

- Competition drove technological and logistical advancements.
- Government regulation reshaped industry practices.
- Global expansion required adaptation to diverse political and economic conditions.

Legacies and Long-Term Impact on the World

The legacies of oil industry founders are visible in today's global economy, energy infrastructure, and corporate practices. Their visionary leadership and relentless pursuit of innovation altered the course of history, fueling industrial growth and shaping modern society.

Economic and Social Transformation

The oil industry provided the energy necessary for rapid industrialization, urbanization, and technological progress. It created millions of jobs, stimulated economic growth, and influenced geopolitical relations worldwide.

Philanthropy and Cultural Influence

Founders like Rockefeller became prominent philanthropists, establishing educational, medical, and cultural institutions that continue to benefit society. Their influence extended beyond business, leaving a lasting mark on global development.

Ongoing Industry Evolution

The principles, strategies, and innovations introduced by early oil industry founders continue to guide the sector. As the world transitions toward new energy sources, their legacies offer valuable lessons in leadership, adaptation, and technological advancement.

- Their companies serve as models for modern multinationals.

- Philanthropic endeavors have had global social impact.
- Technological and business innovations remain relevant today.

Q: Who is considered the most influential founder in the oil industry?

A: John D. Rockefeller is widely regarded as the most influential founder in the oil industry due to his role in establishing Standard Oil and revolutionizing the business model for oil companies.

Q: What were the main challenges faced by early oil industry founders?

A: Early founders faced challenges such as limited technology, intense competition, legal and regulatory hurdles, and the need for massive infrastructure investment.

Q: How did Marcus Samuel contribute to the oil industry's global expansion?

A: Marcus Samuel pioneered the use of oil tankers for bulk transportation, making it possible to ship petroleum worldwide and expanding the international oil market.

Q: What was the significance of the Standard Oil breakup?

A: The breakup of Standard Oil in 1911 set a legal precedent for antitrust regulation, leading to the creation of several major oil companies and influencing business practices across industries.

Q: How did oil industry founders influence modern business strategies?

A: Oil industry founders introduced concepts like vertical and horizontal integration, which are now standard practices in many industries, promoting efficiency and market control.

Q: What role did philanthropy play in the legacies of oil industry founders?

A: Many oil industry founders, particularly John D. Rockefeller, became major philanthropists, funding educational, medical, and cultural institutions that have had a lasting societal impact.

Q: What innovations did oil industry founders introduce?

A: They pioneered large-scale refining, integrated business models, global shipping networks, and advanced storage solutions, all of which shaped the modern energy sector.

Q: How did geopolitical factors affect the growth of the oil industry?

A: Geopolitical factors such as access to oil-rich regions, international competition, and political instability played significant roles in shaping the strategies and expansion of oil companies.

Q: Are the business models of early oil founders still relevant today?

A: Yes, the integrated and strategic business models developed by early oil founders continue to influence the structure and operations of today's multinational energy companies.

Q: What lessons can be learned from the biographies of oil industry founders?

A: Their biographies offer lessons in perseverance, innovation, risk management, and the importance of adapting to changing economic and technological landscapes.

oil industry founder biography: *Dictionary of World Biography* Barry Jones, 2022-11-30 Jones, Barry Owen (1932-). Australian politician, writer and lawyer, born in Geelong. Educated at Melbourne High School and Melbourne University, he was a public servant, high school teacher, television and radio performer, university lecturer and lawyer before serving as a Labor MP in the Victorian Parliament 1972-77 and the Australian House of Representatives 1977-98. He took a leading role in reviving the Australian film industry and abolishing the death penalty in Australia, and was the first politician to raise public awareness of global warming, the 'post-industrial' society, the IT revolution, biotechnology, the rise of 'the Third Age' and the need to preserve Antarctica as a wilderness. In the *Hawke Government, he was Minister for Science 1983-90, Prices and Consumer Affairs 1987, Small Business 1987-90 and Customs 1988-90. He became a member of the Executive Board of UNESCO, Paris 1991-95 and National President of the Australian Labor Party 1992-2000, 2005-06. He was Deputy Chairman of the Constitutional Convention 1998. His books include *Decades of Decision 1860- (1965)*, *Joseph II (1968)* and *Age of Apocalypse (1975)*, and he edited *The*

Penalty Is Death (1968, revised and expanded 2022). *Sleepers, Wake! Technology and the Future of Work* was published by Oxford University Press in 1982, became a bestseller and has been translated into Chinese, Japanese, Korean, Swedish and braille. The fourth edition was published in 1995. *Knowledge Courage Leadership: Insights & Reflections*, a collection of speeches and essays, appeared in 2016. He received a DSc in 1988 for his services to science and a DLitt in 1993 for his work on information theory. Elected FTSE (1992), FAHA (1993), FAA (1996) and FASSA (2003), he is the only person to have become a Fellow of four of Australia's five learned Academies. Awarded an AO in 1993, named as one of Australia's 100 'living national treasures' in 1997, he was elected a Visiting Fellow Commoner of Trinity College, Cambridge in 1999. His autobiography, *A Thinking Reed*, was published in 2006 and *The Shock of Recognition*, about music and literature, in 2016. In 2014 he received an AC for services 'as a leading intellectual in Australian public life'. *What Is to Be Done* was published by Scribe in 2020.

oil industry founder biography: *International Bibliography of Business History* Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional 'company-centred' approach and more concern about the wider business context. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial and social history through techniques and outlook. The *International Bibliography of Business History* brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

oil industry founder biography: *A Business History of Soy* Midori Hiraga, 2024-11-11 This is a business history of soy that reveals how Japanese imperial and military institutions and financial-mercantile-industrial interests created a role for soy as a versatile raw material and global commodity beginning in the 19th century, even before the Western world recognized this "oilseed." Originating in the rich food cultures of Asia, soy is praised as the "magic bean." About 360 million tons are produced in the world today, and it is traded globally to become food, feed, and fuel. It is the second largest source of vegetable oil in the world, and soy meal is an essential feed without which the modern livestock industries could not exist. Its dominance today is often accounted for in terms of its versatile nature. This book, however, argues that soy was transformed into a versatile industrial raw material and global commodity through the political-economic strategies of state and business actors engaged in the development of the capitalist world-economy. By studying little-known Japanese historical documents and corporate records, and focusing on the less-researched vegetable oil and industrial uses of soy, this book provides a better understanding of how this traditional Asian food was transformed into a global commodity embedded in contradictions. Promoted as a healthy and sustainable food source, soy is also a destructive cash crop whose cultivation and use have played a significant role in the current climate crisis. Based on this case of soy, the book provides a structural understanding of broader food and agriculture systems in the history of capitalism, making it of interest to students at an advanced level, academics, and researchers in the fields of business history, corporate governance, Japanese business, as well as the political economy of food and agriculture. Chapters 2, 3, and the Conclusion of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC BY-NC-ND) 4.0 license.

oil industry founder biography: *History of the European Oil and Gas Industry* J. Craig, F. Gerali, F. MacAulauy, R. Sorkhabi, 2018 The history of the European oil and gas industry reflects local as well as global political events, economic constraints and the personal endeavours of individual petroleum geoscientists as much as it does the development of technologies and the underlying geology of the region. The first commercial oil wells in Europe were drilled in Poland in

1853, Romania in 1857, Germany in 1859 and Italy in 1860. The 23 papers in this volume focus on the history and heritage of the oil and gas industry in the key European oil-producing countries from the earliest onshore drilling to its development into the modern industry that we know today. The contributors chronicle the main events and some of the major players that shaped the industry in Europe. The volume also marks several important anniversaries, including 150 years of oil exploration in Poland and Romania, the centenary of the drilling of the first oil well in the UK and 50 years of oil production from onshore Spain.

oil industry founder biography: Oil Industry Value Chain Simulator: 1st Edition Silvestre Cassa Iombo, 2022-06-27 Silvestre Cassa Iombo is a currently CEO of OIL FIELD Calculator. He has worked on deepwater oilfield projects: Girassol and Jasmim Phase 2, Dália, Rosa, Clov, Gimboa, and Kizomba Satellites; in shallow water oilfield projects: Morsa West. He worked on the 17 operations team and SONANGOL. He had the idea to develop the Oil Industry Value Chain Simulator when the author was studying at Louisiana State College in the late 90's. When he was taking the Reservoir Simulator course. He saw that there was a need to make a Simulator that integrates the reservoir to the Fuel pump. When the author was admitted to SONANGOL, he became interested in understanding the basic technical concepts, and commercial activities established in the Petroleum Field Development Act after participating in several Petroleum projects. The PTY project, Value Chain Simulator, started to be executed in 2004 when the author was working as a process engineer at Project Rosa. In 2004, first sketch of the value chain simulator was done by the Project team. During this phase of the project, the sketch of the Submarine Simulator was done. In 2007, the sketch of the production installation simulator in Italy was made when the author was participating in the Value Chain Management and Technique Course. In 2008, after the conclusion of the Value Chain Management and Technique course, the separation of the Submarine Simulator and installation was carried out by the Author. During his 2009-2010 Mission period in Houston, Texas, the author started to integrate the deep water project simulator, and the oil marketing simulator, Refinery, Logistics, Distribution, and fuel pump. In 2011, it started to integrate the onshore, deep water and Gas Chain Simulators. In the same year the Value Chain Simulator was successfully completed and tested. It began to be sold on the Angolan market by the company named SILVESTRE'S ENTREPRISE INCOORPERATED. Apart of this Silvestre Cassa Iombo gas developed one of the first calculator to project petroleum infrastructure and estimate its cost, OFC2000.

oil industry founder biography: [Must Read Personalities] A life Story of John D Rockefeller InRead Team, 2022-06-05 Description: This Book provides a quick glimpse about the life of John D Rockefeller

oil industry founder biography: *Oil Empire* Alison Fleig FRANK, 2009-06-30 At the beginning of the twentieth century, the Austrian Empire ranked third among the world's oil-producing states (surpassed only by the United States and Russia), and accounted for five percent of global oil production. By 1918, the Central Powers did not have enough oil to maintain a modern military. How and why did the promise of oil fail Galicia (the province producing the oil) and the Empire? In a brilliantly conceived work, Alison Frank traces the interaction of technology, nationalist rhetoric, social tensions, provincial politics, and entrepreneurial vision in shaping the Galician oil industry. She portrays this often overlooked oil boom's transformation of the environment, and its reorientation of religious and social divisions that had defined a previously agrarian population, as surprising alliances among traditional foes sprang up among workers and entrepreneurs, at the workplace, and in the pubs and brothels of new oiltowns. Frank sets this complex story in a context of international finance, technological exchange, and Habsburg history as a sobering counterpoint to traditional modernization narratives. As the oil ran out, the economy, the population, and the environment returned largely to their former state, reminding us that there is nothing ineluctable about the consequences of industrial development.

oil industry founder biography: *Oil Industry Background Information Bulletin* American Petroleum Institute. Oil Industry Information Committee, 1953

oil industry founder biography: Biography of Dr. Percy Lavon Julian (1899-2022): Greatest

African-American Chemist of the 20th Century William Shurtleff; Akiko Aoyagi, 2022-08-21 For the best story (enactment) of the life of Dr. Percy Lavon Julian, the greatest African-American chemist of the 20th century, google PBS NOVA Forgotten Genius YouTube. The present book is a good bibliography and sourcebook, with 48 photographs and illustrations, many in color.

oil industry founder biography: This Day in American History, 4th ed. Ernie Gross, Roland H. Worth, Jr., 2018-01-16 This up-to-date fourth edition of the most important and interesting data--on a day by day basis--throughout American history includes more than 1,400 new entries with information on a wide variety of subjects--both the important matters (Supreme Court decisions, war events, scientific breakthroughs, etc.) and the lesser known but thought provoking incidents and phenomena (societal changes, unexpected events) that add richness and depth to American history.

oil industry founder biography: *The Encyclopedia of Jewish Life Before and During the Holocaust: Seredina-Buda-Z* Shmuel Spector, Geoffrey Wigoder, 2001 This three-volume encyclopedia, abridged from a 30-volume set in Hebrew and with a foreword by Elie Wiesel, chronicles Jewish life before and during the Holocaust. Arranged alphabetically by town, thousands of entries explore centuries of Jewish life. Some entries, particularly for large cities, provide information on Jewish residents as early as the Middle Ages and discuss the fate of Jews during the Black Death persecutions (1348-1349) and various pogroms from the 17th to 20th centuries. Each entry provides information on the town's Jewish inhabitants on the eve of German occupation, gives the dates of Jewish roundups and mass executions and estimates how many Jews from that community survived the war. Includes more than 600 black-and-white photographs.

oil industry founder biography: The Kingdom Life Approach Willie Thomas Butler, 2011-10 This book is about the stark contrast between the Kingdom of God and the economic, political and social systems we live by every day. The world's systems have led us down a primrose path to nowhere, encouraging the pursuit of wealth and the so-called good life while ignoring the need for a morally-based and purpose-driven approach to living. The Kingdom Life Approach provides viable and alternative strategies to how we conduct our lives to achieve true, meaningful prosperity. It establishes a purpose for living that is predicated on individual assignments and an emerging church that true believers in Christ are building. Christians must change and become emissaries and a perfected church in order for Christ's Kingdom to be seen in the earth. How we live and what we pursue in life are transformational values we must demonstrate to the world. Choosing to manage our financial affairs the Kingdom way is central to this process. Willie Thomas Butler is founder and President of Kingdom Seed Foundation and its educational division, The Life Planning Institute. With over twenty years in the financial services profession, Butler has served as a Certified Financial Planner(TM)(1986-2001), Registered Investment Adviser and Financial Consultant with Salomon Smith Barney and Merrill Lynch. He also served in several Christian organizations as a board member, adviser, development officer and fundraiser. Butler authored his first book True Prosperity in 1997 and established LPI to provide an educational curriculum combined with practical training in Biblical Stewardship and money management. LPI offers courses and workshops promoting a Kingdom approach to life planning for those wanting to serve God using every resource entrusted to them. Butler is a graduate of Regent University with a master of arts in public policy and holds a bachelors of science in business management from Adelphi University. He is also a graduate of the Institute for Financial Planning in New York.

oil industry founder biography: History of Soybeans and Soyfoods in North Carolina (1856-2017) William Shurtleff; Akiko Aoyagi, 2017-06 The world's most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographical index. 157 photographs and illustrations. Free of charge in digital PDF format on Google Books.

oil industry founder biography: History of Soynuts, Soynut Butter, Japanese-Style Roasted Soybeans (Irimame) and Setsubun (with Mamemaki) (1068-2012) William Shurtleff, Akiko Aoyagi, 2012-12

oil industry founder biography: History of Romanian Technology and Industry Dorel Banabic, 2023-12-18 This volume showcases the valuable achievements of the Romanian technology and

industry worldwide. It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania. The main Romanian contributions to the world's technological heritage are missing, except for a few names in the field of aviation, from the great encyclopedias and dictionaries published worldwide. This is due, among other reasons, to the insufficient promotion in widely spoken languages of the history of Romanian technology. The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches. The present volume includes the following industries: mining, metallurgy, oil, natural gas, machine building, agricultural machinery, military, textiles, and construction. Folk technology, the formation of the industrial system, and mechanics are tackled in separate chapters. For each field, are engaged the collaboration of authors who have already published a history of their field. Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field, but also with the 'philosophy' behind its development.

oil industry founder biography: History of Tempeh and Tempeh Products (1815-2020)

William Shurtleff; Akiko Aoyagi, 2020-03-22 The world's most comprehensive, well documented and well illustrated book on this subject. With extensive subject and geographical index. 234 photographs and illustrations - mostly color. Free of charge in digital PDF format on Google Books

oil industry founder biography: Management History Morgen Witzel, 2010-01-21

Management History is not simply a book about the history of business or even the history of management. The goal of this book is to demonstrate that despite the relative newness of management science as an academic subject, management has been around since ancient times. Through understanding the history of management - both in practice and theory - one is able to approach the complex and challenging problems of modern management from a new perspective. The book not only traces the development of management from history to the present day, but also examines the way this evolution impacts how management is practiced today and how it may develop in the future. It incorporates case studies from around the world cutting across a range of time periods, from the Egyptian royal tomb builders of Deir el-Medina, to H.J. Heinz, Cadbury Brothers and Tata Steel. Management History is ideal for instructors wishing to incorporate historical content and analysis into management education courses, modules, and training programs, particularly at the MBA level and higher.

oil industry founder biography: Energy in American History Jeffrey B. Webb, Christopher R.

Fee, 2024-05-30 Contextualizes and analyzes the key energy transitions in U.S. history and the central importance of energy production and consumption on the American environment and in American culture and politics. Focusing on the major energy transitions in U.S. history, from the pre-industrial era to the present day, this two-volume encyclopedia captures the major advancements, events, technologies, and people synonymous with the production and consumption of energy in the United States. Expert contributors show how, for example, the introduction of electricity and petroleum into ordinary American life facilitated periods of rapid social and political change, as well as profound and ongoing impacts on the environment. These developments have in many ways defined and accelerated the pace of modern life and led to vast improvements in living conditions for millions of people, just as they have also brought new fears of resource exhaustion and fossil-fuel induced climate change. Today, as America begins to move beyond the use of fossil fuels toward a greater reliance on renewables, including wind and solar energy, there is a pressing need to understand energy in America's past in order to better understand its energy future.

oil industry founder biography: History of Soybeans and Soyfoods in Ohio William Shurtleff;

Akiko Aoyagi, 2022-05-13 The world's most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographic index. 114 photographs and illustrations - mostly color. Free of charge in digital PDF format.

oil industry founder biography: History of Soybeans and Soyfoods in Japan, and in Japanese Cookbooks and Restaurants outside Japan (701 CE to 2014) William Shurtleff, Akiko

Aoyagi, 2014-02-19 The world's most comprehensive, well documented, and well illustrated book on this subject, with 445 photographs and illustrations. Plus an extensive index.
