online french 2 textbook: *The French Book Trade in Enlightenment Europe II* Simon Burrows, 2018-08-09 This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Société Typographique de Neuchâtel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. online french 2 textbook: Textbook English Elen Le Foll, 2024-07-15 This book provides a systematic, empirical account of the language typically presented in English as a Foreign Language (EFL) textbooks, based on a large corpus of EFL textbooks used in secondary schools. A modified version of the Multi-Dimensional Analysis (MDA) framework serves to examine linguistic variation both within textbooks and compared to corpora representing 'real-life' English as used outside the EFL classroom. The results highlight the characteristics of Textbook English that define it as a distinct variety of English. In light of the study's pedagogical implications, this book proposes a range of corpus-based approaches to improve the naturalness of textbook texts. It also contributes to advancing quantitative corpus linguistics methodology: its detailed online supplements aim for methodological transparency and reproducibility in line with the principles of Open Science. This book will be of interest to linguistics and language education students and researchers, as well as EFL teachers, textbook authors and editors, and those involved in curriculum development and teacher training.

online french 2 textbook: *Growing into Politics* Simone Abendschön, 2024-08-22 This book presents up-to-date empirical research on crucial questions of political socialisation. It suggests new approaches and answers to a classic, but still valid question of political socialisation research: 'Who learns what from whom, under what circumstances, and with what effects?' (Greenstein 1965: 13). The volume maintains that political socialisation is no universal or independent phenomenon, but one significantly shaped by the surrounding parameters of the society in which it is embedded. Therefore, deficits in political socialisation research have become especially clear in light of political and societal changes over recent decades. The book contributes to two important discussions in the study of political socialisation: first, the question of the (relative) importance of socialisation agents and contexts, second – inextricably interwoven with the first – the timing of political socialisation. From a European perspective, articles in the volume shed light on old problems and topics of the field, using new methodological approaches or dealing with long-neglected perspectives such as young children's democratic learning or political socialisation. Includes quantitative approaches as well as innovative and explorative case studies.
