mycvshr login: Designing Web Graphics.4 Lynda Weinman, 2003 The most influential web design book ever written, completely updated to cover motion graphics, broadband interactive design, and more. Since it was first published in 1995, designing web graphics has been the seminal resource for web designers to learn the basics and then the nuances of solid design for the web. Lynda Weinman has been updating the book to reflect changes in the technologies affecting web design, but dwg.4 has been largely rewritten from the ground up. Included is coverage of motion graphics made possible by the Flash phenomenon, broadband-enabled graphics issues, usability, and more. Lynda is rewriting the book so that all coverage of specific tools is focused on the essential functionality of these programs (Photoshop, Dreamweaver, Flash, etc.) and not on version-specific attributes of the software, making the book relevant longer for more users.

mycvshr login: Dave Raphaela Edelbauer, 2025-04-23 Nel mondo di Syz ogni cosa è programmata, soprattutto dormire e mangiare; così da poter rientrare il prima possibile al lavoro, nel flusso di dati del Computer. Syz è infatti impiegato in un immenso laboratorio il cui obiettivo è quello di generare la prima intelligenza artificiale completamente indipendente e dotata di consapevolezza: Dave. Fuori da lì, il mondo è un deserto. Uno strato di sabbia ha coperto ogni cosa e chi sta dentro, in fondo, è un sopravvissuto. E attende la nascita di Dave come unico piano di salvezza per la specie umana. Syz prosegue nella sua routine fino al giorno in cui incontra Khatun, la nuova arrivata nel reparto di programmazione, una ragazza persiana che scrive in verticale. Syz ne rimane sconvolto. Vederla gli provoca una indefinibile nostalgia, per qualcosa di perso, ma che forse si può riavere. Perché Khatun pone domande che lui non si era mai fatto: è reale, ciò in cui tutti loro credono? La condizione in cui si trovano è davvero quella che viene loro raccontata? Quando a causa di un allarme nell'edificio scoppia il caos e le persone si riversano nei corridoi, l'ordine imperturbabile del laboratorio salta e i due ragazzi si perdono. Syz deve ora ritrovare Khatun, e proprio dove e quando questo succederà, con uno svelamento quasi insostenibile per Syz, è il viaggio in cui Raphaela Edelbauer ci porta. Un viaggio di straordinaria immaginazione in una realtà che è solo un passo poco più in là della nostra e che ci mostra come la possibilità di raccontare storie sia pari all'imprevedibilità del nostro pensiero. E forse per questo promette di rimanere un territorio libero.
