necklace story download: Literacy in Teacher Preparation and Practice Patrick M. Jenlink, 2022-04-01 Today, the meaning of literacy, what it means to be literate, has shifted dramatically. Literacy involves more than a set of conventions to be learned, either through print or technological formats. Rather, literacy enables people to negotiate meaning. The past decade has witnessed increased attention on multiple literacies and modalities of learning associated with teacher preparation and practice. Research recognizes both the increasing cultural and linguistic diversity in the new globalized society and the new variety of text forms from multiple communicative technologies. There is also the need for new skills to operate successfully in the changing literate and increasingly diversified social environment. Linguists, anthropologists, educators, and social theorists no longer believe that literacy can be defined as a concrete list of skills that people merely manipulate and use. Rather, they argue that becoming literate is about what people do with literacy—the values people place on various acts and their associated ideologies. In other words, literacy is more than linguistic; it is political and social practice that limits or creates possibilities for who people become as literate beings. Such understandings of literacy have informed and continue to inform our work with teachers who take a sociological or critical perspective toward literacy instruction. Importantly, as research indicates, the disciplines pose specialized and unique literacy demands. Disciplinary literacy refers to the idea that we should teach the specialized ways of reading, understanding, and thinking used in each academic discipline, such as science, mathematics, engineering, history, or literature. Each field has its own ways of using text to create and communicate meaning. Accordingly, as children advance through school, literacy instruction should shift from general literacy strategies to the more specific or specialized ones from each discipline. Teacher preparation programs emphasizing different disciplinary literacies acknowledge that old approaches to literacy are no longer sufficient. Literacy in Teacher Preparation and Practice: Enabling Individuals to Negotiate Meaning introduces the reader to a collection of thoughtful, research-based works by authors that represent current thinking about literacy across disciplines and the preparation of teachers to enter classrooms. Each chapter focuses on teaching guided by literacies across disciplines and the preparation of teachers who will enter classrooms to instruct the next generation of students.

necklace story download: *The Grown Woman Where the Colony Lies* Miik YS, 2020-05-28 Wanita Dewasa transfers from Enceladus Colony 17, under an ocean moon of Saturn where she was born, to Asteroid Colony 23 when just sixteen years old. Now a grown woman eleven years later, she and Yappy, the artificial intelligence for the colony, work as a team to keep the place humming smoothly. Except that Wanita may be a mass murderer with Yappy's help; she isn't sure. Meanwhile, Zoro struggles with whether to become a killer as he transitions from male to a female while working on a dying farm on the outskirts of a town that failed to sprawl onto even a second street. Hele, living in a mansion in a big city, enjoys the comfort of her certainty and wealth; as she says, "I couldn't kill them. I'm not a monster." Wait, what? "Sometimes people, sometimes even places, aren't always what they seem," says Yappy to Wanita. The mystery unfolds without a detective to unravel clues. Everything means something, maybe just not what you think. Good guys are bad; bad guys are good. Rather than solving a murder, the murders aid in solving the mystery. No animals were harmed making this story, but there sure are some sick puppies in it.
