oskar schell book online: Autistic-Coded Representation and Autism Stereotypes Martin Brick, 2024-04-01 Autistic-Coded Representation and Autism Stereotypes: Looking for the Spectrum takes a fresh approach to examining autism representation in literature, film, and television by looking particularly at characters who are not directly identified as falling on the Autism Spectrum. As autism becomes an increasingly popular topic to explore in literature and visual media, it is important that representations present people with autism as real humans with complex interior lives. Too often autistic characters fall into broad stereotypes – victims, villains, fools, or heroes – and autism emerges as the defining aspect of their personality. This book looks at autistic-coded characters, both classic and contemporary, to examine the benefits of looking for the spectrum in characters not explicitly labeled. Autistic audiences see a diverse and fully fleshed representation of themselves and neurotypical audiences gain a greater understanding of ASD through exposure to characters who defy stereotypes.

Freyermuth, Hanns Christian Schmidt, 2021-11-18 Gaming no longer only takes place as a ›closed interactive experience‹ in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced – i.e., in which forms and formats and through which channels we talk (and write) about games – as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

oskar schell book online: Light and Death Judith H. Anderson, 2017-01-02 Light figures being; darkness, death. Bridging mathematical science, semantics, rhetoric, grammar, and major poems, Judith H. Anderson seeks to negotiate writings from multiple disciplines in the shared terms of poesis and figuration rather than as cultural opposites. Analogy, a type of metaphor, has always been the connector of the known to the unknown, the sensible to the infinite. Anderson's study moves from the figuration of light and death to the history of analogy and its pertinence to light in physics and metaphysics, from Kepler to Donne, Spenser, and Milton. Topics proliferate: creativity, optics, the relation of literature to science, the methodology of thought and argument, and the processes of narrative, discovery, and interpretation.
