organizational behavior ebook pdf: Working Digital - Shaping Motivation and Behavior by Information System Design Elements Sascha Lichtenberg, 2024-09-18 The dissertation explores how digital labor platforms, particularly crowdworking environments, can be improved by incorporating Persuasive System Design (PSD) elements to address challenges faced by crowdworkers. Crowdworking, characterized by flexibility and autonomy, often lacks the social interactions and acknowledgment typical in traditional work environments, leading to feelings of isolation, demotivation, and decreased work quality. To mitigate these negative effects, the dissertation investigates how gamification and conversational agents (CA) can influence motivation and task performance in digital labor environments. Specifically, it focuses on how these design elements can promote well-being, improve motivation, and enhance task-related behaviors among workers by analyzing their pro-task and pro-user effects. Findings: • Conversational agents create a

sense of social presence, helping to alleviate isolation, but can also induce performance pressure. • Gamification elements like badges and leaderboards can improve task performance but need careful implementation to avoid overperformance. • A well-balanced integration of pro-task and pro-user elements is essential to improve worker satisfaction and retain platform performance. • The Acknowledgment-Matching Framework developed in the dissertation helps understand the effects of match/mismatch of the internal performance perception with the external acknowledgments concerning individuals' behavior and cognition. Conclusion: The dissertation concludes that designing digital work environments with well-integrated PSD elements, such as gamification and CAs, can significantly improve motivation, well-being, and performance among crowdworkers. The work provides insights for scholars and practitioners to design digital labor platforms that promote positive psychological and behavioral outcomes while minimizing negative effects like isolation and demotivation.

organizational behavior ebook pdf: *Analytics and Intuition in the Process of Selecting Talent* Jürgen Deters, 2022-11-07 Human decisions, especially in management and personnel selection, are based on making judgments about people analytically and intuitively. Yet in business and scientific contexts, judgments are expected to be based on a rational analysis rather than intuitions or emotions. Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision-making. Our empirical and theoretical research shows that this is impossible when people are dealing with people. Instead, intuitions and emotions have significant power in the decision-making process. Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions. Therefore, intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer. This book provides an insight into the current state of research on rational-analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics. By integrating scientifically verifiable rational-analytical decision-making procedures with the inner experiential knowledge of people, this book bridges two complementary ways of recognizing and making good decisions. It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational-analytical and intuitive-emotional selection procedures are successfully integrated by practitioners.

organizational behavior ebook pdf: E-Pedagogy for the Digital Age Dr. P. C. Nagasubramani, Adult learners have more options for enrolling in postsecondary education than ever before, and they are able to use their learning style preference in deciding which program best meets their needs. For some of these students, those programs are fully online, and for others, there is minimal use of technology. As technology grows and become more integrated into individual lives, the unique learning styles and preferences of adults need to learn to be incorporated into instructional design. Drawing on a regional sample of US colleges, 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes. Results indicated some agreement with these instructional tools. Mature adult learners, however, were found to have stronger agreement with strategies that included work outside of the formal online class. These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded, and that they might value relational work with other students in different ways than younger adults.
