neil simon plays download: Video Game Policy Steven Conway, Jennifer deWinter, 2015-10-14 This book analyzes the effect of policy on the digital game complex: government, industry, corporations, distributors, players, and the like. Contributors argue that digital games are not created nor consumed outside of the complex power relationships that dictate the full production and distribution cycles, and that we need to consider those relationships in order to effectively read and analyze digital games. Through examining a selection of policies, e.g. the Australian government's refusal (until recently) to allow an R18 rating for digital games, Blizzard's policy in regards to intellectual property, Electronic Arts' corporate policy for downloadable content (DLC), they show how policy, that is to say the rules governing the production, distribution and

consumption of digital games, has a tangible effect upon our understanding of the digital game medium.

neil simon plays download: Rethinking Virtual Places Erik Champion, 2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed, experienced, and critiqued? In *Rethinking Virtual Places*, Erik Malcolm Champion draws from the fields of computational sciences and other place-related disciplines to argue for a more central role for virtual space in the humanities. For instance, recent developments in neuroscience could improve our understanding of how people experience, store, and recollect place-related encounters. Similarly, game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient. In addition, Champion provides a brief introduction to new and emerging software and devices and explains how they help, hinder, or replace our traditional means of designing and exploring places. Perfect for humanities scholars fascinated by the potential of virtual space, *Rethinking Virtual Places* challenges both traditional and

recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place.
