**online reading sites: Integrating Multiple Intelligences and Technology in an Online Course (UTeM Press)** Siti Nurul Mahfuzah Mohamad, 2022-02-09 Every student has his or her thinking skills and understands a lesson in a different way. The change of the current technology will facilitate educators in preparing teaching activities to cater to the needs of the students. The type of the technology used is not as important as compared to the opportunity given to the students to use their intelligence in the classroom. Thus, the student will become more active and receptive to his or her learning. The theory of Multiple Intelligences (MI) is discussed in this book to verify whether MI has any impact on the teaching and learning in the classroom. This book focuses on facilitating educators by providing teaching aids based on MI activities. Thus, the educators can reduce the preparation time for the teaching aids. Indirectly, this can motivate the educators to apply online learning and attract students' attention. In the end, academic achievement for the students can be improved and educators will be motivated to teach in the classroom via online. Each of the student is unique and has different ways of thinking and learning. This also applies to students in technical educations who have different potential and intelligences. Educators also have a variety of teaching styles that are closely related to students' learning styles. Therefore, educators need to provide a variety of teaching approaches that match the intelligence of the students in the class. This book, then, is focusing on teaching tools utilized by all educators. Nowadays, the exposure to the appropriate technology should combine all materials, strategies and adopted current technology. Educators need to provide an effective teaching and quality classroom activities for their students. This will affect the style of learning and students' perception to the tools used by the educators.
