museum360 manual: Designing Museum Experiences Mark Walhimer, 2021-12-19 Designing Museum Experiences is a "how-to" book for creating visitor-centered museums that emotionally and intellectually connect with museum visitors, stakeholders, and donors. Museums are changing from static, monolithic, and encyclopedic institutions to institutions that are visitor-centric, with shared authority that allows museum and visitors to become co-creators in content creation. Museum content is also changing, from static content to dynamic, evolving content that is multi-cultural and transparent regarding the evolution of facts and histories, allowing multi-person interpretations of events. Designing Museum Experiences leads readers through the methods and tools of the three stages of a museum visit (Pre-visit, In-Person Visit, and Post-visit), with a goal of motivating visitors to return and revisit the museum in the future. This museum visitation loop creates meaningful intellectual, emotional, and experiential value for the visitor. Using the business-world-proven methodologies of user centered design, Museum Visitor Experience leads the reader through the process of creating value for the visitor. Providing consistent messaging at all touchpoints (website, social media, museum staff visitor services, museum signage, etc.) creates a trusted bond between visitor and museum. The tools used to increase understanding of and encourage empathy for the museum visitor, and understand visitor motivations include: Empathy Mapping, Personas, Audience segmentation, Visitor Journey Mapping, Service Design Blueprints, System Mapping, Content Mapping, Museum Context Mapping, Stakeholder Mapping, and the Visitor Value Proposition. In the end, the reason for using the tools is to empower visitors and meet their emotional and intellectual needs, with the goal of creating a lifelong bond between museum and visitor. This is especially important as museums face a new post COVID-19 reality; only the most

nimble, visitor-centered museums are likely to survive. The companion website to Designing Museum Experiences features: Links to additional visitor-centered museum informationDownloadable sample documents and templatesBibliography of sources for further readingOnline glossary of museum visitor experience termsDaily checklists of "how-to" provide and receive visitor-centered experiencesMore than 50 associated Designing Museum Experiences documents

museum360 manual: Hengeworld Michael Pitts, 2011-01-18 In November 1997 English Heritage announced the discovery of a vast prehistoric temple in Somerset. The extraordinary wooden rings at Stanton Drew are the most recent and biggest of a series of remarkable discoveries that have transformed the way archaeologists think of the great monuments in the region, including Avebury and Stonehenge; one of the world's most famous prehistoric monuments, top tourist site and top location for summer solstice celebrations. The results of these discoveries have not been published outside academic journals and no one has considered the wider implications of these finds. Here Mike Pitts, who has worked as an archaeologist at Avebury, and has access to the unpublished English Heritage files, asks what sort of people designed and built these extraordinary neolithic structures - the biggest in Britain until the arrival of medieval cathedrals. Using computer reconstructions he shows what they looked like and asks what they are for. This is the story of the discovery of a lost civilisation that spanned five centuries, a civilisation that now lies mostly beneath the fields of Southern England.

museum360 manual: *An Artist's Reminiscences* Walter Crane, 1907 Walter Crane (1845-1915) is best remembered today as the illustrator of whimsical stories for children, but in fact he worked in many styles and genres throughout his life. The son of a painter, he was apprenticed to a wood engraver at the age of thirteen, and his father died shortly afterwards. By the time his apprenticeship was completed, Crane was painting as well as engraving, and joined the circle of the Pre-Raphaelites, being especially influenced by the politics of William Morris and the aesthetics of the Arts and Crafts movement. This highly illustrated 1907 autobiography traces his life from his childhood in Torquay through the difficult period following his father's death to his success as an illustrator and decorative artist, describing work, politics and travel. Crane may have felt that he was not given recognition as a serious painter, but this engaging account of a happy life does not show it.
