**newman university athletics: American Sports and the Great War** Peter C. Stewart, 2021-03-12 Drawing on newspaper accounts, college yearbooks and the recollections of veterans, this book examines the impact of World War I on sports in the U.S. As young men entered the military in large numbers, many colleges initially considered suspending athletics but soon turned to the idea of using sports to build morale and physical readiness. Recruits, mostly in their twenties, ended up playing more baseball and football than they would have in peacetime. Though most college athletes volunteered for military duty, others replaced them so that the reduction of competition was not severe. Pugilism gained participants as several million men learned how to box.

useful resource outlines the standards which highlights the core responsibilities coaches should possess along with supporting competencies that provide insight into the knowledge and skills needed to support a quality amateur sport experience for athletes. Coaches, sport administrators, and coach educators and developers who are informed about core coaching responsibilities and competencies can improve the preparation, training, and evaluation of sport coaching. Ultimately the National Standards for Sport Coaches should assist in improving the sport experiences for all athletes and will elevate the profession of coaching.

**newman university athletics: The Idea of the University** Jaroslav Pelikan, 1992-01-01 The crisis in university education has been the subject of vigorous debate in recent years. In this eloquent and deeply personal book, a distinguished scholar reflects on the character and aims of the university, assessing its guiding principles, its practical functions, and its role in society. Jaroslav Pelikan provides a unique perspective on the university today by reexamining it in light of John Henry Cardinal Newman's 150-year old classic *The Idea of a University* and showing how Cardinal Newman's ideas both illuminate and differ from current problems facing higher education. Pelikan begins by affirming the validity of Newman's first principle: that knowledge must be an end in itself. He goes on to make the case for the inseparability of research and teaching on both intellectual and practical grounds, stressing the virtues--free inquiry, scholarly honesty, civility in discourse, toleration of diverse beliefs and values, and trust in rationality and public verifiability--that must be practiced and taught by the university. He discusses the business of the university--the advancement of knowledge through research, the extension and interpretation of knowledge through undergraduate and graduate teaching, the preservation of knowledge in libraries, museums, and galleries, and the diffusion of knowledge through scholarly publishing. And he argues that by performing these tasks, by developing closer ties with other schools at all levels, and by involving the community in lifelong education, the university will make its greatest contribution to society.

**newman university athletics: Sport and the Neoliberal University** Ryan King-White, 2018-01-25 College students are now regarded as consumers, not students, and nowhere is the growth and exploitation of the university more obvious than in the realm of college sports, where the evidence is in the stadiums built with corporate money, and the crowded sporting events sponsored by large conglomerates. The contributors to *Sport and the Neoliberal University* examine how intercollegiate athletics became a contested terrain of public/private interests. They look at college sports from economic, social, legal, and cultural perspectives to cut through popular mythologies regarding intercollegiate athletics and to advocate for increased clarity about what is going on at a variety of campuses with regard to athletics. Focusing on current issues, including the NCAA, Title IX, recruitment of high school athletes, and the Penn State scandal, among others, *Sport and the Neoliberal University* shows the different ways institutions, individuals, and corporations are interacting with university athletics in ways that are profoundly shaped by neoliberal ideologies.

**newman university athletics: Title IX, Pat Summitt, and Tennessee's Trailblazers** Mary Ellen Pethel, 2022-10-18 To celebrate the fiftieth anniversary of the passage of Title IX legislation, Mary Ellen Pethel has written a who's who of Title IX proponents in Tennessee. The book consists of fifty profiles in biography, interview, and vignette format, introducing Tennessee women instrumental to the passage of the Educational Amendments of 1972 and to the success of women's athletic programs thereafter. Pethel celebrates the lives and careers of household names like Pat Summitt and Candace Parker, as well as equally important forerunners such as Ann Furrow and Teresa Phillips. Introductory and concluding material discusses education and sport prior to Title IX, the legislation itself, the early controversies and implementation of Title IX, and the future of equity in sport and education--

**newman university athletics: The Sporting World of the Modern South** Patrick B. Miller, 2002 Engaging a medley of perspectives and methodologies, *The Sporting World of the Modern South* examines how sports map the social, political, and cultural landscapes of the modern South. In essays on the backcountry fighter stereotypes portrayed in modern professional wrestling and the significance of Crimson Tide coaching legend Paul Bear Bryant for white Alabamians, contributors

explore the symbols that have shaped southern regional identities since the Civil War. Other essays tackle gender and race relations in intercollegiate athletics, uncover the roles athletic competitions played in desegregating the South, and address the popularity of NASCAR in the southern states. Pairing the action and anecdotes of good sports writing with rock-solid scholarship, *The Sporting World of the Modern South* adds historical and anthropological perspectives to legends and lore from the gridiron to the racetrack. This collection, with its innovative attention to the interplay between athletics and regional identity, is an insightful and compelling contribution to southern and sports history.

**newman university athletics: From the Sidelines to the Headlines** Betsy Gerhardt Pasley, 2023-03-07 In spring 2014 Peggy Kokernot Kaplan, a former Trinity University athlete and cofounder of the women's track team, emailed her alma mater's athletic department asking the school to post statistics from the team's 1975 season. It's no surprise that they couldn't fulfill her request, for Trinity had sparse records from the 1970s—not just for track and field but for most performances by female athletes before 1991, when the school joined a NCAA Division III conference. What started as a humble email request nearly a decade ago has culminated in *From the Sidelines to the Headlines: The Legacy of Women's Sports at Trinity University*, an expansive book aimed at filling in the gaps in coverage of half a century of women's intercollegiate sports. Former Trinity athlete Betsy Gerhardt Pasley and historian Doug Brackenridge, along with other members of the Trinity community, have collected hundreds of long-forgotten documents and conducted dozens of interviews with former students, coaches, and administrators to tell the fascinating, multifaceted story of women's sports at this liberal arts school in San Antonio, Texas. While the book focuses primarily on the post-Title IX years between 1972 and 1999, its scope extends to Trinity's founding in 1869, illuminating the century-long evolution of women in competitive sports, at Trinity and elsewhere, before Title IX. The story, told alongside the cultural shifts that formed the social and athletic context for female athletes of the day, also documents the decision Trinity and other institutions of higher learning faced after Title IX: Should they adhere to a commercial model, in which a focus on athletics often overshadowed academics, or strive for a more balanced student-athlete, nonscholarship model? Trinity chose the latter and has decades of national championships and academic accolades to show for it.
