nick cruz online activity: *Rethinking Heritage in Precarious Times* Nick Shepherd, 2023-07-14 Rethinking Heritage in Precarious Times sets a fresh agenda for Heritage Studies by reflecting upon the unprecedented nature of the contemporary moment. In doing so, the volume also calls into question established ideas, ways of working, and understandings of the future. Presenting contributions by leading figures in the field of Heritage Studies, Indigenous scholars, and scholars

from across the global north and global south, the volume engages with the most pressing issues of today: coloniality, the climate emergency, the Covid-19 pandemic, structural racism, growing social and economic inequality, and the ongoing struggle for dignity and restitution. Considering the impact of climate change, chapters re-imagine museums for climate action, explore the notion of a world heritage for the Anthropocene, and reflect on heritage and posthumanism. Drawing inspiration from the global demonstrations against racism, police violence and authoritarianism, chapters explore the notion of a people's heritage, draw on local and Indigenous conceptualizations to lay out a notion of heritage in the service of social justice and restitution, and detail the precariousness of universities and heritage institutions in the global south. Analysing the ongoing impact of the Covid-19 pandemic, chapters also explore the changing nature of life under lockdown, describe its effects on theories of urbanity, and reflect on emergent Covid socialities and heritage-in-the-making. *Rethinking Heritage in Precarious Times* argues that we need the deep-time perspective that Heritage Studies offers, as well as its sense of transgenerational conversations and accountabilities, in order to respond to these many challenges—and to craft open, creative, and inclusive futures. It will be essential reading for academics and students engaged in the study of heritage, anthropology, memory, history, and geography.

nick cruz online activity: [Theology, Disability and Sport](#) Nick J. Watson, Kevin Hargaden, Brian Brock, 2020-01-24 This ground-breaking book provides fascinating insights into the fast-emerging body of research that explores the relationship between sport, theology and disability within a social justice framework. In the shadow of two major sport-faith events that fore-fronted the theology of disability sport, the Vatican's international conference—*Sport at the Service of Humanity* and the Inaugural Global Congress on Sports and Christianity York St John University, UK, at which Dr Brian Brock led a thematic strand on the topic—this book provides a foundation for further research and practice. This text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research: (i) 'disability sport' and (ii) the 'theology of disability'. Examples of subjects addressed in this text include: elite physical disability sport—Paralympics; intellectual disability sport—Special Olympics; equestrian sport; church, sport and disability, and;

theologies of embodiment, competition and mercy. This book, written by leaders in their respective fields, begins a critical conversation on these topics, and many others, for both researchers and practitioners. The chapters originally published in the *Journal of Disability and Religion and Quest*.

nick cruz online activity: Taiwan's Politics In Action: Struggling To Win At The Ballot Box John F Copper, 2020-11-13 Taiwan's Politics in Action: Struggling to Win at the Ballot Box is about the most interesting and exciting aspects of Taiwan's politics: political competition in the form of electioneering, campaigns and voting. The author first analyzes the theories, constructs or simply ideas about elections, especially who wins them and why. The most discussed by the pundits and the scholars are the watermelon and the pendulum theory: voting as before or not. The economic, or pocketbook, theory is also popular — although whether this means economic growth or greater equity has changed. Which party or candidate has the most money is also predictive. Other constructs or simply ideas are also commonplace. Divide and conquer is another approach. Another is the best campaign agenda; so too picking the most attractive candidates. Professionalism in campaigning and the use of social media are also favorite ideas. So is the appeal to voters' ethnicity, espousing liberal or conservative ideas, using protest, focusing on constant concerns such as peace and corruption and finally, the appeals of populism and progressivism. The author then examines Taiwan's two most recent elections, the 2018 mid-term (or collection of local elections) and the 2020 national presidential and legislative election to apply the theories. The Nationalist Party or Kuomintang (KMT) won the former; the Democratic Progressive Party (DPP) won the latter, giving the observer a choice of evidence about how to win. The author concludes that Taiwan's democracy is being challenged, but is still popular in spite of strong external forces and other worries.

nick cruz online activity: Connective Action and the Rise of the Far-Right Steven Livingston, Michael Miller, 2025-05-30 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International license. It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations. In *Connective Action and the Rise of the Far-Right: Platforms, Politics, and the Crisis of Democracy*, the contributors explain democratic backsliding in the 21st century through what it terms a cross-disciplinary engagement between democracy scholars and data scientists. The former describe the necessary social and economic conditions for a healthy democracy, while the latter tell us something about the role of digital platforms in the realization (or not) of these same conditions. In turn, volume editors Steven Livingston and Michael Miller bring these two broad research traditions together to define a new analytical framework for understanding the potential demise of contemporary democracy. The chapters argue that the current threat to democracy comes from the organization of illiberal movements, both on and offline. Put differently, democratic backsliding is the consequence of far-right connective action. In this process, digital surrogate organizations or networks mix with more conventional organizations aligned with conservative parties, themselves facing a uniquely

precarious position in today's democracies. Democracy scholars, or what the editors of this book call institutionalists, emphasize the critical role of economics, elites, and organized interests and look outward into society when searching for an explanation of backsliding. The technocentric model of democratic backsliding looks to digital networks and their effects on individual-level cognitive processes. To date, despite their shared intellectual focus on democracy, there has been little overlap between these two fields of study. The chapters in the book collectively assess the effects of digitized public communication on democracy without losing sight of social and economic power structures.

nick cruz online activity: The Founding Myth Andrew L Seidel, 2019-05-14 Do "In God We Trust," the Declaration of Independence, and other historical "evidence" prove that America was founded on Judeo-Christian principles? Are the Ten Commandments the basis for American law? A constitutional attorney dives into the debate about religion's role in America's founding. In today's contentious political climate, understanding religion's role in American government is more important than ever. Christian nationalists assert that our nation was founded on Judeo-Christian principles, and advocate an agenda based on this popular historical claim. But is this belief true? The Founding Myth answers the question once and for all. Andrew L. Seidel, a constitutional attorney at the Freedom from Religion Foundation, builds his case point by point, comparing the Ten Commandments to the Constitution and contrasting biblical doctrine with America's founding philosophy, showing that the Bible contradicts the Declaration of Independence's central tenets. Thoroughly researched, this persuasively argued and fascinating book proves that America was not built on the Bible and that Christian nationalism is, in fact, un-American.

nick cruz online activity: Importing Faith Glyn J. Ackerley, 2016-07-28 Many twenty-first-century evangelical charismatics in Britain are looking for a faith that works. They want to experience the miraculous in terms of healings and Godsent financial provision. Many have left the mainstream churches to join independent charismatic churches led by those who are perceived to have special insights and to teach principles that will help believers experience the miraculous. But all is not rosy in this promised paradise, and when people are not healed or they remain poor they are often told that it is because they did not have enough faith. This study discovers the origin of the principles that are taught by some charismatic leaders. Glyn Ackerley identifies them as the same ideas that are taught by the positive confession, health, wealth, and prosperity movement, originating in the United States. The origins of the ideas are traced back to New Thought metaphysics and its background philosophies of subjective idealism and pragmatism. These principles were imported into the UK through contact between British leaders and those influenced by American word of faith teachers. Glyn Ackerley explains the persuasiveness of such teachers by examining case studies, suggesting their miracles may well have social and psychological explanations rather than divine origins.
