**nihongo textbook resources: Languages and Identities in a Transitional Japan** Ikuko Nakane, Emi Otsuji, William S. Armour, 2015-08-20 This book explores the transition from the era of internationalization into the era of globalization of Japan by focusing on language and identity as its central themes. By taking an interdisciplinary approach covering education, cultural studies, linguistics and policy-making, the chapters in this book raise certain questions of what constitutes contemporary Japanese culture, Japanese identity and multilingualism and what they mean to local people, including those who do not reside in Japan but are engaged with Japan in some way within the global community. Topics include the role of technology in the spread of Japanese language and culture, hybrid language use in an urban context, the Japanese language as a lingua franca in China, and the identity construction of heritage Japanese language speakers in Australia. The authors do not limit themselves to examining only the Japanese language or the Japanese national/cultural

identity, but also explore multilingual practices and multiple/fluid identities in a transitional Japan. Overall, the book responds to the basic need for better accounts of language and identity of Japan, particularly in the context of increased migration and mobility.

**nihongo textbook resources:** **Negotiating Gendered Language and Social Identities** Maki Yoshida, 2025-03-19 This book explores gendered language and gender identities negotiated by seven tertiary students of Japanese as an additional language (JAL) in Australia. It demonstrates that while participants are familiar with gendered Japanese as linguistic resources, their self-positioned and ascribed 'learnersness', 'nonnative-speakerness' and 'non-Japaneseness' both inside and outside classroom contexts greatly impact the targeted negotiations. It argues that these ascribed social identities encourage participants to adopt 'correct' (gendered) Japanese; however, what exactly this 'correctness' means differs for each JAL participant, depending on their other reflective and perceived social identities—such as gender, age, class, race and English 'native-speakerness'. This book draws on the conclusions on the implications of discourses and practices concerning native-speaker status, gender and race in Japanese language education. While the initial focus is on gendered Japanese and gender identity, this book subsequently expands that the participants' negotiation of gendered Japanese and gender identity is complicatedly intertwined with negotiations of other social identities such as native-speaker status, race and age, with native-speaker status saliently affecting the way they position themselves and are positioned by their interlocutors. This book analyses the participants' language resources, spoken and/ or written Japanese interactions and one-on-one and focus-group interviews and presents easily understood findings for readers who are interested in SLA, Japanese, language and/ or identity studies. This is the first book to holistically examine Australia-based tertiary students' Japanese language learning experience and Japanese interactions with regards to (gendered) language, identities and discursive power relations in a global and multilingual world.

**nihongo textbook resources:** **Japanese Cybercultures** Nanette Gottlieb, Mark McLelland, 2003-08-29 Japan is rightly regarded as one of the most technologically advanced countries in the world, yet the development and deployment of Internet technology in Japan has taken a different trajectory compared with Western nations. This is the first book to look at the specific dynamics of Japanese Internet use. It examines the crucial questions: \* how the Japanese are using the Internet: from the prevalence of access via portable devices, to the fashion culture of mobile phones \* how Japan's cute culture has colonized cyberspace \* the role of the Internet in different musical subcultures \* how different men's and women's groups have embraced technology to highlight

problems of harassment and bullying \* the social, cultural and political impacts of the Internet on Japanese society \* how marginalized groups in Japanese society - gay men, those living with AIDS, members of new religious groups and Japan's hereditary sub-caste, the Burakumin - are challenging the mainstream by using the Internet. Examined from a variety of interdisciplinary perspectives, using a broad range of case-studies, this is an exciting and genuinely cutting-edge book which breaks new ground in Japanese studies and will be of value to anyone interested in Japanese culture, the Internet and cyberculture.
