Chee, 2023-04-24 Digital Game Culture in Korea: The Social at Play is a critical ethnographic investigation of media discourses surrounding online game addiction and the sociocultural roles fulfilled by games in everyday life. Florence M. Chee argues that the casting of online games as singularly problematic or addictive largely ignores the socially generative and, at times, pivotally important means of connection among games, players, and the communities they foster. Through focusing on Korea's sociohistorical and technocultural context, this work celebrates and recognizes the foundational role of Korean game culture in shaping global games and play. Scholars of game studies, communication, and technoculture will find this book of particular interest.

play subway surfers browser: Apps Gerard Goggin, 2021-05-20 Since the rise of the smartphone, apps have become entrenched in billions of users' daily lives. Accessible across phones and tablets, watches and wearables, connected cars, sensors, and cities, they are an inescapable feature of our current culture. In this book, Gerard Goggin provides a comprehensive and authoritative guide to the development of apps as a digital media technology. Covering the technological, social, cultural, and policy dynamics of apps, Goggin ultimately considers what a post-app world might look like. He argues that apps represent a pivotal moment in the development of digital media, acting as a hinge between the visions and realities of the “mobile,” “cyber,” and “online” societies envisaged since the late 1980s and the imaginaries and materialities of the digital societies that emerged from 2010. Apps offer frames, construct tools, and constitute “small worlds” for users to reorient themselves in digital media settings. This fascinating book will reframe the conversation about the software that underwrites our digital worlds. It is essential reading for students and scholars of media and communication, as well as for anyone interested in this ubiquitous technology.

play subway surfers browser: [Here's the Pitch](#) Roberta J. Newman, 2019-03-01 2020 SABR Baseball Research Award In the mid-nineteenth century, two industries arrived on the American scene. One was strictly a business, yet it helped create, define, and disseminate American culture. The other was ostensibly just a game, yet it soon became emblematic of what it meant to be

American, aiding in the creation of a national identity. Today, whenever the AT&T call to the bullpen is heard, fans enter Minute Maid Park, or vote for favorite All-Stars (brought to us by MasterCard), we are reminded that advertising has become inseparable from the MLB experience. Here's the Pitch examines this connection between baseball and advertising, as both constructors and reflectors of culture. Roberta J. Newman considers the simultaneous development of both industries from the birth of the partnership, paying particular attention to the ways in which advertising spread the gospel of baseball at the same time professional baseball helped develop a body of consumers ready for the messages of advertising. Newman considers the role of product endorsements in the creation of the culture of celebrity, and of celebrity baseball players in particular, as well as the ways in which new technologies have impacted the intersection of the two industries. From Ty Cobb to Babe Ruth in the 1920s and 1930s to Mickey Mantle, Yogi Berra, and Willie Mays in the postwar years, to Derek Jeter, Rafael Palmeiro, and David Ortiz in the twenty-first century, Newman looks at many of baseball's celebrated players and shows what qualities made them the perfect pitchers for new products at key moments. Here's the Pitch tells the story of the development of American and an increasingly international culture through the marriage between Mad Men and The Boys of Summer that made for great copy, notable TV advertisements, and lively social media, and shows how baseball's relationship with advertising is stronger than ever.
