**philosophical thinking strategies pdf: The Making of Contemporary Indian Philosophy**

Daniel Raveh, Elise Coquereau-Saouma, 2023-01-31 This book engages in a dialogue with Krishnachandra Bhattacharyya (K.C. Bhattacharyya, KCB, 1875–1949) and opens a vista to contemporary Indian philosophy. KCB is one of the founding fathers of contemporary Indian philosophy, a distinct genre of philosophy that draws both on classical Indian philosophical sources and on Western materials, old and new. His work offers both a new and different reading of classical Indian texts, and a unique commentary of Kant and Hegel. The book (re)introduces KCB's philosophy, identifies the novelty of his thinking, and highlights different dimensions of his oeuvre, with special emphasis on freedom as a concept and striving, extending from the metaphysical to the political or the postcolonial. Our contributors aim to decipher KCB's distinct vocabulary (demand, feeling, alternation). They revisit his discussion of Rasa aesthetics, spotlight the place of the body in his phenomenological inquiry toward "the subject as freedom", situate him between classics (Abhinavagupta) and thinkers inspired by his thought (Daya Krishna), and discuss his lectures on Sāṃkhya and Yoga rather than projecting KCB as usual solely as a Vedānta scholar. Finally, the contributors seek to clarify if and how KCB's philosophical work is relevant to the discourse today, from the problem of other minds to freedoms in the social and political spheres. This book will be of interest to academics studying Indian and comparative philosophy, philosophy of language and mind, phenomenology without borders, and political and postcolonial philosophy.

**philosophical thinking strategies pdf: Philosophy in Schools** Felicity Haynes, 2017-10-02  
In 1972, Matthew Lipman founded the Institute of Advancement for Philosophy for Children (IAPC), producing a series of novels and teaching manuals promoting philosophical inquiry at all levels of schooling. The programme consisted of stories about children discussing traditional topics of ethics, values, logic, reality, perception, and politics, as they related to their own daily experiences. Philosophy for Children has been adapted beyond the IAPC texts, but the process remains one of an open community of inquiry in which teachers promote respect, conceptual clarity, critical judgement, and active listening without imposing their own ideas. Philosophy in Schools describes the successes and difficulties in implementing this community of inquiry model. The book covers topics including the formation of non-didactic courses in ethics, the difficulties of fitting a post-compulsory philosophy course into a standard curriculum framework, and the political assumptions of adopting this model in a low socio-economic school. The contributions also ask deeper questions about how a genuine community of inquiry model is incompatible with conventional models of schooling, with their positioning of the discipline of philosophy in the curriculum. This book was originally published as a special issue of Educational Philosophy and Theory.

With a combination of theoretical expertise and practical experience, philosopher Jason Baehr endorses intellectual virtues as a rich, meaningful way to think about and understand the purpose of education. He makes a persuasive case for prioritizing intellectual virtues in the classroom to facilitate deeper learning, encourage lifelong learning, and enrich teacher practice. Baehr profiles nine key virtues that enable learners to initiate the process of learning, maintain forward momentum, and overcome common obstacles. With engaging anecdotes and concrete examples, he presents a wealth of principles, postures, and practices that educators can employ in promoting essential habits of mind such as curiosity, open-mindedness, and intellectual courage. Baehr illustrates how opportunities to practice these intellectual habits can be integrated into the classroom in ways that align with current teaching practices. In addition, he shows how educators can adapt these practices to accommodate students' identities, developmental abilities, and interests. This thought-provoking book supports all educators, especially middle and high school teachers, in teaching for intellectual virtues. Deep in Thought is a philosophical and yet practical guide to one of the most important aims of education: helping students become skilled thinkers and learners.
