persepolis volume 2 online: A Companion to the Achaemenid Persian Empire, 2 Volume Set Bruno Jacobs, Robert Rollinger, 2021-08-31 A COMPANION TO THE ACHAEMENID PERSIAN EMPIRE A comprehensive review of the political, cultural, social, economic and religious history of the Achaemenid Empire Often called the first world empire, the Achaemenid Empire is rooted in older Near Eastern traditions. A Companion to the Achaemenid Persian Empire offers a perspective in which the history of the empire is embedded in the preceding and subsequent epochs. In this way, the traditions that shaped the Achaemenid Empire become as visible as the powerful impact it had on further historical development. But the work does not only break new ground in this respect, but also in the fact that, in addition to written testimonies of all kinds, it also considers material tradition as an equal factor in historical reconstruction. This comprehensive two-volume set features contributions by internationally-recognized experts that offer balanced coverage of the whole of the empire from Anatolia and Egypt across western Asia to northern India and Central Asia. Comprehensive in scope, the Companion provides readers with a panoramic view of the diversity, richness, and complexity of the Achaemenid Empire, dealing with all the many aspects of history, event history, administration, economy, society, communication, art, science and religion, illustrating the multifaceted nature of the first true empire. A unique historical account presented in its multiregional dimensions, this important resource deals with many aspects of history, administration, economy, society, communication, art, science and religion it deals with topics that have only recently attracted interest such as court life, leisure activities, gender roles, and more examines a variety of available sources to consider those predecessors who influenced Achaemenid structure, ideology, and self-expression contains the study of Nachleben and the history of perception up to the present day offers a spectrum of opinions in disputed fields of research, such as

the interpretation of the imagery of Achaemenid art, or questions of religion includes extensive bibliographies in each chapter for use as starting points for further research devotes special interest to the east of the empire, which is often neglected in comparison to the western territories Part of the acclaimed Blackwell Companions to the Ancient World series, *A Companion to the Achaemenid Persian Empire* is an indispensable work for students, instructors, and scholars of Persian and ancient world history, particularly the First Persian Empire.

persepolis volume 2 online: *The Persian Empire* Mehrdad Kia, 2016-06-27 This well-balanced reference on ancient Persia demonstrates the region's contributions to the growth and development of human civilization from the 7th century BCE through the fall of the Persian Sasanian Empire in 651CE. Knowledge of ancient Persia is often gleaned from the writings of the ancient Greeks and Romans—two civilizations that viewed the Persians as enemies. This one-of-a-kind reference provides unbiased coverage of the cultural history of the Persian Empire, examining the Median, Achaemenid, Parthian, Kushan, and Sasanian dynasties and tracing the development and maturation of Iranian societies during a period of nearly 1,500 years. As one of the most comprehensive studies on the topic, this historical overview explores the region's rich past while providing insight into the cultures and civilizations the Persians came to rule and influence. Using primary sources written and inscribed by the ancient Persians themselves, the encyclopedia studies the pre-Islamic civilizations of Iran in the Middle East, the Caucasus, Central Asia, and the Indian subcontinent. Incorporating contributions from scholars who discuss the rise and fall of various Persian dynasties, the work offers some 180 entries that cover such topics as religion, royal nobility, the caste system, and political assassinations. The content offers perspectives from a variety of disciplines—from anthropology to archaeology, geography, and art history, among other areas.

persepolis volume 2 online: *Persia* Jeffrey Spier, Timothy Potts, Sara E. Cole, 2022-05-17 A fascinating study of Persia's interactions and exchanges of influence with ancient Greece and the Roman Empire. The founding of the first Persian Empire by the Achaemenid king Cyrus the Great in the sixth century BCE established one of the greatest world powers of antiquity. Extending from the borders of Greece to northern India, Persia was seen by the Greeks as a vastly wealthy and powerful rival and often as an existential threat. When the Macedonian king Alexander the Great finally conquered the Achaemenid Empire in 330 BCE, Greek culture spread throughout the Near East, but local dynasties—first the Parthian (247 BCE–224 CE) and then the Sasanian (224–651 CE)—reestablished themselves. The rise of the Roman Empire as a world power quickly brought it, too, into conflict with Persia, despite the common trade that flowed through their territories. Persia addresses the political, intellectual, religious, and artistic relations between Persia, Greece, and Rome from the seventh century BCE to the Arab conquest of 651 CE. Essays by international scholars trace interactions and exchanges of influence. With more than three hundred images, this richly illustrated volume features sculpture, jewelry, silver luxury vessels, coins, gems, and inscriptions that reflect the Persian ideology of empire and its impact throughout Persia's own diverse lands and the Greek and Roman spheres. This volume is published to accompany a major international exhibition presented at the Getty Villa from April 6 to August 8, 2022.

persepolis volume 2 online: *Of Rocks and Water* Ömür Harmanşah, 2014-07-11 People are drawn to places where geology performs its miracles: ice-cold spring waters gushing from the rock, mysterious caves which act as conduits for ancestors and divinities traveling back and forth to the underworld, sacred bodies of water where communities make libations and offer sacrifices. This volume presents a series of archaeological landscapes from the Iranian highlands to the Anatolian Plateau, and from the Mediterranean borderlands to Mesoamerica. Contributors all have a deep interest in the making and the long-term history of unorthodox places of human interaction with the mineral world, specifically the landscapes of rocks and water. Working with rock reliefs, sacred springs and lakes, caves, cairns, ruins and other meaningful places, they draw attention to the need for a rigorous field methodology and theoretical framework for working with such special places. At a time when network models, urban-centered and macro-scale perspectives dominate discussions of

both the Greco-Roman and Persian sources and hence examine the reign of Darius from European and Asian perspectives. In the intensely thorough analysis he conducts here, he finds reasons to mistrust both traditions and thereby qualify the charge of cowardice that has shadowed Darius for more than two millennia . . . His insights are penetrating and his mastery of the evidentiary record is unsurpassed . . . Having deftly taken down much of the edifice supplied by the ancient accounts of Darius, Briant finally turns architect and shows us how the rebuilding might begin.” —James Romm, *The Wall Street Journal* “Briant’s work, as always, is a significant contribution to Achaemenid studies, a display of historiographical learnedness whose methods can benefit historians across ancient studies.” —Jennifer Finn, *Bryn Mawr Classical Review*

persepolis volume 2 online: Architecture Barnabas Calder, 2021-07-01 A groundbreaking history of architecture told through the relationship between buildings and energy The story of architecture is the story of humanity. The buildings we live in, from the humblest pre-historic huts to today's skyscrapers, reveal our priorities and ambitions, our family structures and power structures. And to an extent that hasn't been explored until now, architecture has been shaped in every era by our access to energy, from fire to farming to fossil fuels. In this ground-breaking history of world architecture, Barnabas Calder takes us on a dazzling tour of some of the most astonishing buildings of the past fifteen thousand years, from Uruk, via Ancient Rome and Victorian Liverpool, to China's booming megacities. He reveals how every building - from the Parthenon to the Great Mosque of Damascus to a typical Georgian house - was influenced by the energy available to its architects, and why this matters. Today architecture consumes so much energy that 40% of the world's greenhouse gas emissions come from the construction and running of buildings. If we are to avoid catastrophic climate change then now, more than ever, we need beautiful but also intelligent buildings, and to retrofit - not demolish - those that remain. Both a celebration of human ingenuity and a passionate call for greater sustainability, this is a history of architecture for our times.

persepolis volume 2 online: Reframing the “Desert Frontier” Rebecca Repper, M.C. Bishop, Dr Robert Bewley, 2025-03-01 The eastern frontier of the Roman Empire - its network of roads, trade routes, towns and forts - is often conceived of as an “edge” of both empire and civilisation, but this “borderland” is also part of a rich cultural landscape. Our awareness and appreciation of these cultures has increased dramatically over the course of the last century. Scholarship has deepened, methods have advanced, and perspectives have shifted. Across 20 chapters, *Reframing the “Desert Frontier”* offers new insights into the rich cultural history of this region through the re-examination of existing material - such as archives, historical accounts, and previous surveys - and through the use of novel archaeological approaches. The bringing together of different methodological approaches to the archaeology of the region in a single volume highlights synergies and offers important comparisons for archaeologists to consider. This volume highlights the work of Emeritus Professor David Kennedy, whose contribution to the study of the Roman army, the archaeology of Jordan, and aerial archaeology has inspired and enhanced multiple projects that have reframed this so-called “desert frontier”. *Reframing the “Desert Frontier”* encapsulates the enriched view of this ancient region generated by new techniques of survey and analysis, changed perspectives on older materials, a more intense engagement with the rural landscapes surrounding ancient towns, and the addition of new discoveries that alter previous consensus.

persepolis volume 2 online: Comics through Time M. Keith Booker, 2014-10-28 Focusing especially on American comic books and graphic novels from the 1930s to the present, this massive

four-volume work provides a colorful yet authoritative source on the entire history of the comics medium. Comics and graphic novels have recently become big business, serving as the inspiration for blockbuster Hollywood movies such as the Iron Man series of films and the hit television drama *The Walking Dead*. But comics have been popular throughout the 20th century despite the significant effects of the restrictions of the Comics Code in place from the 1950s through 1970s, which prohibited the depiction of zombies and use of the word horror, among many other rules. *Comics through Time: A History of Icons, Idols, and Ideas* provides students and general readers a one-stop resource for researching topics, genres, works, and artists of comic books, comic strips, and graphic novels. The comprehensive and broad coverage of this set is organized chronologically by volume. Volume 1 covers 1960 and earlier; Volume 2 covers 1960–1980; Volume 3 covers 1980–1995; and Volume 4 covers 1995 to the present. The chronological divisions give readers a sense of the evolution of comics within the larger contexts of American culture and history. The alphabetically arranged entries in each volume address topics such as comics publishing, characters, imprints, genres, themes, titles, artists, writers, and more. While special attention is paid to American comics, the entries also include coverage of British, Japanese, and European comics that have influenced illustrated storytelling of the United States or are of special interest to American readers.

persepolis volume 2 online: *Three Epic Battles that Saved Democracy* Stephen P. Kershaw, 2022-04-07 Praise for the author's *A Brief Guide to the Greek Myths*: 'Eminently sane, highly informative' PAUL CARTLEDGE, BBC History magazine The year 2022 marks 2,500 years since the final defeat of the invasion of Greece by the Persian King Xerxes. This astonishing clash between East and West still has resonances in modern history, and has left us with tales of heroic resistance in the face of seemingly hopeless odds. Kershaw makes use of recent archaeological and geological discoveries in this thrilling and timely retelling of the story, originally told by Herodotus, the Father of History. The protagonists are, in Europe, the Greeks, led on land by militaristic, oligarchic Sparta, and on sea by the newly democratic Athens; in Asia, the mighty Persian Empire - powerful, rich, cultured, ethnically diverse, ruled by mighty kings, and encompassing modern Iran, Iraq, Turkey, Syria and Egypt. When the rich, sophisticated, Greek communities of Ionia on the western coast of modern Turkey, rebel from their Persian overlord Darius I, Athens sends ships to help them. Darius crushes the Greeks in a huge sea battle near Miletus, and then invades Greece. Standing alone against the powerful Persian army, the soldiers of Athens' newly democratic state - a system which they have invented - unexpectedly repel Darius's forces at Marathon. After their victory, the Athenians strike a rich vein of silver in their state-owned mining district, and decide to spend the windfall on building a fleet of state-of-the-art warships. Persia wants revenge. The next king, Xerxes, assembles a vast multinational force, constructs a bridge of boats across the Hellespont, digs a canal through the Mount Athos peninsula, and bears down on Greece. Trusting in their 'wooden walls', the Athenians station their ships at Artemisium, where they and the weather prevent the Persians landing forces in the rear of the land forces under the Spartan King Leonidas at the nearby pass of Thermopylae. Xerxes's assault is a disastrous failure, until a traitor shows him a mountain track that leads behind the Greeks. Leonidas dismisses the Greek troops, but remains in the pass with his 300 Spartan warriors where they are overwhelmed in an heroic last stand. Athens is sacked by the Persians. Democracy is hanging by a thread. But the Athenians convince the Greek allies to fight on in the narrow waters by the island of Salamis (underwater archaeology has revealed the Greek base), where they can exploit local weather conditions to negate their numerical disadvantage. Despite the heroism of the Persian female commander Artemisia, the Persian fleet is destroyed. Xerxes returns to Asia Minor, but still leaves some forces in Greece. In 479 BCE, the Spartans lead a combined Greek army out against the Persians. In a close-run battle near the town of Plataea, the discipline, fighting ability and weaponry of the Greeks prevail. The Persian threat to the Greek mainland is over. Athens forms a successful anti-Persian coalition to drive the Persians from Greek territory, seek reparations, and create security in the future. But this 'alliance' is gradually converted into an Athenian Empire. The democracy becomes increasingly radical. In this context we

see the astonishing flowering of fifth-century BCE Athenian culture - in architecture, drama and philosophy - but also a disastrous war, and defeat, at the hands of Sparta by the end of the century. The book concludes by exploring the ideas that the decisive battles of Thermopylae and Salamis mark the beginnings of Western civilization itself and that Greece remains the bulwark of the West, representing the values of generous and unselfish peace, freedom and democracy in a neighbourhood ravaged by instability and war.

persepolis volume 2 online: Catalogue of the Persian Manuscripts in the Library of the Hungarian Academy of Sciences Benedek Péri, 2018-05-29 The Library of the Hungarian Academy of Sciences was established in 1826. Its collection of Persian manuscripts is the most comprehensive set of its kind in Hungary. The volumes were produced in four major cultural centres of the Persianate world, the Ottoman Empire, Iran, Central Asia and India during a span of time that extends from the 14th to the 19th century. Collected mainly by enthusiastic private collectors and acknowledged scholars the manuscripts have preserved several unique texts or otherwise interesting copies of well-known works. Though the bulk of the collection has been part of Library holdings for almost a century, the present volume is the first one to describe these manuscripts in a detailed and systematic way.

persepolis volume 2 online: *New Literary Hybrids in the Age of Multimedia Expression* Marcel Cornis-Pope, 2014-11-15 Begun in 2010 as part of the "Histories of Literatures in European Languages" series sponsored by the International Comparative Literature Association, the current project on New Literary Hybrids in the Age of Multimedia Expression recognizes the global shift toward the visual and the virtual in all areas of textuality: the printed, verbal text is increasingly joined with the visual, often electronic, text. This shift has opened up new domains of human achievement in art and culture. The international roster of 24 contributors to this volume pursue a broad range of issues under four sets of questions that allow a larger conversation to emerge, both inside the volume's sections and between them. The four sections cover, 1) Multimedia Productions in Theoretical and Historical Perspective; 2) Regional and Intercultural Projects; 3) Forms and Genres; and, 4) Readers and Rewriters in Multimedia Environments. The essays included in this volume are examples of the kinds of projects and inquiries that have become possible at the interface between literature and other media, new and old. They emphasize the extent to which hypertextual, multimedia, and virtual reality technologies have enhanced the sociality of reading and writing, enabling more people to interact than ever before. At the same time, however, they warn that, as long as these technologies are used to reinforce old habits of reading/ writing, they will deliver modest results. One of the major tasks pursued by the contributors to this volume is to integrate literature in the global informational environment where it can function as an imaginative partner, teaching its interpretive competencies to other components of the cultural landscape.

This work explores the interest of 19th-century European powers in this region.

persepolis volume 2 online: *Multiple Identification Alternatives for Two Sassanid Equestrians on Fīrūzābād I Relief* Reza Kalani, 2017-11-28 Unlike the king himself, the identity of other figures carved out of Sassanid reliefs has mostly been controversial. This study attempts to resolve one of such controversial discussions on the identity of two Sassanid equestrians depicted on the Fīrūzābād I relief and thus on other Ardašīr I's reliefs. In a bid to cast light upon obscured Sassanid genealogical topics, the heraldic concept was took precedence in the course of investigations. To the best of the present author's knowledge, historical texts (mostly Arabic sources), numismatic evidence and visual analysis of ornaments probably related to ranks were all

employed for this purpose. In some cases, however, the author was forced into an argumentum ex silentio against his will due to a lack or shortage of historical evidence. There are two premises central to this investigation: first, the fact that the early Sassanids followed the lead of the late Arsacids in several political and cultural aspects, and, second, the existence of a sort of a heraldic system in both early Sassanid and late Arsacid periods.
