personal space strategies pdf: Understanding Space Strategy John J. Klein, 2019-03-07 This book examines the rise of great power competition in space, including the relevant and practical space strategies for China, Russia, the United States, and other countries. The work discusses the concepts and writings of past strategists, such as Thucydides, Sun Tzu, and Clausewitz, in relation to warfare initiated in or extending into space. This analysis underscores why polities initiate war based upon an assessment of fear, honor, and interest, and explains why this will also be true of war in space. Based upon the timeless strategic writings of the past, the book uncovers the strategy of space warfare, along with the concepts of deterrence, dissuasion, and the inherent right of self-defense, and outlines strategies for great, medium, and emerging space powers. Additionally, it highlights changes needed to space strategy based upon the Law of Armed Conflict, norms of behavior, and Rules of Engagement. The work also examines advancements and emerging trends in the commercial space sector, as well as what these changes mean for the implementation of a practical space strategy. Given the rise of great power competition in space, this work presents a space strategy based upon historical experience. This book will be of much interest to students of space policy, strategic studies, and International Relations.

personal space strategies pdf: Space Strategy in the 21st Century Eligar Sadeh, 2013-02-11 This book offers an overview of space strategy in the 21st century. The purpose of space strategy is to coordinate, integrate, and prioritize space activities across security, commercial, and

civil sectors. Without strategy, space activities continue to provide value, but it becomes difficult to identify and execute long-term programs and projects and to optimize the use of space for security, economic, civil, and environmental ends. Strategy is essential for all these ends since dependence on, and use of, space is accelerating globally and space is integrated in the fabric of activities across all sectors and uses. This volume identifies a number of areas of concern pertinent to the development of national space strategy, including: intellectual foundations; political challenges; international cooperation and space governance; space assurance and political, organizational, and management aspects specific to security space strategy. The contributing authors expand their focus beyond that of the United States, and explore and analyse the international developments and implications of national space strategies of Russia, China, Europe, Japan, India, Israel, and Brazil. This book will be of much interest to students of space power and politics, strategic studies, foreign policy and International Relations in general.

personal space strategies pdf: Space Strategy and Military Doctrine Bert Chapman, 2025-07-24 Examining open access civilian and military space policy, strategy, and doctrine documents, this book highlights emerging trends and developments in military space strategy. Bert Chapman collects public documents from Australia, Canada, the European Union, NATO, the United States, and the United Kingdom from 2017 onward to illustrate space's critical importance to national and international security and to multiple areas of civilian economic and personal use including climate change, food security, personal and global communications, and the potential for expanded space exploration. In light of recent revelations that Russia may be capable and desirous of exploding nuclear weapons in space to damage civilian and military space-based infrastructures of the U.S. and other countries and China's increasing space assertiveness and capabilities, it is more important than ever that civilian readers have the access and background knowledge necessary to parse publicly available documents relating to space strategy so that they may effectively participate in the legislative and regulatory policymaking processes of their governments.

personal space strategies pdf: The Geopolitics of Space Colonization Bohumil Doboš, 2023-09-21 This book presents a geopolitical analysis of the upcoming human exploration of celestial bodies in the inner solar system by the major space powers. It utilizes a systemic approach to the analysis of political events in space to develop a comprehensive overview of the factors influencing planned or proposed missions to the selected objects – the Moon, Mars, and asteroids. As a result of this analysis, the book establishes forward-looking scenarios of possible developments to highlight the main fault lines of the upcoming operations beyond the currently most heavily utilized terrestrial orbits. This framework is rooted in a holistic overview of factors relevant to the mid-term settlement and mining efforts and allows us to highlight the main focal points that will determine the future power distribution inside the inner solar system. The methodology is based on the analysis of an interplay of numerous factors deemed crucial for the decision-making of the major space powers and their capacities to promote their interests in a given region. Major space powers are, for the purpose of this book, understood as those actors with a realistic ability to participate in or lead the inner solar system colonization and mining missions in the mid-term future for which scenario-making is the most suitable. Given the realities of space travel, however, smaller actors are also taken into consideration as a part of cooperative efforts which are, nonetheless, dominated by the major players or, alternatively, as possible spoilers of the efforts in several regional settings. The book thus provides an in-depth analysis of the possible futures regarding the nearing competition over the celestial bodies This book will be of much interest to students of space power and policy, geopolitics, airpower, and International Relations.

personal space strategies pdf: *De-Radicalisation in the UK Prevent Strategy* M. S. Elshimi, 2017-03-16 This book examines de-radicalisation policy in the UK and addresses the contradictions evident in the conceptualisation and practice of de-radicalisation. It explores three main themes that touch upon some of the most pressing issues of our day: security, identity and religion. Situated within the Prevent strand of the UK Counter-Terrorism policy and administered by the police through the 'Channel Programme', policymakers have promoted de-radicalisation as a vital instrument in the fight against terrorism. Despite the political and legal importance of de-radicalisation as an instrument of counter-terrorism, we continue to know very little about the programme and the profile of individuals who have been de-radicalised, as well as having little or no access to data on the programme. There is also a glaring lacuna in the wider literature regarding the concept, theory, and evidence base for de-radicalisation policies. This book addresses this lacuna and, with the use of data collected from interviews conducted with 27 practitioners, this work reveals the existence of multiple conceptions of de-radicalisation and a number of conceptual features unique to the UK context. Subsequently, the book proposes that de-radicalisation in the UK would be best conceptualised as 'technologies of the self'. Seen in this way, de-radicalisation is less about tackling terrorism and radicalisation and more about the re-configuring of citizenship, the construction of a mainstream British identity, and the promotion of certain subjectivities in an era of uncertainty about British political identity. This book will be of much interest to students of critical terrorism studies, de-radicalisation, counter-terrorism, UK politics and security studies in general.

Thus, the user is brought into the picture as a producer of space whereas architects are classified as producers of place. The book addresses the notion of power relations within undefined spaces of transition through case study documentations and by analyzing individual and common expressions in four social housing projects in greater Copenhagen. Understanding the struggle of power relations can help identify an interest articulated by the user. The articulations are made by means of additions that are placed within the spaces of transition. The conclusion that can be drawn is that

power relations should be recognized by architects as a phenomenon of the dominating aspect of architecture. Neglecting to consider this domination in the conception of residential housing projects has a large impact on the user and his/her possibilities for practicing social interactions.

personal space strategies pdf: Intervening Spaces Nycole Prowse, 2018-05-07 Intervening Spaces examines the interconnectedness between bodies, time and space - the oscillating and at times political impact that occurs when bodies and space engage in non-conventional ways. Bodies intervene with space, creating place. Likewise, space can reconceptualise notions of the subject-body. Such respatialisation does not occur in a temporal vacuum. The moment can be more significant than a millennia in producing new ways to see corporeal connections with space. Drawing on theorists as diverse as Foucault, Deleuze, Guattari, Heidegger, Merleau-Ponty, Lefebvre and Grosz, temporal and spatial dichotomies are dissolved, disrupted and interrupted via interventions—revealing new ways of inhabiting space. The volume crosses disciplines contributing to the fields of Sociology, Literature, Performance Arts, Visual Arts, Architecture and Urban Design. Contributors are Burcu Baykan, Pelin Dursun Çebi, Michelle Collins, Christobel Kelly, Anthi Kosma, Ana Carolina Lima e Ferreira, Katerina Mojanchevska, Clementine Monro, Katsuhiko Muramoto, Nycole Prowse, Shelley Smith, Nicolai Steinø and İklim Topaloğlu.
