pdf outdoor activities: *Adventure and Society* Simon Beames, Chris Mackie, Matthew Atencio, 2018-12-28 This undergraduate textbook provides a broad overview of the ways in which

'adventurous practices' influence, and are influenced by, the world around them. The concept of adventure is one that is too often tackled within subject silos of philosophy, education, tourism, or leisure. While much of the analysis is strong, there is little cross-pollination between disciplines. *Adventure & Society* pulls together the threads of these discourses into one coherent treatment of the term 'adventure' and the role that it plays in human social life of the 21st century. It explores how these practices can be considered more deeply through theoretical discourses of capitalism, identity construction, technology and social media, risk-taking, personal development, equalities, and sustainability. As such, the book speaks to a broad audience of undergraduate and postgraduate students across diverse subject areas, and aims to be an accessible starting point for deeper inquiry.

With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline, as well as exploring key contemporary topics and debates, and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.

pdf outdoor activities: Outdoor Recreation in the Pacific Northwest and Alaska Troy Elizabeth Hall, 2009 Population growth in Oregon, Washington, and Alaska is expected to increase demand for outdoor recreation on public land. This trend will be tempered by changes in the sociodemographic composition of the population. Among sociodemographic characteristics, different ages and incomes correspond to different participation rates. Although older Americans are participating more, participation is still lower among this group for active pursuits. Hence, as the population ages, demand for passive activities may increase. Low-income people participate at a much lower rate than higher income people in outdoor recreation, and the growing disparity between the wealthy and poor may create inequities in opportunities for participation. State recreation planning documents for Oregon, Washington, and Alaska have identified this issue as a significant concern for recreation providers. Another important factor in recreation trends in the region is ethnicity: different ethnic groups participate in outdoor recreation at different rates, exhibit some different preferences for specific activities, and use recreation sites in different ways. In Alaska, the number of Asian/Pacific Islanders is expected to quadruple by 2025; in Oregon, the Hispanic population may triple by 2025; and in Washington, both these segments of the population may double.

pdf outdoor activities: The Palgrave International Handbook of Women and Outdoor Learning Tonia Gray, Denise Mitten, 2018-05-12 This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments (OLEs). Women choose to participate actively in outdoors careers, many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities. They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive, rewarding excellence regardless of age, gender, socioeconomic status, disability, or ethnicity. However, both research and collective experiences in OLEs suggest that many women feel invisible, relegated, marginalized, and undervalued. In response to this marginalization, this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs. Women scholars and practitioners from numerous fields, such as experiential outdoor education, adventure education, adventure therapy, and gender studies, explore the implications of their research and practice using poignant examples within their own disciplines. These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present. Social inequalities still abound in OLEs, and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive. Global in perspective and capacious in content, this one-stop volume is an indispensable reference resource for a diverse range of academics, including students and researchers in the fields of education, psychology, sociology, gender studies, geography, and environment studies, as well as the many outdoors fields.
