rosa koire lectures: Mass Awakening Shoshi Herscu, 2018-10-08 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the

scenes for the past half-century. The author, an independent journalist, became aware of this agenda only in the past few years. She found it hard to believe, but in-depth research and the testimony of whistleblowers worldwide have exposed these strategies. They include geoengineering (chemtrails), fluoridation of water supplies, GMOs, vaccinations, false flag terrorist attacks, and economic warfare by the group David Wilcock calls the Cabal. However, despite this grim reality, a positive shift of mass awakening is occurring worldwide. Tribunals are being established to prosecute elite offenders; revelations of hidden technology like free-energy and new economic models are being put forth. The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness. MASS AWAKENING gives us all real hope for an amazing future. Mass Awakening is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material, rarely covered in print. It is both a true inspiration and a much-needed breath of fresh air. —Ada Tourtsakis PrepareForChangeLeadership.org

rosa koire lectures: The Concept of Class Peter Calvert, 2025-04-01 Originally published in 1982, *The Concept of Class* provides a concise and stimulating guide to the historical development of the concept of 'class' and the different ways in which it has been applied in social and political theory. The author begins by determining where and how the word acquired its political sense, and after a short re-examination of its classical background, moves on to consider Marx's reformulation of the concept and his proposals for making it a fundamental term in the study of society. He traces the different strands of Marxist and non-Marxist use of the term right up to the twentieth century, considers the confusion of ideas that had resulted at the time, and analyses the utility of 'class' in assessing the nature of contemporary socialist states and post-industrial capitalist societies. In conclusion, Dr Calvert suggests that class is an 'essentially contested concept' – that is, a concept on which agreement is by its nature impossible. Today it can be read in its historical context.

Not since the large-scale infusion of scientists and engineers fleeing Nazi Germany has there been such a mass importation of intellectual labor from U.S. client states in Asia. One of the specialized tasks assigned to this group is to build the technetronic infrastructure for the new world order command and control system. *Servitors of Empire* is not intended to fan the flames of suspicion and paranoia aimed at Asian Americans, but serves to illuminate the way in which highly trained knowledge workers are being employed to bring sovereign nations such as the United States under centralized rule made possible through advances in bioscience, IT, engineering, and global finance.
