reciprocity principle book download: Touch Richard Kearney, 2021-02-23 Our existence is increasingly lived at a distance. As we move from flesh to image, we are in danger of losing touch with each other and ourselves. How can we combine the physical with the virtual, our embodied experience with our global connectivity? How can we come back to our senses? Richard Kearney offers a timely call for the cultivation of the basic human need to touch and be touched. He argues that touch is our most primordial sense, foundational to our individual and common selves. Kearney explores the role of touch, from ancient wisdom traditions to modern therapies. He demonstrates that a fundamental aspect of touch is interdependence, its inherently reciprocal nature, which offers a crucial corrective to our fixation with control. Making the case for the complementarity of touch and technology, this book is a passionate plea to recover a tangible sense of community and the joys of life with others.

Genre María de la O Hernández-López, 2024-10-14 Around twenty years ago, with the digitisation of almost every facet of life, most businesses started including their own review system, so that their products could be rated and reviewed. This was the first wave of online reviews, called online consumer reviews (OCRs). The emergence of the smartphone and the proliferation of social media in the 2010s, however, resulted in a new ecosystem in which peers could share their assets, review other peers and be reviewed. This is the second wave of online reviews, or the emergence of online peer reviews (OPRs). This book explores the three differentiating discursive practices found in BlaBlaCar in Spanish and in English (emotive, relational and metacommunicative) as representative of this new wave. It demonstrates that OPRs have characteristics of their own, and proposes a new definition that captures the latest developments in online reviews in the context of peer collaboration.

how they discursively negotiate multiple identities in a creative and participatory space, giving rise to complexities in the definition of categories such as expert, layperson, learner, and teacher in fluid and dynamic digital contexts. In this insightful book, Bhatia sets out to investigate the interdiscursive construction of identity on YouTube. Taking a multi-methodological approach to Critical Discourse Analysis, Bhatia examines beauty vlogs at the levels of sociocognition, language, and genre to provide a better understanding of some of the measures of success and effect as well as new practices of expertise in online communication. The book contributes to a better understanding of how young people work online, often collaboratively, to conform to or resist mainstream notions of expertise, authenticity, race, and beauty, as well as the linguistic and semiotic tools they use to perform their identity, in order to become digital entrepreneurs and cultural influencers. Students and scholars in the field of discourse analysis, situated within the contexts of popular culture and social media, will find this book a valuable read. This volume also enhances the everyday person's understanding of the complexities of new media communication and a new generation of cultural intermediaries.

reciprocity principle book download: *The Psychology of Persuasion - Cialdini's 6 Principles* Ikechukwu Kelvin Maduemezia , 2025-08-28 Why do some people say yes while others resist? Dr. Robert Cialdini uncovered 6 powerful principles of persuasion that influence human behavior: □ 1. Reciprocity - People feel obliged to give back when they receive. That's why free samples and bonuses work so well. Give value first. □ 2. Commitment & Consistency - Once someone commits (even in a small way), they want to stay consistent. That's why free trials convert—users don't want

to “waste” their initial effort. □ 3. Social Proof – We look to others to decide what’s right. Reviews, testimonials, and “best-seller” tags trigger trust. □ 4. Authority – We listen to experts. Certifications, uniforms, or simply showing expertise boosts credibility. □ 5. Liking – We say yes to people we like. Similarity, compliments, and genuine connection increase persuasion. □ 6. Scarcity – Limited time or limited stock makes people act fast. “Only 2 left!” creates urgency. □ Takeaway: Whether in sales, marketing, or everyday conversations, these principles quietly shape decisions. Use them ethically, and people will lean toward “yes” without feeling pressured.
