religious organization management ebook: *The Rise of Digital Management* François-Xavier de Vaujany, 2024-06-03 This book analyzes the history of management, placing it in perspective with both American history and the genealogy of digital technology. Focusing on the years of industrial mobilization in the United States (from 1937 to 1945) and their extension into the Cold War, it shows particularly how scientific management was reconfigured and re-legitimized in favor of a new profoundly American geopolitics. In a context where the future was at a standstill, this research also explains what became of the managerial processes at the heart of capitalism from the 40s onwards: the shift from a managerial capitalism of calculation to a narrative capitalism made up of desiring machines. This digital management no longer simply contributes, along with others, to unveiling and revealing the future. Aligned with the American obsession with novelty, it is the very process of revelation and unveiling, with managers and consumers alike becoming the intersecting subjects of desires borne of managerial apocalypses. To explore this period of American history, the author has combined a triple narrative anchored in three types of archives: an intimate history of this reconfiguration from the presence in New York of Saint-Exupéry, Burnham and Wiener; a description of the great historical moment of industrial mobilization; and a philosophical speculation about reconfiguration and its links to American history.

religious organization management ebook: *Digital Hinduism* Murali Balaji, 2017-11-01 This edited volume seeks to build a scholarly discourse about how Hinduism is being defined, reformed, and rearticulated in the digital era and how these changes are impacting the way Hindus view their own religious identities. It seeks to interrogate how digital Hinduism has been shaped in response to the dominant framing of the religion, which has often relied on postcolonial narratives devoid of context and an overemphasis on the geopolitics of the Indian subcontinent post-partition. From this perspective, this volume challenges previous frameworks of how Hinduism has been studied, particularly in the West, where Marxist and Orientalist approaches are often ill-fitting paradigms to understanding Hinduism. This volume engages with and critiques some of these approaches while also enriching existing models of research within media studies, ethnography, cultural studies, and religion.

religious organization management ebook: *Digital Creatives and the Rethinking of Religious Authority* Heidi A. Campbell, 2020-09-08 Much speculation was raised in the 1990s, during the first decade of internet research, about the extent to which online platforms and digital culture might challenge traditional understandings of authority, especially in religious contexts. *Digital Creatives and the Rethinking of Religious Authority* explores the ways in which religiously-inspired digital media experts and influencers online challenge established religious leaders and those who seek to maintain institutional structures in a world where online and offline religious spaces are increasingly intertwined. In the twenty-first century, the question of how digital culture may be reshaping notions of whom or what constitutes authority is incredibly important. Questions asked include: Who truly holds religious power and influence in an age of digital media? Is it recognized religious leaders and institutions? Or religious digital innovators? Or digital media users? What sources, processes and/or structures can and should be considered authoritative online, and offline? Who or what is really in control of religious technological innovation? This book reflects on how digital media simultaneously challenges and empowers new and traditional forms of religious authority. It is a gripping read for those with an interest in communication, culture studies, media studies, religion/religious studies, sociology of religion, computer-mediated communication,

and internet/digital culture studies.
