read american psycho online: *Errancies of Desire* Vartan P. Messier, 2022-11-15
Social commentators, psychologists, and journalists all point to the idea that in the new millennium, traditional masculinity is in crisis. In contemporary film and literature, this predicament is often portrayed as a problem of desire—particularly, heterosexual desire. Male libido, it appears, is especially vicious when it is misguided. Yet the genesis of this problem is not consistently diagnosed. While some texts may situate it in the unbridled expression of human sexuality and its associated

discourses, others contend it is the perverse result of popular constructions of sex and gender. Addressing this conundrum, *Errancies of Desire* focuses on the intersections of phallocratic violence and masculine identity in contemporary works of fiction across three subcontinents: North America, Western Europe, and sub-Saharan Africa. In doing so, Messier details the ways in which male desire is predicated on mediated forms of predatory and misogynistic sexuality that cross national and cultural divides. Employing a comparative methodology, he interrogates common perceptions of national differences and masculine identities grounded in historical specificity. *Errancies of Desire* effectively argues that when associated symptoms of violent and sexist behavior are institutionalized and misguidedly construed as a masculine norm, all men can become monsters.

read american psycho online: Transitions Tania Zittoun, 2006-02-01 What do young people do with the novels they read, the films they see, the music they hear and sing? How do these cultural products act as 'symbolic resources' in the process of development? And what can we, as researchers, learn by studying people's uses of fiction? This monograph approaches development through the study of transitions and the processes of exploration that follow ruptures in people's lives. Specifically, it examines young people's symbolic responsibility as they have to choose among the wide range of cultural products societies exposes them to. The book thus examines the books, films and music that young people mobilize when they need to redefine their identity, learn informal know-how, or have to confer meaning to what happens to them in transitions. The book has a theoretical scope. It draws on cultural psychology and psychoanalysis to formulate the importance of semiotic mediation in thinking, feeling and acting. Its main contribution is to propose a model for analyzing uses of symbolic resources, such as books and films, in everyday life. It thus shows how uses of symbolic resources can enable new forms of experiences and conduct. It finally highlights social and personal conditions that might facilitate or hinder developmental uses of symbolic resources. The book, based on in-depth case studies, is addressed to scholars, professional and students in the fields of youth, culture and the media, cultural and developmental psychology, and life-long education.

Psychoanalysis Online 3: The Teleanalytic Setting is a highly topical, continuing conversation on the role of technology in psychoanalysis and its tremendous potential for outreach to patients in the global economy. It describes the essentials of a framework for teleanalysis that is secure in terms both of technology and ethical stance. The technology is a third in the therapeutic alliance and its impact needs to be analysed like every other element in the field. Teleanalysis appears to some people to be a distancing methodology but the authors report surprising closeness across a distance. Teleanalysis offers a window into the analytic pair's experience of time, space, deprivation, fantasy, and physicality and shows unconscious dynamics displayed graphically on the image on the screen. The book looks at the convenience and impact of internet use among various communities including LGBTQI in terms of defense against and transition to intimacy, and gives clinical evidence of transformation made possible through the therapeutic aspects of technology.

Koblížek, 2017-09-21 The notion of aesthetic illusion relates to a number of art forms and media. Beginning with an introduction providing historical background to modern discussions of illusion, it deals with a wide range of theoretical issues. We have negatively-biased brains, which zoom like doom-drones in on what's wrong with our day, rather than what's right. (Back in the mists of time, this negative bias saved our skins, but now it just makes us anxious). Also, something called the 'hedonic treadmill' means we eternally quest for better, faster, more, like someone stuck on a dystopian, never-ending treadmill. Thankfully, there are scientifically-proven ways in which we can train our brains to be more positive-seeking. And to take a rest from this tireless pursuit. Whew. Catherine Gray knits together illuminating science and hilarious storytelling, unveiling captivating research showing that big bucks don't mean big happiness, extraordinary experiences have a 'comedown' and budget weddings predict a lower chance of divorce. Using various critical frameworks like feminism and colonialism, the book also assesses diversity gaps in horror fictions, with an emphasis on marketing and storytelling methodology. Reviewing the canon and definitions of horror may point to influences for future implications of diversity, which has cyclically manifested in horror fictions throughout history. This book studies works from literature, film and television while acknowledging that each of the formats are distinct artforms that complement each other. The author compares diverse representation in novels like *The Castle of Otranto*, *Frankenstein*, *Fledgling*, *Broken Monsters* and *Mexican Gothic*. Horror films like *Bride of Frankenstein*, *It Comes at Night*, *Us* and *Get Out* are also examined. Lastly, the author emphasizes the diverse horror fictions in television, like *The Exorcist*, *Fear the Walking Dead*, *The Twilight Zone* and *Castle Rock*.
