roleplay strategy pdf: Learning French oral skills using role play as a learning strategy: The kenyan experience Odhiambo Oduke, 2014-02-01 Role play and foreign language learning helps the learners to develop speaking skills within defined social contexts. Languages are always spoken within certain defined spacio-social context. The learning of French as a foreign language in Kenya takes cognizance that oral skills are important to facilitate competent communication in any given language. The Kenyan reality of learning oral French skills within a learning set-up in Kenyan secondary schools is well presented in this text. The salient challenges are also highlighted since language learning is normally not a smooth sail for the learner and for the teacher who plays a pivotal facilitation role in guiding the learner to imbibe the vital communicative skills in the language that is being taught. On the whole role play is not just a language learning activity; it is an activity that provides impetus which propels human development in its entire gamut of activities. A conspicuous hint on the importance of role play in our daily lives is also presented in this text with some examples well presented and cited in this write-up. Stephen Krashen's Monitor Model on language acquisition and the Grounded Theory which helps to interpret social research findings have been used to analyze the data which was derived from the inquiry done in the Kenyan secondary schools. The classical importance of role play and simulation in the learning process has been well underscored in this particular text.

roleplay strategy pdf: *Demonstrating complexity with a roleplaying simulation* Janmaat, J., Lapp, S., Wannop, T., Bharati, Luna, Sugden, Fraser, 2015-06-04 Rural people in Nepal and other developing nations are part of complex, social-ecological systems. Efforts to provide assistance to these people must integrate knowledge from a variety of perspectives. This report documents the use of a role-playing game, supported by an agent-based model, to demonstrate the interaction between migration, social capital and the effectiveness of water storage. The importance of these interactions was highlighted by fieldwork conducted at several sites in the Koshi River Basin. The model underlying the game was a stylized representation based on the Indrawati Subbasin northeast of Kathmandu, Nepal. The report highlights that (a) role-playing tournaments can be an effective way to engage technical and policy experts with the complex interactions between the social and physical dimensions of watershed management; and (b) migration and the economic changes which drive these interactions are forces that need to be accepted, and investments in water storage need to be selected depending on how they fit into these trends.

The book combines theory and practice; as such, it lays solid neurological foundations for film and media literacy, and provides several relevant practical applications from worldwide scholars. The book contains thirteen chapters three of which address a number of theoretical issues related to the camera and the brain while the remaining ten are practical illustrations of the extent to which film and video are used as pedagogical tools. In the book preface, Nikos Theodosakis, author of 'The Director in the Classroom', writes that the book contributors 'have built a wonderful bridge for us to travel over'.
