road novel pdf download: The Book's Road in the Age of Digitization Janina Krieger, 2023-01-28 Although every area of life is permeated by digital processes, the majority of Germans seem to resist digital alternatives with regard to the activity of reading. The printed book continues to enjoy much greater popularity than the eBook. This seems surprising, since the entire communication behavior has moved to digital devices. So what lies behind this? Why are there still printed books in digital times? Previous studies of the printed book have focused primarily on its media future, as this seemed threatened by digitization. In this work, Janina Krieger instead examines the past from three perspectives in order to gain insights into the present. While other studies always chose one method and these mostly belonged to the quantitative approach, here three subjects are identified, which are examined with different methods and in their combination can provide an answer to the research question: the consumers of literature (the readers), literature itself (the selected genre is the novel), and the media theories of the 20th century, which have already dealt with media change.

road novel pdf download: China's High-Tech Repression Against Uyghurs: Novel Theoretical Insights Lacin Idil Oztig, Abdurresit Celil Karluk, 2025-02-14 This book explores the socio-spatial impacts of China's high-tech repression against Uyghurs both within and beyond its borders. The study is built on surveys, in-depth interviews, and focus group discussions with the members of Uyghur diaspora in Türkiye. Findings indicate that high-tech repression minimizes the social life in East Turkestan. This type of governance aims to achieve a complete erasure of privacy and individual agency by strategically leveraging technology. While Uyghurs who escaped to Türkiye appear to gain relative freedom, our findings indicate that with China's transnational repression mostly applied through Information and Communication Technologies (ICTs), they live in a social space which functions as a quasi-spatial extension of East Turkestan.
