school safe numeracy games: *How Much Does a Great School Cost?* Barbara J. Smith, 2021-04-01 After examining budgets from all kinds of schools, over the past three decades, two key findings emerged: school budgets reflect school values, intentionally or not; and, there are noteworthy ways to reduce the costs of operating schools. This text addresses two ways to gain insight and shed light on the question: How much does a great school cost? Sixteen educators were asked about their perceptions of greatness in schools, innovations worthy of pursuit, and barriers to change. This examination unpacks the expenditures and revenue options in existing schools; as well as, costs associated with an envisioned New School. This account addresses both an analysis of what is and what could be, at the same time as revealing innovative ways to save on schooling expenditures, and think differently about schools as potential revenue-generating institutions. Changing mindsets is at the core of school improvement, and while greatness may be defined in different ways, the budget will reflect what matters in an institution. A great school may not cost as much as you might think, but the willingness to re-purpose funds and generate revenue, can help jump start the engines of change.

school safe numeracy games: *On the Fringes* Jackie Ward, 2019-03-12 In *On the Fringes: Preventing exclusion in schools through inclusive, child-centred, needs-based practice*, Jackie Ward

opens up the debate surrounding school exclusion and its link to special educational needs (SEN), and shares action-oriented strategies designed to bring about a more inclusive approach. Too many of our vulnerable young people are being excluded even those with SEN and the very young who are only just on the cusp of school life. And having seen first-hand the impact that exclusion has on children with often unmet medical needs such as autistic spectrum condition (ASC) and attention deficit hyperactivity disorder (ADHD) Jackie explores in this book the realities of what exclusion means to each of us and its impact on wider society. Jackie examines this critical issue through the lens of her experiences in both mainstream and specialist settings and presents practical, solution-focused guidance to help schools deliver the inclusive education that every child deserves. Drawing upon a range of sources, Jackie's wide-reaching analysis is backed up with case studies, up-to-date research and anecdotal reports setting out a balanced view focusing on the stated and underlying needs of schools, staff, parents, children and other agencies. On the Fringes scrutinises exclusion procedures and reviews the SEND Code of Practice in depth, particularly highlighting the role of early interventions in detecting underlying SEN and medical needs. Jackie also explores a range of pre-emptive and alternative approaches that can be employed as part of a whole-school approach to pastoral care and behaviour management that develops pupils' self-awareness and self-regulation. In doing so she offers informed inspiration to teachers and SEN practitioners working with some of our most vulnerable children who, without our care, compassion and tailored provision, are too often destined for lives on the fringes of society. Suitable for teachers, school leaders, SEN professionals, policy-makers and parents.

Mary Cowhey, a teacher who co-founded FWP, shares these stories and the voices of her fellow FWP organizers through vignettes and interviews, weaving in the lessons learned along the way. Inspired by Paulo Freire's popular education and the radical tradition of the Highlander Folk School, some Latina and African mothers, a great-grandmother and a couple of teachers founded *Families with Power (FWP)*. Organizing Family Reading Parties in each other's living rooms (instead of meetings at school) to recruit additional families and identify potential leaders, FWP created a Highlander-style residential retreat that employed Freirean culture circles to pose problems and design programs to address them. Readers will get an inside look at the benefits, successes and challenges of more than a dozen years of student and family engagement in the community and school, tackling issues from academics, race and class to immigration and public health--
