**rick riordan download: Star Trek and the Tragic Hybrid** Carolyn Burlingame-Goff, 2024-05-28 Spock, Data, Worf, B'Elanna Torres, Seven of Nine, Odo, Michael Burnham, Soji. Many of Star Trek's most beloved characters are children of two worlds, the products of competing biologies, materials, and cultures. Their popularity is unsurprising: authors mine conflicted identities for dramatic effect, and viewers see their own struggles reflected in the challenges of individuals who never seem to quite fit in. This book demonstrates that the tradition is not new. Spock and his fellow hybrids have their roots in anti-slavery literature. Abolitionist authors introduced protagonists who were both Black and White, yet not fully accepted as either. Divided at their core, the attempts of these noble yet tortured individuals to bridge their two races inevitably ended in tragedy. Gene Roddenberry and his successors thrust the character type into the future, using it to explore the evolving racial attitudes of their times. Star Trek's tragic hybrids have asked audiences to see beyond color, to embrace multiculturalism, to accept mixed-race identity, and, finally, to acknowledge the consequences of systemic oppression.

**rick riordan download: Topologies of the Classical World in Children's Fiction** Claudia Nelson, Anne Morey, 2019-10-24 Beginning with Rudyard Kipling and Edith Nesbit and concluding with best-selling series still ongoing at the time of writing, this volume examines works of twentieth- and twenty-first-century children's literature that incorporate character types, settings, and narratives derived from the Greco-Roman past. Drawing on a cognitive poetics approach to reception studies, it argues that authors typically employ a limited and powerful set of spatial metaphors - palimpsest, map, and fractal - to organize the classical past for preteen and adolescent readers. Palimpsest texts see the past as a collection of strata in which each new era forms a layer superimposed upon a foundation laid earlier; map texts use the metaphor of the mappable journey to represent a protagonist's process of maturing while gaining knowledge of the self and/or the world; fractal texts, in which small parts of the narrative are thematically identical to the whole, present the past in a way that implies that history is infinitely repeatable. While a given text may embrace multiple metaphors in presenting the past, associations between dominant metaphors, genre, and outlook emerge from the case studies examined in each chapter, revealing remarkable thematic continuities in how the past is represented and how agency is attributed to protagonists: each model, it is suggested, uses the classical past to urge and thus perhaps to develop a particular approach to life.
