should be conditions synopsis: Judaism's Story of Creation Jacob Neusner, 2021-09-06 During the formative age of Judaism, the first seven centuries CE, the great rabbis thought deeply about beginnings in light of endings. They imposed upon their sequential reading of each passage the accumulated results of their reflection about all passages. Thus, they encompassed Scripture, so as to describe the world as God had intended it to be. This act of intellect resulted in two distinct, ahistorical media of thought and expression, the Halakhah, law, and Aggadah, lore. The author provides three systematic accounts of the Halakhic reading, and two Aggadic accounts. The Halakhic accounts cover [1] Work and Rest, [2] Ownership and Possession, Eden and the Land, and [3] Ownership and Possession in the Household. The Aggadic accounts pertain to [1] the Six Days of Creation, and [2] Adam and Eve.

should be conditions synopsis: Who Would You Be Without Your Story? Byron Katie, 2008-10-15 This book is a collection of 15 dialogues that occurred throughout the United States and Europe with Byron Katie. Some of the people who worked with Katie have painful illnesses, others are lovelorn or in messy divorces. Some are simply irritated with a co-worker or worried about money. What they all have in common is a willingness to question, with Katie's help, the painful thoughts that are the true cause of their suffering. In every case we see how Katie's acute mind and fierce kindness helps each person dismantle for themselves what is felt to be unshakable reality. Although these dialogues make fascinating reading—some are both hilarious and deeply moving at once—they are intended primarily as teaching tools. Each took place in front of an audience, and Katie never lost connection with that audience, repeatedly reminding each person in the room to follow the dialogues inwardly, asking themselves the questions the participant must ask. The dialogue between Katie and these volunteers is an external enactment of precisely the kind of dialogue each person can have with their own thoughts. The results, even in the seemingly most dire situation, can be unimagined freedom and joy.

should be conditions synopsis: Story by Story Thomas Alderson Davis, Robert Arnold Johnson, 2019-07-12 This volume brings together two authors, one a psychiatrist, one a philosopher, to listen to one another's reading of five stories of what it's like to bear a different mental or physical illness. The beginning story, or anchor, for the conversation that unfolds between them is that of a person subject to recurring spells of catatonia, the uncanniest of human conditions. They discover that truly understanding what an illness is calls for understanding it within the context of who suffers it, that to understand illness is to establish the right relation between what is being suffered and who is suffering it. This deceptively simple way of talking, which is labelled who/what talk, will prove more practical and more clarifying than will terms like "mental" and "physical." Furthermore, it has this additional dividend: it intrinsically resists a temptation toward medical prejudice—the inclination for doctors and other caregivers to lose the who of the sufferer through their focus on the what of her illness.
