social justice literature pdf: Social Justice and the Arts LeeAnne Bell, 2017-07-05

This book explores the relationship between social justice practices and the Arts in Education. It argues that social justice practices, at their best, should awaken our senses and the ability to imagine alternatives that can sustain the collective work necessary to challenge entrenched patterns and practices. Chapters display a range of arts-based pedagogies for challenging oppressive practices in schools, community centers and other public sites. The examples provided illustrate both the promise and on-going challenge of enacting arts based social justice practices that can transform consciousness and organize action toward justice and social change. They show the power of arts-based pedagogies to engage the imagination, reveal invisible operations of power and privilege, provoke critical reflection, and spark alternative images and possibilities. They also show the importance of on-going critical reflection for this work with attention to both the specificities of place and the obstacles (internal and external) to maintaining a social justice stance in the face of contemporary neoliberal discourses. This book was originally published as a special issue of *Equity & Excellence in Education*.

It focuses attention on social relationships, values, and access to resources in families, communities, regions and nations. But does the concept, with its focus on particular aspects of social life and the thrust of its influence on policy initiatives, hide more than it illuminates? Is it even harmful? Can social capital ideas be amended or adapted to bring other issues into view, or are there alternative concepts that are better able to address contemporary social, economic and political life? This edited collection brings together contributions, including from internationally renowned researchers, that assess social capital - as a theoretical concept, its shaping of policy development, and its practices in research and everyday life. Some reveal the conceptual lacks and policy drawbacks of social capital, and put forward alternatives. Others pursue mainstream models and their adaptation.

social justice literature pdf: *Curriculum for Justice and Harmony* Keith C. Barton, Li-Ching Ho, 2021-09-30 Barton and Ho present a global vision of social and civic education, one that reorients the field toward justice and harmony. Drawing from diverse philosophical and cultural traditions, as well as empirical research, they introduce curriculum principles designed to motivate and inform students' thoughtful and compassionate deliberation of public issues. This book argues that the curriculum must prepare young people to take action on issues of justice and harmony—societal ideals that are central to all communities. Effective action depends on deliberation characterized by emotional commitment, collaborative problem-solving, and engagement with diverse perspectives and forms of expression. Deliberation for public action also requires knowledge—of people's lives and experiences, their insights into social issues, and strategies for advancing justice and harmony. These curriculum principles are illustrated through case studies of public housing, food insecurity, climate change, gender bias, public health, exploitation of domestic workers, incarceration of racialized minorities, the impact of development and environmental change on Indigenous communities, and other pressing global concerns.
