speech crafting ebook: Crafting Textiles in the Digital Age Nithikul Nimkulrat, Faith Kane, Kerry Walton, 2016-09-08 In an era of increasingly available digital resources, many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies. Highly specialized craft/design practitioners may now elect to make use of digital processes in their work, but often choose not to abandon craft skills fundamental to their practice, and aim to balance the complex connection between craft and digital processes. The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands-on experimentation with material and digital technologies available in the present. Craft provides the foundations for thinking within the design and production of textiles, and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies. Within the framework of current challenges relating to sustainable development, globalization, and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner.

speech crafting ebook: Rethinking Language Use in Digital Africa Leketi Makalela, Goodith White, 2021-06-23 This book challenges the view that digital communication in Africa is limited and relatively unsophisticated and questions the assumption that digital communication has a damaging effect on indigenous African languages. The book applies the principles of Digital African Multilingualism (DAM) in which there are no rigid boundaries between languages. The book charts a way forward for African languages where greater attention is paid to what speakers do with the languages rather than what the languages look like, and offers several models for language policy and planning based on horizontal and user-based multilingualism. The chapters demonstrate how digital communication is being used to form and sustain communication in many kinds of online groups, including for political activism and creating poetry, and offer a paradigm of language merging online that provides a practical blueprint for the decolonization of African languages through digital platforms. speech crafting ebook: *Digital Social Reading and Second Language Learning and Teaching* Joshua J. Thoms, Kristen Michelson, 2024-10-15 Rapid changes in communication channels, tools, and conventions of interaction over the last two decades have paved the way for increasingly digital learning environments. In second language (L2) education, shifts toward digital learning and teaching were intensified during the pandemic and many such formats are here to stay. At the same time, a growing interest in socially oriented pedagogies in L2 learning and teaching is prompting many L2 researchers and practitioners to investigate new research areas and explore post-communicative language teaching pedagogies that engage learners more deeply with cultural texts, using a range of semiotic and linguistic resources. Digital Social Reading (DSR) is a pedagogical approach that affords technology-mediated collaborative reading, where texts are read through a digital platform that allows two or more readers to highlight the same virtual copy of a text and discuss it through a digital interface that affords synchronous or asynchronous margin dialogues anchored in specific passages. This book offers empirical studies demonstrating how DSR can foster—and illuminate—learner interactions that mediate learning, and also work that focuses on language teaching perspectives in DSR environments, including task design and assessment issues.

speech crafting ebook: Language and Learning in the Digital Age James Paul Gee, Elisabeth R. Hayes, 2011-02-01 In *Language and Learning in the Digital Age*, linguist James Paul Gee and educator Elisabeth Hayes deal with the forces unleashed by today's digital media, forces that are transforming language and learning for good and ill. They argue that the role of oral language is almost always entirely misunderstood in debates about digital media. Like the earlier inventions of writing and print, digital media actually power up or enhance the powers of oral language. Gee and Hayes deal, as well, with current digital transformations of language and literacy in the context of a growing crisis in traditional schooling in developed countries. With the advent of new forms of digital media, children are increasingly drawn towards video games, social media, and alternative ways of learning. Gee and Hayes explore the way in which these alternative methods of learning can be a force for a paradigm change in schooling. This is an engaging, accessible read both for undergraduate and graduate students and for scholars in language, linguistics, education, media and communication studies.

speech crafting ebook: Physical Language Learning Spaces in the Digital Age Felix A. Kronenberg, 2024-02-08 How do we intentionally design physical environments for language learning and teaching? How can we build spaces that are inclusive, accessible, safe and equitable? While the Covid-19 pandemic has advanced notions of online education, it has also revealed the benefits and affordances of human-to-human interaction in physical learning spaces. This book explores the design of physical spaces intended for language learning specifically. From residential learning spaces to active classrooms, from social and experiential spaces to zoom rooms and language centers, from mobile community-based learning to hybrid makerspaces, language learners and educators have more choices than ever regarding their possible learning environments. Changing pedagogies and new technologies provide ever more alternatives to the normalized technology of the classroom. With a focus on creating new awareness of the affordances and benefits of physical spaces as active agents in the language learning and teaching processes, this book takes a practical approach to introduce readers without any prior knowledge of design or architecture to the topic. As language learning spaces need to consider stakeholders from diverse cultures, Felix Kronenberg provides examples from language centers around the world, including Asia, Europe and the United States. Readers will learn how to conceptualize and create supportive, resilient, flexible, inclusive, accessible, affordable, sustainable, and safe physical learning spaces. The book is an interdisciplinary introduction to this emerging field, drawing from research in disciplines such as architecture, learning spaces design, second language acquisition, pedagogy, history, and sociology.
