skill development resources: Human Resource Strategy Michal Biron, Corine Boon, Peter A. Bamberger, 2014-06-27 What is human resource strategy? How are human resources strategies formulated and how can we explain the variance between what is espoused and what is actually implemented? What impact – if any – does human resource strategy have on the organization's bottom line, and how can this impact be explained? Is there one best HR strategy for all firms, or is the impact of HR strategy on performance contingent on some set of organizational, technological or environmental factors? Human Resource Strategy, 2nd edition, provides an overview of the academic and practitioner responses to these and other questions. Applying an integrative framework, the authors review 30 years' worth of empirical and theoretical research in an attempt to reconcile often-conflicting conceptual models and competing empirical results. Complex theoretical models and scientific findings are presented in an accessible and relevant way, in the context of the strategic decisions that executives are forced to make on a regular basis. This new edition features an updated literature review, coverage of the latest challenges to HR strategy, new mini-cases, discussion questions, additional examples, and an emphasis on the strategic implications of the research, making it an ideal resource for students and practitioners alike.

Focusing on the Asia-Pacific region, which in recent years has been the engine of global economic growth , this volume surveys trends and prospects in technical and vocational education and training (TVET) with particular reference to achieving inclusive growth and the greening of economies. Underlying the increasing pressure for new models of TVET provision is the rapid pace of

technological change, demand for a work force which is highly responsive to evolving needs and a transforming market place that calls for higher order skills and lifelong learning. The book includes contributions from leading policy makers, researchers, and practitioners, including those in the private sector in analyzing and forecasting the most urgent priorities in skills development. The book argues for creative approaches to TVET design and delivery particularly with a view to improve job prospects, and meeting the goals of inclusion, sustainable development and social cohesion. Addressing issues such as the chronic mismatches between skills acquired and actual skills required in the work place, the volume proposes diversified approaches towards workforce development and partnerships with the private sector to improve the quality and relevance of skills development. The new imperatives created by 'greening' economies and responses required in skills development and training are addressed. Developing TVET is a high priority for governments in the Asia Pacific region as they seek to achieve long-term sustainable growth since the continued success of their economic destinies depend on it.
