social work pdf resources: Gerontological Social Work in Action Wendy Hulko, Shari Brotman, Louise Stern, Ilyan Ferrer, 2019-12-06 Gerontological Social Work in Action introduces anti-oppression gerontology (AOG), a critical approach to social work with older adults, their families, and communities. It pays attention to issues, realities, and contexts that are largely absent in social work education and gerontological practice, including important developments in our understanding of age/ism; theories of aging and social work; sites and sectors of health and social care; managing risk and frailty; moral, ethical and legal questions about aging including medical assistance in dying; caregiving; dementia and citizenship; trauma; and much more. This textbook should be considered essential reading for social work students new to or seeking to specialize in aging, as well as those

interested in the application of anti-oppressive principles to working with older adults and researching later life.

social work pdf resources: Social Work, Parents and the Child Protection Process Katrin Bain, John Harris, 2024-10-18 Despite the pivotal role played by parents in the child protection process, little attention has been paid to how social workers perceive them. Exploring representations of parents within Children's Services – at the levels of policy, organisation and frontline practice – the concept of citizenship is used to construct a typology with ten variants of parent-citizenship. The typology reveals the complexities of parental representations and their relationship to the content of policy, organisational environments and dominant societal themes, as it uncovers how social workers represent parents in their day-to-day practice. The book is a resource that can be used by students, practitioners, researchers and parent advocacy organisations to evaluate policy and practice and to contribute to the search for the best possible outcomes for families. Arguing that parental participation in the child protection process is essential, the book increases the visibility of parents and contributes to a much-needed dialogue about working with parents in Children's Services.

social work pdf resources: Abolition in Social Work and Human Services Ian Kelvin Hyslop, Bob Pease, 2025-09-11 Globally, social workers are committed to human rights and challenging unjust social structures. However, their close ties to the state often reinforce such systems of oppression. The first to apply abolitionist theory from international perspectives to social work, this book examines this contradiction, exploring whether social work can embrace radical change while operating within state structures. Bringing together scholars from the United States, Canada, England, Ireland, Scotland, Finland, Australia and Aotearoa New Zealand, it explores alternatives for addressing issues such as child protection, mental health, violence against women, drug use, violent extremism, homelessness and Indigenous sovereignty. Essential reading for academics, researchers, students, human service practitioners and social activists, this book interrogates the implications of social work's complicity with systems that perpetuate oppression and social injustice.

social work pdf resources: The Handbook of Social Work and Social Development in Africa Mel Gray, 2016-10-26 All recent books on international social work mention Africa only briefly and few engage with the broader field of development studies. This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge. Unlike most academic works, this book highlights multiple practitioner voices, with authors or co-authors that have recently been or are currently practising social workers. As an edited book, it draws from both academic research as well as lived practice experience, supported by strong theoretical positioning

and guidance in introductory chapters, drawing on African literature, wherever possible. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities; mental health; and mainstream services targeting women as well as emerging areas of developmental social work practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective.

The first edition of this volume mapped the field of child welfare after ASFA's passage, detailing the practices, policies, programs, and research affected by the legislation's new attitude toward care. This second edition highlights the continuously changing child welfare climate in the U.S., including content on the Fostering Connections Act of 2008. The authors have updated the text throughout, drawing from real-world case examples and data obtained from the national Child and Family Services Reviews and emerging empirically based practices. Recognized scholars, practitioners, and policy makers discuss meaningful engagement with families, particularly Latino families; health care for children and youth, including mental health care; effective practices with LGBT youth and their families; placement stability; foster parent recruitment and retention; and the challenges of working with immigrant children, youth, and families.

Millsap, 2019-04-25 Market process theory illustrates how the market is the most effective institution for overcoming the knowledge problem. Specifically, the institutional characteristics of private property, monetary prices, and the disciplining mechanisms of profit and loss, guide actors to utilize knowledge dispersed among society, to allocate resources effectively, and to adjust their behavior when errors occur to provide valuable goods and services to society. The chapters in this manuscript explore, through applications to issues within the United States and internationally, contemporary issues in public policy through the theoretical framework of knowledge problems and market process economics. Utilizing this approach, as well as other fundamental insights from economics, these chapters aim to illustrate how individuals in society address pressing public issues, the problems faced by policymakers, and the potential for novel solutions to policy challenges. Authored by individuals from a variety of disciplines with interests in public policy, this work includes discussions of education, child welfare, urban planning, and U.S. healthcare policy, as well as topics in e-commerce, the Global War on Terror, international trade, and economic development.
