social justice publications: Handbook of Research on Solutions for Equity and Social Justice in Education Etim, James, Etim, Alice, 2023-03-02 Education's role should further social justice, prepare students to compete for higher social positions, train workers, and engage students so that they become active participants in a democratic society. However, as with many global systems, education has long ago fallen victim to the institutional ailments of systematic oppression and discrimination. It further discusses these issues in a global context. Covering topics such as agentic empowerment, social justice in dialogue, and teacher social justice advocacy, this major reference work is a critical resource for faculty and administrators of both K-12 and higher education, preservice teachers, teacher educators, school social workers and counselors, librarians, government officials, researchers, and academicians.

social justice publications: The SoJo Journal Brad J. Porfilio, 2015-11-01 The SoJo Journal: Educational Foundations and Social Justice Education is an international peer-reviewed journal of educational foundations. The Department of Educational Leadership at California State University, East Bay, whose mission is to prepare and influence bold, socially responsible leaders who will transform the world of schooling, hosts the journal. It publishes essays that examine contemporary educational and social contexts and practices from critical perspectives. The SoJo Journal: Educational Foundations and Social Justice Education is interested in research studies as well as conceptual, theoretical, philosophical, and policy analysis essays that advance educational practices that challenge the existing state of affairs in society, schools, and (in)formal education. The SoJo Journal: Educational Foundations and Social Justice Education is necessary because currently there is not an exclusively international, Foundations of Education journal. This journal is also unique because it will bring together scholars and practitioners from disciplines outside of Educational Foundations, who are equally committed to social change and promoting equity and social justice inside and outside of K-16 schools.

social justice publications: Educational Leadership and Music Terri N. Watson, Jeffrey S. Brooks, Floyd D. Beachum, 2017-04-01 In this book we considered new territory for educational

leadership by looking to music for lessons and inspiration that may inform the next generation of schools leaders. Each chapter focuses on an artist or group whose work serves to refine, extend, and challenge our thinking in regards to educational leadership. You will find a vast array of musical forms of expression analyzed and described by an equally diverse collection of educational leadership scholars and practitioners. There may be some who question the academic appropriateness or relevance of a text such as this one. Our response is that part of our ongoing mission should be to break ourselves out of academic silos and forge meaningful connections between seemingly disparate disciplines. Furthermore, educational leadership stands to gain more by drawing from the arts and specifically musical influences. Finally, music is an obvious part of most of our lives; why not explore the ways in which it impacts us on an academic level and not just a personal level? In sum, we ask that as you read the chapters of this book, you reflect on your own musical tastes and favorite artists.

The volume emphasizes theoretical and historical foundations of critical service-learning, pressing questions facing the field, exploration of outcomes of, and ongoing challenges for the pedagogy, and design features and larger scale models of critical service-learning that can be implemented across the educational landscape of elementary, secondary, and higher education. **ENDORSEMENTS:** This volume in the *Advances in Service-Learning Research* series does not disappoint. Emily Nemeth and Ashley Patterson have amassed an amazing team of authors who take readers on a rewarding journey across diverse cultural communities and educational contexts, revealing the limitations of traditional service-learning approaches in addressing issues of racial injustice. Readers of this volume will gain a greater understanding of the rapidly evolving and maturing nature of higher education service-learning pedagogy and the need to adopt more critical perspectives in the study and practice of service-learning. — Andrew Furco, University of Minnesota

Pursuit of Liberation, conceived and written during tumultuous times in the United States, offers hope for the possibility of social justice and liberation in educational spaces. The modern-day brutal lynching of George Floyd, an African American man by a white police officer, and the COVID-19 pandemic revealed the horridness and inhumanity of a country that advertises itself as a beacon of equity and inclusion. This volume is a reminder that social justice and liberation require vigilance. The editors, Professors Nemeth and Patterson, persuade us to understand that the work of inclusion and liberation in education is complex, multidisciplinary, continuous, and iterative. Most importantly, they convincingly assert that communities and educational institutions need to take bold steps toward a more just, hopeful, and loving world through critical service learning. — Shirley Mthethwa-Sommers, University of Mpumalanga

Romano, 2012-12-20 This second book in the *Prevention Practice Kit* provides counselors, psychologists, and other mental health workers with practical steps that need to be considered by prevention practitioners as they engage with others in developing and delivering prevention projects. social justice publications: *Earth First!* Martha F. Lee, 1995-11-01 In the summer of 1980, Dave Foreman, along with four conservationist colleagues, founded the millenarian movement Earth First!. A provocative counterculture that ultimately hoped for the fall of industrial civilization, the movement emerged in response to rapid commercial development of the American wilderness. "The earth should come first" was a doctrine that championed both biocentrism (an emphasis on maintaining the earth's full complement of species) and biocentric equality (the belief that all species are equal). Martha Lee was successful in gaining extraordinary access to information about the movement, as well as interviews with its members. While following Earth First's development and methods, she illustrates the inherent instability and the dangers associated with all millenarian movements. This book will be of interest to environmentalists and those interested in political science and sociology.
