student life choices worksheet pdf: Re-thinking Mobility Poverty Tobias Kuttler, Massimo Moraglio, 2020-12-17 This book seeks to better conceptualise and define mobility poverty, addressing both its geographies and socio-economic landscapes. It moves beyond the analysis of 'transport poverty' and innovatively explores mobility inequalities and social construction of mobility disadvantages. The debate on mobility poverty is gaining momentum due to its role in triggering social exclusion and economic deprivation. In this light, this book examines the social construction of mobility poverty by delving into mobility patterns and needs as they are differently experienced by social groups in different geographical situations. It considers factors such as the role of transport regimes and their social value when analysing the social construction of individual's mobility needs. Furthermore, the gaps between articulated and unarticulated needs are identified by observing actual travel patterns of individuals. The book offers a comparison of the global phenomenon through fieldwork conducted in six different European countries - Greece, Portugal, Italy, Luxembourg, Romania and Germany. This book will be useful reading for planners, sociologists, geographers, mobility/transport researchers, mobility advocates, policy-makers and transport practitioners. The Open Access version of this book, available at <https://doi.org/10.4324/9780367333317>, has been made available under a Creative Commons Attribution 4.0 license.

Through a systematic approach to teaching and evaluating values and character education, this book bridges the gap between theory and practice. It offers empirical evidence and strategies to show how values and character can be internalized, through carefully designed experiences, active participation, and regular reinforcement, without compromising the time needed to learn sports skills - a common concern raised by PE teachers and sports coaches. Results from case studies have also revealed that values can be transferred beyond the context of physical education lessons and sports through a collaborative approach and effective communication between teachers, coaches, and parents. Key strategies based on empirical evidence are highlighted in this book. It also highlights an Asian perspective on values and life skills training through Physical Education and provides readers with step-by-step implementation guidelines to simplify some complex strategies in developing values and life skills through PES seamlessly. The book provides useful information to anyone engaged in developing young people in, and through, sport. In particular it will be of great value to pre-service and in-service teachers and coaches for implementing effective strategies to balance teaching sports skills, values, and life skills effectively in PES.
