streaming classical music online: Musik im Web 2.0 Peter Epting, 2013 In der elementaren Ästhetik des Webs 2.0 spielt Vergnügen und das Spiel mit Fiktion und Realität eine wichtige Rolle. In den Anfangsjahren des Webs 2.0 wurde die inhaltlich und technisch eingeschränkte Qualität der Inhalte zum ästhetischen Konzept erhoben. Mit den ständig verbesserten technischen Möglichkeiten wuchsen auch die Ansprüche an Inhalte und Gestaltung. Die Arbeit zeigt, dass bei der Produktion von Musik für das Web 2.0 vor allem verarbeitende Verfahren genutzt werden. Dabei werden sowohl die Inhalte als auch die Verarbeitungsverfahren ständig weiterentwickelt und neu kombiniert. Die teilweise selbstorganisierte Zusammenarbeit der Nutzer zur Schaffung von Inhalten kann gemeinsam mit den Auswahlalgorithmen der Plattformen als technisch gestützte kollektive Kreativität interpretiert werden. Ausserdem sind Ansätze für ein sich selbstständig entwickelndes semantisches Netz beobachtbar. Die unerschöpfliche Vielfalt an musikalischen Inhalten macht das Web 2.0 zu einer lohnenswerten Quelle für die Musikwissenschaft. Als die musikalische Lebenswelt der heutigen Jugend lädt es Musikpädagogen und Lehrer zu einer intensiven Erkundung und produktiven Nutzung ein. Für beide Bereiche, aber auch für alle anderen musikalisch Interessierten, bietet das Buch einen guten Einstieg in die musikalische Welt des Webs 2.0.

streaming classical music online: The Music Sound Nicolae Sfetcu, 2014-05-07 A guide for music: compositions, events, forms, genres, groups, history, industry, instruments, language, live music, musicians, songs, musicology, techniques, terminology , theory, music video. Music is a human activity which involves structured and audible sounds, which is used for artistic or aesthetic, entertainment, or ceremonial purposes. The traditional or classical European aspects of music often listed are those elements given primacy in European-influenced classical music: melody, harmony, rhythm, tone color/timbre, and form. A more comprehensive list is given by stating the aspects of

sound: pitch, timbre, loudness, and duration. Common terms used to discuss particular pieces include melody, which is a succession of notes heard as some sort of unit; chord, which is a simultaneity of notes heard as some sort of unit; chord progression, which is a succession of chords (simultaneity succession); harmony, which is the relationship between two or more pitches; counterpoint, which is the simultaneity and organization of different melodies; and rhythm, which is the organization of the durational aspects of music.

streaming classical music online: Peer-to-Peer Video Eli M. Noam, Lorenzo Maria Pupillo, 2008-09-05 Peer-to-Peer (P2P) networks are comprised of equal “nodes” that function as both clients and servers, as opposed to systems in which data and information are managed through centralized servers. The implications of this architecture go far beyond the technological realm; the ability of individuals to share digital content files, including audio and video material, in real time, facilitates communication and, at a deeper cultural level, promotes community without hierarchy or strict control. As Eli Noam, Lorenzo Pupillo, and their colleagues demonstrate in this timely and incisive volume, P2P has permeated all facets of society, from YouTube and music downloading experiments on college campuses to international policy debates over intellectual property rights. Peer-to-Peer Video is the first book to apply economic principles to analyze and understand the P2P phenomenon, considering such topics as “consumer demand and the commons” and “file sharing and the copyright crisis.” Moreover, the authors, who include scholars, consultants, and industry executives, provide numerous contemporary examples from the U.S. and around the world to shed light on the implications of P2P as a mass medium, considering such issues as pricing, licensing, security, and regulation. The result is provocative commentary on a slice of popular culture that will interest scholars and students, policymakers, media industry professionals, and general readers alike.

streaming classical music online: *On Counter-Enlightenment, Existential Irony, and Sanctification* Judah Matras, 2021-12-14 This book introduces the topics of Enlightenment, Counter-Enlightenment, and social demography in Western art musics and demonstrates their historical and sociological importance. The essays in this book explore the concepts of "existential irony" and "sanctification," which have been mentioned or discussed by music scholars, historians, and musicologists only either in connection with specific composers' works (Shostakovich's, in the case of "existential irony") or very parenthetically, merely in passing in the biographies of composers of "classical" musics. This groundbreaking work illustrates their generality and sociological sources and correlates in contemporary Western art musics.

streaming classical music online: *Popular Music in a Digital Music Economy* Tim Anderson, 2013-12-17 In the late 1990s, the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments, dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience, the end user, and their productive and distributive capacities around which services and musicians must orient their practices and investments.
