streaming black gay content: *Mainstreaming Gays* Eve Ng, 2023-09-15 *Mainstreaming Gays* discusses a key transitional period linking the eras of legacy and streaming, analyzing how queer

production and interaction that had earlier occurred outside the mainstream was transformed by multiple converging trends: the emergence of digital media, the rising influence of fan cultures, and increasing interest in LGBTQ content within commercial media. The U.S. networks Bravo and Logo broke new ground in the early 2000s and 2010s with their channel programming, as well as bringing in a new cohort of LGBTQ digital content creators, providing unprecedented opportunities for independent queer producers, and hosting distinctive spaces for queer interaction online centered on pop culture and politics rather than dating. These developments constituted the ground from which recent developments for LGBTQ content and queer sociality online have emerged. *Mainstreaming Gays* is critical reading for those interested in media production, fandom, subcultures, and LGBTQ digital media.

streaming black gay content: *Watching While Black Rebooted!* Beretta E. Smith-Shomade, 2023-11-10 *Watching While Black Rebooted: The Television and Digitality of Black Audiences* examines what watching while Black means within an expanded U.S. televisual landscape. In this edition, media scholars return to television and digital spaces (those spaces relying on television structure) to think anew about what engages and captures Black audiences and users and why it matters.

streaming black gay content: *Learning While Black and Queer* Ed Brockenbrough, 2024-07-08 Research-based guidance for educators, teacher educators, and community learning partners to effectively support LGBTQ+ students of color

streaming black gay content: *LGBTQ Film Festivals* Antoine Damiens, 2025-10-01 While scholars have theorized major film festivals, they have ignored smaller, ephemeral, events. In taking seriously minor European and North-American LGBTQ festivals which often only exist as traces within archival collections, this book revisits festival studies' methodological and theoretical apparatuses. As the first 'critique' of festival studies from within, *LGBTQ Film Festivals* argues that both festivals and queer film cultures are by definition ephemeral. The book is organized around two concepts: First, 'critical festival studies' examines the political project and disciplinary assumptions that structure festival research. Second, 'the festival as a method' pays attention to festivals' role as producers of knowledge: it argues that festivals are not mere objects of research but also actors already shaping academic, industrial, and popular cinematic knowledge. Drawing on the author's experience on the festival circuit, this book pays homage to the labour of queer organizers, critics, and scholars and opens up new avenues for festival research.

streaming black gay content: *Post Black* Ytasha L. Womack, Derek T. Dingle, 2010-01-01 As a young journalist covering black life at large, author Ytasha L. Womack was caught unaware when she found herself straddling black culture's rarely acknowledged generation gaps and cultural divides. Traditional images show blacks unified culturally, politically, and socially, united by race at venues such as churches and community meetings. But in the "post black" era, even though individuals define themselves first as black, they do not necessarily define themselves by tradition as much as by personal interests, points of view, and lifestyle. In *Post Black: How a New Generation Is Redefining African American Identity*, Womack takes a fresh look at dynamics shaping the lives of contemporary African Americans. Although grateful to generations that have paved the way, many cannot relate to the rhetoric of pundits who speak as ambassadors of black life any more than they see themselves in exaggerated hip-hop images. Combining interviews, opinions of experts, and extensive research, *Post Black* will open the eyes of some, validate the lives of others, and provide a realistic picture of the expanding community.

A compelling compilation of artists' statements and critical theory, producer interviews and image-text works, this anthology demonstrates the vitality of queer artists under attack and fighting back. Each maker and writer deploys a surprising array of techniques and tactics, negotiating the difficult terrain between street pragmatism and theoretical inquiry, finding voices rich inchutzpah and subtlety. From

guerilla Super-8 in Manila to AIDS video activism in New York, Queer Looks zooms in on this very queer place in media culture, revealing a wealth of strategies, a plurality of aesthetics, and an artillery of resistances.

streaming black gay content: Feminism, Multiculturalism, and the Media Angharad N. Valdivia, 1995-09-27 This groundbreaking collection explores the intersecting variables of groups marginalized by the media. Contributors examine gender, race, class, sexual orientation, geography, and ethnicity in relation to feminist multicultural issues. . . . Highly recommended for students of feminism, multiculturalism, cultural studies, communication theory, and media analysis. --Choice Most of the world's women experience multiple forms of oppression, yet few communication scholars have prioritized this profound reality. Professor Valdivia's collection examining feminism, multiculturalism, and the media is a welcome text for courses on women, minorities, and communication, plus an excellent resource for many other courses concerned with issues of diversity. --H. Leslie Steeves, University of Oregon Many contributors illustrate contradictions in multicultural and feminist media perspectives. These embrace more than feminist analysis: They illustrate how gender, race, class, and ethnicity affect media coverage and reception, providing theoretical approaches to analyzing media coverage. --The Bookwatch The multiplicity of voices in this volume illustrates the contradictions inherent in multicultural and feminist perspectives on the media. Feminism, Multiculturalism, and the Media breaks new ground by exploring intersecting variables of oppression, from the personal to the political. The volume begins with feminist analyses but uncovers marginalized others in every area. These compelling case studies illustrate how issues of gender, race, class, sexual orientation, global origin, and ethnicity affect the coverage, portrayal, media production, and reception of every human being. The chapters present theoretical perspectives, provide examples of methodologies, focus on topics of current interest and global relevance, and represent a variety of media. An essential addition for any individual or classroom interested in critical perspectives on media, especially for courses on women in the media and minorities and the media.

streaming black gay content: Television by Stream Christina Adamou, Sotiris Petridis, 2023-05-22 Online television streaming has radically changed the ways in which programs are produced, disseminated and watched. streaming black gay content: Queer Media Images Theresa Carilli, Jane Campbell, 2013-05-16 Queer Media Images: LGBT Perspectives presents fifteen chapters that address how the gay, lesbian, bisexual, and transgendered communities are depicted in the media. This collection focuses on how the LGBT community has been silenced or given voice through the media. Through a study of queer media images, this book scrutinizes LGBT media representations and how these representations contribute to a dialogue about civil rights for this marginalized community. While the communication discipline has been open to the LGBT community, there has been an absence of published research and a marginalizing or tokenizing of the queer voice. Through a study of media representations, this unique collection provides a snapshot into the issues surrounding LGBT identity during a time when the Defense of Marriage Act is called into question and explores what it means to study images through a queer lens.

streaming black gay content: Adaptation Online Lyndsay Michalik Gratch, 2017-09-05 Adaptation Online: Creating Memes, Sweding Movies, and other Digital Performances explores how traditional notions of the processes and products of creative adaptation are evolving online. This book offers a glossary of strategies for online adaptation that is useful not only for scholars in performance studies, but also for scholars of cinema, communications, and new media studies.

streaming black gay content: Queer Race Ian Barnard, 2004 One of the first extended and theoretically informed investigations of queer theory's racial inscription, *Queer Race* understands race as inextricably sexualized, as sexuality is always racially marked. The book critically and playfully explores intellectual and political deployments of the term «queer», gay pornographic videos about South Africa, contemporary literary representations of interracial gay desire, the writings of Gloria Anzaldúa, and Jeffrey Dahmer's criminal trial. Through these explorations, *Queer Race* charts a framework for understanding the «race» of queer theory that both tests queer theory's limits and suggests its future inter-relations with anti-racist work.
