seagull edition history download: Blood Letters Lian Xi, 2018-03-20 The staggering story of the most important Chinese political dissident of the Mao era, a devout Christian who was imprisoned, tortured, and executed by the regime Blood Letters tells the astonishing tale of Lin Zhao, a poet and journalist arrested by the authorities in 1960 and executed eight years later, at the height of the Cultural Revolution. The only Chinese citizen known to have openly and steadfastly opposed communism under Mao, she rooted her dissent in her Christian faith -- and expressed it in long, prophetic writings done in her own blood, and at times on her clothes and on cloth torn from her bedsheets. Miraculously, Lin Zhao's prison writings survived, though they have only recently come to light. Drawing on these works and others from the years before her arrest, as well as interviews with her friends, her classmates, and other former political prisoners, Lian Xi paints an indelible portrait of courage and faith in the face of unrelenting evil.

seagull edition history download: The Ancient Indus Valley Jane R. McIntosh, 2007-11-12 This work is a revealing study of the enigmatic Indus civilization and how a rich repertoire of archaeological tools is being used to probe its puzzles. The Ancient Indus Valley: New Perspectives takes readers back to a civilization as complex as its contemporaries in Mesopotamia and Egypt, one that covered a far larger region, yet lasted a much briefer time (less than a millennium) and left few visible traces. Researchers have tentatively reconstructed a model of Indus life based on limited material remains and despite its virtually indecipherable written record. This volume describes what is known about the roots of Indus civilization in farming culture, as well as its far-flung trading network, sophisticated crafts and architecture, and surprisingly war-free way of life. Readers will get a glimpse of both a remarkable piece of the past and the extraordinary methods that have brought it back to life.

seagull edition history download: *Inventorying Cultural Heritage Collections* Sandra Vanderwarf, Bethany Romanowski, 2022-03-14 This two-part text opens with an argument few collections practitioners would contest: Regular inventories are central to meaningful, sustainable, and ethical collections preservation and access. But Vanderwarf and Romanowski argue that in practice—some 25 years working with diverse collections between them—inventories are uncommon: instead of functioning as a commonplace feature of collections care, they tend to be evoked as a last resort when a museum has lost control of its collection. Part I offers a flexible project management framework that illustrates strategies for reining in control of collections now. From identifying objectives that best serve the collection in question to securing stakeholder support and planning time and resources, Part I eliminates some guesswork around what may be an unprecedented and intensive project. To maintain the benefits of a project-style inventory, the authors then encourage practitioners to embrace inventory as an ongoing, evolving collections care function that reflects changing professional values and expectations from the communities museums serve. By centering computerized databases, barcoding, and digital collections, the authors further acknowledge these technologies as permanent, evolving features of collections and inventory practice that merit increased resourcing. Part II gives voice to practitioners around the world through case studies that affirm the vital role of inventories in regaining control of collections. Some of these inventories occurred during the course of everyday work, while others were responses to natural disasters and armed conflict. Still others may be seen as expressions of social justice. As much as the authors offer a guide to performing inventories, thereby filling a longstanding gap in the literature, they invite cultural heritage institutions to rethink how the stories held in collections can be better told and preserved through enhanced inventory practice. The book will benefit

seasoned museum collections practitioners as well as those who lack access to formal museology education and training. The book targets stewards of cultural heritage and material culture collections with varying resources

seagull edition history download: The Postcolonial Animal Evan Mwangi, 2019-09-06

Despite the central role that animals play in African writing and daily life, African literature and African thinkers remain conspicuously absent from the field of animal studies. *The Postcolonial Animal: African Literature and Posthuman Ethics* demonstrates the importance of African writing to animal studies by analyzing how postcolonial African writing—including folktales, religion, philosophy, and anticolonial movements—has been mobilized to call for humane treatment of nonhuman others. Mwangi illustrates how African authors grapple with the possibility of an alternative to eating meat, and how they present postcolonial animal-consuming cultures as shifting toward an embrace of cultural and political practices that avoid the use of animals and minimize animal suffering. *The Postcolonial Animal* analyzes texts that imagine a world where animals are not abused or used as a source of food, clothing, or labor, and that offer instruction in how we might act responsibly and how we should relate to others—both human and nonhuman—in order to ensure a world free of oppression. The result is an equitable world where even those who are utterly foreign to us are accorded respect and where we recognize the rights of all marginalized groups.
