stone bloods history: Stone Jeffrey Jerome Cohen, 2015-05-06 Stone maps the force, vivacity, and stories within our most mundane matter, stone. For too long stone has served as an unexamined metaphor for the “really real”: blunt factuality, nature's curt rebuke. Yet, medieval writers knew that stones drop with fire from the sky, emerge through the subterranean lovemaking of the elements, tumble along riverbeds from Eden, partner with the masons who build worlds with them. Such motion suggests an ecological enmeshment and an almost creaturely mineral life. Although geological time can leave us reeling, Jeffrey Jerome Cohen argues that stone's endurance is also an invitation to apprehend the world in other than human terms. Never truly inert, stone poses a profound challenge to modernity's disenchantments. Its agency undermines the human desire to be separate from the environment, a bifurcation that renders nature “out there,” a mere resource for recreation, consumption, and exploitation. Written with great verve and elegance, this pioneering

work is notable not only for interweaving the medieval and the modern but also as a major contribution to ecotheory. Comprising chapters organized by concept —“Geophilia,” “Time,” “Force,” and “Soul”—Cohen seamlessly brings together a wide range of topics including stone’s potential to transport humans into nonanthropocentric scales of place and time, the “petrification” of certain cultures, the messages fossils bear, the architecture of Bordeaux and Montparnasse, Yucca Mountain and nuclear waste disposal, the ability of stone to communicate across millennia in structures like Stonehenge, and debates over whether stones reproduce and have souls. Showing that what is often assumed to be the most lifeless of substances is, in its own time, restless and forever in motion, Stone fittingly concludes by taking us to Iceland—a land that, writes the author, “reminds us that stone like water is alive, that stone like water is transient.”

Marie Drews, Verena Theile, 2009-05-05 *Reclaiming Home, Remembering Motherhood, Rewriting History: African American and Afro-Caribbean Women's Literature in the Twentieth Century* offers a critical valuation of literature composed by black female writers and examines their projects of reclamation, rememory, and revision. As a collection, it engages black women writers' efforts to create more inclusive conceptualizations of community, gender, and history, conceptualizations that take into account alternate lived and written experiences as well as imagined futures. Contributors to this collection probe the realms of gender studies, postcolonialism, and post-structural theory and suggest important ways in which to explore connections between home, motherhood, and history across the multifarious narratives of African American and Afro-Caribbean experiences. Together they argue that it is through their female characters that black women writers demonstrate the tumultuous processes of deciphering home and homeland, of articulating the complexities of mothering relationships, and of locating their own personal history within local and national narratives. Essays gathered in this collection consider the works of African American women writers (Pauline Hopkins, Toni Morrison, Jessie Redmon Fauset, Audre Lorde, Lalita Tademy, Lorene Cary, Octavia Butler, Zora Neale Hurston, and Sherley Anne Williams) alongside the works of black women writers from the Caribbean (Jamaica Kincaid and Gisèle Pineau), Guyana (Grace Nichols), and Cuba (María de los Reyes Castillo Bueno).

They have found and demonstrated that there is virtually no historical, social, or demographic change in which women have not been involved and by which their lives have not been affected. *The Oxford Encyclopedia of Women in World History* benefits greatly from these efforts and experiences, and illuminates how women worldwide have influenced and been influenced by these historical, social, and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use.
