

sinology research materials

sinology research materials are the cornerstone for anyone delving into the academic study of Chinese history, language, literature, philosophy, and culture. Whether you are a seasoned researcher or a curious student, understanding the vast types and sources of sinology research materials is essential for effective scholarship. This article provides a comprehensive guide, covering the definition and scope of sinology, exploring key types of research materials, and offering practical advice on accessing and utilizing primary and secondary sources. We will also examine digital resources, libraries, and archives, along with emerging trends in the field. By the end, readers will be equipped with the knowledge to navigate the world of sinology research materials efficiently and confidently.

- Conclusion

Definition and Scope of Sinology Research Materials

Sinology refers to the systematic study of Chinese civilization, encompassing language, literature, history, philosophy, and culture. Sinology research materials are the resources scholars use to investigate, analyze, and interpret various aspects of China's past and present. These materials include ancient manuscripts, government documents, literary texts, archaeological reports, and contemporary academic studies. The scope is broad, ranging from classical texts and historical records to modern digital data and multimedia archives. Understanding the definition and breadth of sinology research materials is vital for anyone aiming to conduct thorough and credible research in the field.

Sinology is interdisciplinary by nature, drawing on linguistics, anthropology, history, art, sociology, and political science. As such, sinology research materials vary widely in format, language, and medium. From bamboo slips and oracle bones to digitized newspapers and ethnographic interviews, the diversity of resources reflects the richness of Chinese civilization and the complexity of its study. Familiarity with the different categories and their uses is key for effective research outcomes.

Main Types of Sinology Research Materials

Sinology research materials can be broadly categorized based on their origin, format, and purpose. Each type serves a unique role in supporting a comprehensive understanding of China's historical and contemporary developments. The following list outlines the main types of sinology research materials commonly used by scholars and students.

- Primary sources: Original texts and artifacts from historical periods
- Secondary sources: Scholarly analysis, interpretation, and commentary
- Reference works: Dictionaries, encyclopedias, and bibliographies
- Archival materials: Unpublished documents, letters, and manuscripts
- Digital resources: Online databases, e-books, and multimedia collections
- Epigraphic and archaeological materials: Inscriptions, pottery, tombs
- Visual and audio materials: Maps, photographs, recordings, films

Each category provides unique insights and serves specific research purposes. Effective sinological research often involves integrating multiple types of materials for cross-disciplinary analysis and richer interpretation.

Primary Sources in Sinology

Primary sources are the foundation of sinology research, offering direct evidence from the period under study. These materials include ancient texts, inscriptions, government records, artifacts, and personal documents that have survived through centuries of change. The authenticity and originality of primary sources make them invaluable for reconstructing China's historical narrative.

Ancient Texts and Manuscripts

Classical Chinese texts, such as the "Shiji" (Records of the Grand Historian), "Lunyu" (Analects of Confucius), and Daoist writings, are primary materials that shed light on philosophical, political, and social developments. Manuscripts preserved in caves, tombs, and libraries—like the Dunhuang manuscripts—offer rare insights into religious practices and daily life.

Epigraphic Materials and Archaeological Finds

Inscriptions on oracle bones, bronze vessels, and stone steles provide data about language evolution, rituals, and dynastic changes. Archaeological discoveries—pottery, coins, and funerary objects—help reconstruct the material culture of ancient China, supplementing textual sources with tangible evidence.

Historical Records and Official Documents

Imperial edicts, census registers, and administrative reports are crucial for understanding governance, population trends, and policy changes. These government documents, often preserved in archives and libraries, serve as primary reference points for historical research.

Secondary Sources and Scholarly Publications

Secondary sources interpret, analyze, and contextualize primary materials. They include academic books, peer-reviewed journal articles, conference proceedings, and critical essays. Secondary literature is essential for gaining a broader perspective, understanding scholarly debates, and identifying gaps in existing research.

Academic Monographs and Edited Volumes

Books written by leading sinologists provide comprehensive overviews of specific topics such as dynastic history, Chinese philosophy, or literature. Edited volumes bring together multiple viewpoints, offering comparative and interdisciplinary analyses.

Journal Articles and Reviews

Articles published in journals like "T'oung Pao" and "Harvard Journal of Asiatic Studies" present new research findings, theoretical approaches, and methodological innovations. Reviews of recent publications keep researchers updated on the latest developments in the field.

Reference Works and Bibliographies

Dictionaries, encyclopedias, and bibliographies help researchers locate primary and secondary sources, understand technical terminology, and build effective research strategies. These tools are indispensable for both novice and experienced sinologists.

Digital Resources and Databases for Sinology

With the digitization of research materials, access to sinology resources has expanded dramatically. Digital databases, online archives, and electronic publications are transforming how scholars conduct research, collaborate, and share findings.

Major Sinology Databases

Online platforms like the Chinese Text Project, Scripta Sinica, and China Academic Journals Full-text Database provide comprehensive access to classical texts, manuscripts, and modern scholarship. These databases offer

advanced search functions, cross-referencing, and downloadable content, making research more efficient.

E-books and Multimedia Collections

Digital libraries and multimedia repositories house e-books, scanned manuscripts, audio recordings, and documentary films. These resources allow for interactive exploration of historical documents and cultural artifacts, enhancing the depth and breadth of sinological research.

Data Visualization and Analysis Tools

Emerging digital tools support the visualization and quantitative analysis of large textual corpora, enabling new methods in linguistic research and historical mapping. These innovations are reshaping the landscape of sinology research materials and methodologies.

Libraries, Archives, and Collections

Physical and institutional collections remain vital for accessing rare and original sinology research materials. Major libraries, archives, and museums around the world safeguard invaluable resources for scholars.

Leading Libraries for Sinology

National libraries in China, Taiwan, and Hong Kong, as well as university libraries with strong Asian studies collections, offer extensive holdings of Chinese texts, periodicals, and reference works. Some notable institutions include the National Library of China, the Institute of Oriental Manuscripts, and Harvard-Yenching Library.

Archival Collections and Special Repositories

Archival centers preserve unpublished manuscripts, private letters, government files, and rare books. These collections may require special permissions and are often catalogued with detailed finding aids to assist researchers.

Museums and Artifact Collections

Museums such as the Palace Museum in Beijing and the Shanghai Museum house artifacts, calligraphy, paintings, and archaeological finds that complement textual research. Accessing these collections can provide invaluable material evidence for sinological inquiry.

Current Trends and Challenges in Sinology

Research Materials

The field of sinology is evolving rapidly, with new trends and persistent challenges influencing access, interpretation, and preservation of research materials. Digital transformation, interdisciplinary approaches, and global collaboration are shaping the future of sinological studies.

Digitization and Open Access

Increasing digitization is making rare materials more widely available, fostering open access and democratizing research. However, digital divides and copyright restrictions may limit access for some researchers.

Language and Translation Issues

The diversity of Chinese dialects and classical language poses challenges for interpretation and translation. Ongoing efforts to produce accurate, annotated translations and glossaries are crucial for global scholarship.

Preservation and Conservation

Physical deterioration of manuscripts, books, and artifacts remains a concern. Preservation initiatives and international collaboration are essential to safeguard sinology research materials for future generations.

Interdisciplinary Collaboration

Sinology increasingly intersects with fields like digital humanities, archaeology, and sociology, prompting collaborative research and innovative methodologies. These trends are expanding the scope and relevance of sinological studies in the academic world.

Conclusion

Sinology research materials form the backbone of Chinese studies, offering diverse and invaluable resources for understanding the country's rich legacy and contemporary dynamics. By recognizing the types, sources, and evolving trends in sinology research materials, scholars and students can enhance the depth, credibility, and impact of their work in this fascinating field.

Q: What are the main types of sinology research materials?

A: The main types of sinology research materials include primary sources (such as ancient texts, inscriptions, and artifacts), secondary sources (academic books, journal articles, and reviews), reference works (dictionaries and encyclopedias), archival materials, digital resources, and visual/audio materials.

Q: Why are primary sources important in sinology research?

A: Primary sources provide direct evidence from historical periods, offering authentic insights into Chinese culture, language, politics, and society. They are essential for reconstructing accurate historical narratives and understanding original contexts.

Q: Where can researchers access digital sinology research materials?

A: Researchers can access digital sinology research materials through online databases, electronic libraries, and multimedia collections. Examples include the Chinese Text Project, Scripta Sinica, and China Academic Journals Full-text Database.

Q: What challenges do scholars face when using sinology research materials?

A: Challenges include language barriers, translation accuracy, limited access to certain archives or databases, physical deterioration of ancient materials, and copyright restrictions in the digital age.

Q: How have digital resources changed sinology research?

A: Digital resources have greatly improved access to sinology materials, allowing researchers to search, cross-reference, and analyze large collections efficiently. They also promote collaboration and open access to rare documents.

Q: What are some major libraries for sinology research?

A: Major libraries include the National Library of China, Harvard-Yenching Library, Institute of Oriental Manuscripts, and university libraries with specialized Asian studies collections.

Q: How do scholars verify the authenticity of sinology research materials?

A: Scholars verify authenticity through provenance documentation, expert analysis, cross-referencing with other sources, and scientific methods such as carbon dating for artifacts.

Q: What role do museums play in sinology research?

A: Museums preserve and display artifacts, calligraphy, paintings, and archaeological finds, providing material evidence that complements textual research and enriches understanding of Chinese civilization.

Q: What are current trends in sinology research materials?

A: Current trends include digitization, open access initiatives, interdisciplinary research, and the integration of data visualization and analysis tools.

Q: Why is interdisciplinary collaboration important in sinology?

A: Interdisciplinary collaboration allows sinologists to combine methodologies from history, linguistics, archaeology, digital humanities, and other fields, resulting in more comprehensive and innovative research outcomes.

sinology research materials: *A Study on the Influence of Ancient Chinese Cultural Classics Abroad in the Twentieth Century* Xiping Zhang, 2022-03-28 This book presents an extensive literary survey of the influence of ancient Chinese cultural classics around the globe, highlighting a mammoth research project involving over forty countries or regions and more than twenty languages. As the book reveals, ancient Chinese culture was introduced to East Asian countries or regions very early on; furthermore, after the late Ming Dynasty, Chinese “knowhow” and ideas increasingly made inroads into the West. In particular, the translation of and research on Chinese classics around the world have enabled Chinese culture to take root and blossom on an unprecedented scale. In addition to offering a valuable resource for readers interested in culture, the social sciences, and philosophy, the book blazes new trails for the study of ancient Chinese culture.

sinology research materials: Sinology during the Cold War Antonina Łuszczkiewicz, Michael Brose, 2022-05-19 This volume provides the first study of the history of sinology (aka China studies) as charted across several communist states during the Cold War. The People’s Republic of China was created in the first years of the Cold War, with its early history and foreign policy intimately bound up in that larger geopolitical fight. All the seismic changes in China’s geopolitical landscape—from its emergence and close relationship with the Soviet Union, to the Sino-Soviet split and the eventual rapprochement with the United States—resulted in a great deal of interest by journalists, politicians, and scholars. Yet, although scholars across the Soviet Bloc produced an impressive body of work on a range of sinological studies, with rare exceptions most of those scholars and their work remains unknown outside their own intellectual circles. This book redresses this dearth of knowledge of sinological scholarship, providing invaluable and unique glimpses of Soviet Bloc sinologists and their work during the Cold War, including cutting-edge research on lesser-studied communist states such as Poland, Hungary, Mongolia, and others. International in scope, this book is ideal for scholars and researchers of modern history, Chinese studies, sinology,

and the Cold War.

sinology research materials: Sinology in Post-Communist States Shih Chihyu, 2016-02-16 Selfknowledge is the foundation of sinology. Becoming a sinologist involves engaging in multisited processes that deconstruct stereotypical notions of China's rise in the 21st century. The sinologists in this edited volume have actively participated in studies shaped by their specific historical contexts, strategic choices and varied adaptations. Positioned in different sites, these agents respond in diverse ways to China's rise and identity.

sinology research materials: An Introduction to World China Studies Zhan Wang, Yanhong Chu, 2025-04-26 This book examines the seven key issues related to China, which have been identified by experts over the past few centuries. The topics addressed include China's impact on international discourse, the inheritance of Chinese civilization, the great divergence between Chinese and Western histories, Kondratiev Cycle Theory, the socialist system and its future prospects, the Chinese path to modernization, and the Belt and Road Initiative. The authors explore these issues within the broader context of human civilization and the evolving global landscape, offering systematic explanations for each topic and redefining the concepts of World China Studies.

sinology research materials: Collecting Research Materials on the Subject of Post-1949 Mainland China John T. Ma, 1971

sinology research materials: An American Pioneer of Chinese Studies in Cross-Cultural Perspective Man Shun Yeung, 2021-10-05 Benjamin Bowen Carter (1771-1831), one of the first Americans to speak and read Chinese, studied Chinese in Canton and advocated its use in diplomacy decades before America established a formal relationship with China. Drawing on rediscovered manuscripts, this book reconstructs Carter's multilingual learning experience, reveals how he helped translate a diplomatic document into Chinese, describes his interactions with European sinologists, and traces his attempts to convince the US government and American academics of the practical and cultural value of Chinese studies. The cross-cultural perspective employed in this book emphasizes the reciprocal dynamics of Carter's relationships with Chinese and European "others," while Carter's story itself forces a rewriting of the earliest years of US-China relations.

sinology research materials: Cultural Interaction Studies in East Asia Demin Tao, Fujita Takao, 2021-03-08 This volume tackles the unique scholarly challenges of Cultural Interaction Studies in an East Asian context. Leading experts in a variety of related fields - from religion and history to geography, language, literature, Sinology and Japanology - have contributed a total of 18 articles, collected under the following six rubrics: New Directions in Regional Studies, New Trends in Humanities Studies, Material Circulation and Cultural Transmission in East Asia, China's Experience of Cultural Interaction with the West, Transformation of Japanese Scholarship from Early Modern to Modern Times, and The Wisdom of Selective Adaptation and Constructive Dialog. Among the eight award-winning contributors, Ge Zhaoguang (1950-) has received critical acclaim for his *What is China? Territory, Ethnicity, Culture, and History* (2014), while Nakanishi Susumu (1929-) has been internationally recognized for his lifelong devotion to the study of ancient Japanese literature. Nakanishi's determination to inherit Prince Shotoku's spirit of peaceful coexistence with Japan's neighboring countries led him to propose the new era name Reiwa, which was officially adopted for use by the Emperor Naruhito upon his enthronement on May 1, 2019.

sinology research materials: Material Culture and Asian Religions Benjamin Fleming, Richard Mann, 2014-03-26 Traditionally, research on the history of Asian religions has been marked by a bias for literary evidence, privileging canonical texts penned in 'classical' languages. Not only has a focus on literary evidence shaped the dominant narratives about the religious histories of Asia, in both scholarship and popular culture, but it has contributed to the tendency to study different religious traditions in relative isolation from one another. Today, moreover, historical work is often based on modern textual editions and, increasingly, on electronic databases. What may be lost, in the process, is the visceral sense of the text as artifact - as a material object that formed part of a broader material culture, in which the boundaries between religious traditions were sometimes more fluid than canonical literature might suggest. This volume brings together specialists in a

variety of Asian cultures to discuss the methodological challenges involved in integrating material evidence for the reconstruction of the religious histories of South, Southeast, Central, and East Asia. By means of specific 'test cases,' the volume explores the importance of considering material and literary evidence in concert. What untold stories do these sources help us to recover? How might they push us to reevaluate historical narratives traditionally told from literary sources? By addressing these questions from the perspectives of different subfields and religious traditions, contributors map out the challenges involved in interpreting different types of data, assessing the problems of interpretation distinct to specific types of material evidence (e.g., coins, temple art, manuscripts, donative inscriptions) and considering the issues raised by the different patterns in the preservation of such evidence in different locales. Special attention is paid to newly-discovered and neglected sources; to our evidence for trade, migration, and inter-regional cultural exchange; and to geographical locales that served as contact zones connecting cultures. In addition, the chapters in this volume represent the rich range of religious traditions across Asia – including Hinduism, Buddhism, Taoism, Shinto, and Chinese religions, as well as Islam and eastern Christianities.

sinology research materials: Two English-Language Translators of Jin Ping Mei

Shuangjin Xiao, 2024-07-31 Two English-Language Translators of Jin Ping Mei examines English translations of the Ming novel Jin Ping Mei by translators from different historical periods within the Anglophone world. Drawing upon theoretical insights from translation studies, literary criticism, and cultural studies, the book explores the treatment of salient features of the novel in translation, including cultural representation, narratological elements, gender-specific motifs, and (homo)sexual themes. Through literary re-imagining and artistic re-creation, Egerton transforms a complex and sprawling narrative into a popular modern middlebrow novel, making it readily accessible within Western genres. Roy's interlinear and annotated translation transcends the mere retelling of a vivid story for its unwavering emphasis on every single detail of the original, becoming a portal to the Ming past. It stands as a testament to the significance of translation as a medium for understanding the legacy of the late Ming and the socio-cultural dynamics shaping that period in Chinese history. This book will be a useful reference for scholars and research students within the fields of literary translation studies and translated Chinese literature, particularly Ming- Qing fiction. The book will also appeal to students and researchers studying Jin Ping Mei's translation and reception in the West.

sinology research materials: A History of Western Appreciation of English-translated

Tang Poetry Lan Jiang, 2018-03-08 This book examines the development of English-translated Tang poetry and its propagation to the Western world. It consists of two parts, the first of which addresses the initial stage of English-translated Tang poetry's propagation, and the second exploring its further development. By analyzing the historical background and characteristics of these two stages, the book traces the trend back to its roots, discusses some well-known early sinologists and their contributions, and familiarizes readers with the general course of Tang poetry's development. In addition, it presents the translated versions of many Tang poems. The dissemination of Tang poetry to the Western world is a significant event in the history of cross-cultural communication. From the simple imitation of poetic techniques to the acceptance and identification of key poetic concepts, the Tang poetry translators gradually constructed a classic "Chinese style" in modern American poetry. Hence, the traditional Chinese culture represented by Tang poetry spread more widely in the English-speaking world, producing a more lasting impact on societies and cultures outside China – and demonstrating the poetry's ability to transcend the boundaries of time, region, nationality and culture. Due to different cultural backgrounds, the Tang poets or poems admired most by Western readers may not necessarily receive high acclaim in China. Sometimes language barriers and cultural differences make it impossible to represent certain allusions or cultural and ethnic concepts correctly during the translation process. However, in recent decades, the translation of Tang poetry has evolved considerably in both quantity and quality. As culture is manifested in language, and language is part of culture, the translation of Tang poetry has allowed Western scholars to gain an unprecedented understanding of China and Chinese culture.

sinology research materials: Sinologism Ming Dong Gu, 2013 Why, for centuries, have the West and the world continuously produced China knowledge that deviates from Chinese realities? Why, since the mid-nineteenth century, have Chinese intellectuals oscillated between commendation and condemnation of their own culture, and between fetishization and demonization of all things Western? And why have some of the world's wisest thinkers expressed opinions on Chinese culture, which are simply wrong? In order to answer these questions, this book explores the process of knowledge production about China and the Chinese civilization and in turn, provides a critique of the ways in which this knowledge is formed. Ming Dong Gu argues that the misperceptions and misinterpretations surrounding China and the Chinese civilisation do not simply come from misinformation, biases, prejudices, or political interference, but follow certain taken-for-granted principles that have evolved into a cultural unconscious. Indeed, Gu argues that the conflicting accounts in China-West studies are the inevitable outcome of this cultural unconscious which constitutes the inner logic of a comprehensive knowledge system which he terms 'Sinologism'. This book explores Sinologism's origin, development, characteristics, and inner logic, and critiques its manifestations in the writings of Chinese, Western, and non-Western thinkers and scholars, including Montesquieu, Herder, Hegel, Marx, Weber, Russell, Pound, Wang Guowei, Guo Moruo, Gu Jiegang, Wen Yiduo, and many others in diverse disciplines from arts and humanities to social sciences. In doing so, Gu demonstrates why the existing critical models are inadequate for Chinese materials and makes an attempt to construct an alternative theory to Orientalism and postcolonialism for China-West studies and cross-cultural studies. Sinologism crosses over the subjects of history, thought, literature, language, art, archaeology, religion, aesthetics and cultural theory, and will appeal to students and scholars of East-West studies with a particular focus on China, as well as those interested in cultural theory more broadly.

sinology research materials: Interdisciplinary Studies in Turkey Eyup Saritas, 2016-04-30 The information age facilitates life easier on the one hand and enables all to have access to any desired information in the shortest possible time. Scientific studies that are products of great efforts keep pace with globalism to a substantial extent, thanks to advanced technologies that shorten long distances. As scientists, we need to disregard negative impacts of globalism on all aspects of life and endeavour to make use of its positive effects. Consequently, as scientists that come up with good works after long and dedicated efforts, we need to cut off ties with locality in modern information age. As it will be seen, what is meant by locality is not scientists' working on local issues but addressing to a group limited to one's own country only. For instance, a scientific paper published in Turkey about a village or borough in Ankara might not easily exceed the narrow restriction of locality. Likewise, publishing in Dutch a scientific work on a historical or social problem in the city of Leiden would be hardly possible to provide scientifically influential conclusions.

sinology research materials: Researching China in Southeast Asia Ngeow Chow-Bing, 2019-03-26 This book maps out the state of China Studies in seven Southeast Asian countries from different perspectives. It looks at the history, current status, and characteristics of the study of China in Indonesia, the Philippines, Thailand, Vietnam, Malaysia, Singapore, and Myanmar, and what factors shaped the development and prospects of Sinology and Chinese Studies in these countries. For the first time, China experts from within and outside of this region, using a wide range of biographical, historical, bibliographical and comparative methodologies, tell the stories of how intellectuals and scholars in selected Southeast Asian countries understand, study, and research China. Their studies are providing different perspectives and discourses on China. Chapters discover and explore common factors such as the presence of sizeable ethnic Chinese communities, historical and current interactions between China and Southeast Asia, and the diverse intellectual influences in the region. A novel insight into the study of China in Southeast Asia, this book will be of interest to academics in the fields of China-Southeast Asia relations, the intellectual history of Southeast Asia, the intellectual history of Chinese Studies in the world and the politics of Knowledge production.

sinology research materials: Chinese Studies in History , 2007

sinology research materials: Global Elements in Chinese Literature Sihe Chen, 2022-11-28 How has modern Chinese literature emerged from the collision of domestic social upheaval, foreign inspiration and sparks of creative genius during the past century? Sihe Chen explores this question from a global perspective, analysing how Chinese authors assimilated Western literary movements to create new forms of expression adapted to a society in rapid transformation. The author then examines these global influences in the works of selected contemporary Chinese novelists and poets. He shows that the problems these writers confront are common to all peoples and that Chinese literature expresses not only the story of China, but also that of humanity.

sinology research materials: The Routledge Handbook of Chinese Studies Chris Shei, Weixiao Wei, 2021-05-30 This Handbook approaches Chinese Studies from an interdisciplinary perspective while attempting to establish a fundamental set of core values and tenets for the subject, in relation to the further development of Chinese Studies as an academic discipline. It aims to consolidate the current findings in Chinese Studies, extract the essence from each affiliated discipline, formulate a concrete set of ideas to represent the 'Chineseness' of the subject, establish a clear identity for the discipline and provide clear guidelines for further research and practice. Topics included in this Handbook cover a wide spectrum of traditional and newly added concerns in Chinese Studies, ranging from the Chinese political system and domestic governance to international relations, Chinese culture, literature and history, Chinese sociology (gender, middle class, nationalism, home ownership, dating) and Chinese opposition and activism. The Handbook also looks at widening the scope of Chinese Studies (Chinese psychology, postcolonialism and China, Chinese science and climate change), and some illustrations of innovative Chinese Studies research methods. The Routledge Handbook of Chinese Studies is an essential reference for researchers and scholars in Chinese Studies, as well as students in the discipline.

sinology research materials: Animation in China Sean Macdonald, 2015-11-06 By the turn of the 21st century, animation production has grown to thousands of hours a year in the People's Republic of China (PRC). Despite this, and unlike American blockbuster productions and the diverse genres of Japanese anime, much animation from the PRC remains relatively unknown. This book is an historical and theoretical study of animation in the PRC. Although the Wan Brothers produced the first feature length animated film in 1941, the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio (SAFS), which remained the sole animation studio until the 1980s. Considering animation in China as a convergence of the institutions of education, fine arts, literature, popular culture, and film, the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation, Pop Art, and mass media theory. Through readings of classic films such as Princess Iron Fan, Uproar in Heaven, Princess Peacock, and Nezha Conquers the Dragon King, this study represents a revisionist history of animation in the PRC as a form of postmodernism with Chinese characteristics. As a theoretical exploration of animation in the People's Republic of China, this book will appeal greatly to students and scholars of animation, film studies, Chinese studies, cultural studies, political and cultural theory.

sinology research materials: Studies Of China And Chineseness Since The Cultural Revolution - Volume 2: Micro Intellectual History Through De-central Lenses Chih-yu Shih, Mariko Tanigaki, Tina Clemente, 2023-01-04 Studies of China and Chineseness since the Cultural Revolution Volume 1: Reinterpreting Ideologies and Ideological Reinterpretations How did the Great Proletarian Cultural Revolution affect everyone's lives? Why did people re/negotiate their identities to adopt revolutionary roles and duties? How did people, who lived with different self-understandings and social relations, inevitably acquire and practice revolutionary identities, each in their own light? This book plunges into the contexts of these concerns to seek different relations that reveal the Revolution's different meanings. Furthermore, this book shows that scholars of the Cultural Revolution encountered emotional and intellectual challenges as they cared about the real people who owned an identity resource that could trigger an imagined thread of solidarity in their

minds. The authors believe that the Revolution's magnitude and pervasive scope always resulted in individualized engagements that have significant and differing consequences for those struggling in their micro-context. It has impacted a future with unpredictable collective implications in terms of ethnicity, gender, memory, scholarship, or career. The Cultural Revolution is, therefore, an evolving relation beneath the rise of China that will neither fade away nor sanction integrative paths.

sinology research materials: *China Bibliography* Harriet T. Zurndorfer, 2021-12-06 This volume serves as a guide to all facets of China study: from advice on choosing an appropriate literary dictionary to finding the most recent yearbooks that offer statistical data about the contemporary economy. *China Bibliography* does not restrict itself to one particular 'discipline', but considers the development of Chinese civilization as a whole, from its imperial beginnings to the present, and therefore demonstrates how one would find information about Chinese history, literature, religion, linguistics, collectanea, as well as present day PRC economic and political policies. Because this book also explains how bibliographical data on China has accumulated over the last 300 years (including within China itself), it also may help the reader understand the significance of a particular type of reference work.

sinology research materials: *Understanding Chinese and Western Cultures* Tang Yijie, 2022-09-29 The title is a collection of essays centering on the topic of intercultural communication between Chinese and Western cultures by Tang Yijie, one of the most renowned philosophy scholars in China. Comprised of five parts, the author discusses how Chinese culture should modernize itself through borrowing from Western culture premised on a self-awareness of Chinese culture per se. The book begins by critiquing theories of the so-called clash of civilizations and new empires and argues for the coexistence of cultures and a global consciousness instead. Chapters in the second part revisit contemporary Chinese culture in transition and call for the cultural integration of China and the West, with China defined in both its ancient and modern guises. By providing reflections on the cultural trends of the 1980s and 1990s, the third part illustrates the inevitable growth of diversified cultural development while analyzing cases of cultural dialogue in history, philosophy and religion. The fourth part demonstrates the significance of culture diversity and interaction while the fifth provides thoughts and reflections on some real-life cultural issues. This title will appeal to all levels of readers interested in Chinese culture, cross-cultural studies and topics of cultural pluralism.
