smith roberson law ebook: EBOOK: Scoping the Social Anthony Woodiwiss, 2005-12-16 Social theory is central to the disciplines of sociology, cultural studies, criminology and media studies. Many students, however, find it difficult to relate theory to their other courses, projects, dissertations and theses, let alone imagine themselves producing theory. In contrast to conventional social theory textbooks that restrict themselves to the description and analysis of theories and what other professionals have said about them, this innovative book shows students how to use, criticise and contribute to the development of theory. Treating theory as a variety of 'visual work' that is intimately connected with the process of empirical investigation, and with the help of clear diagrams and carefully chosen quotations, Part 1 provides an exceptionally clear introduction to the different ways of practicing social theory. Part 2 provides a practical example of how to theorise by producing

and demonstrating the effectiveness of a new concept of reflexivity in the course of an outline of the history of the development of social theory since 1945. This is important reading for students and researchers in sociology and related fields.

smith roberson law ebook: *After the Anthropocene* Anne Fremaux, 2019-03-25 The environmental crisis is the most prominent challenge humanity has ever had to battle with, and humanity is currently failing. The Anthropocene—or so called 'age of humans'—is indeed a period when the survival of humanity has never been so much at risk. This book locates itself in the field of critical green political theory. Fremaux's analysis of the current environmental crisis calls for us to embrace radical shifts in our modes of being; or, in other words, socially progressive innovations that will be described within the unique framework of Green Republicanism. In offering a constructive and emancipatory delineation of what could be considered an ecological civilization that is respectful of its natural environment and social differences, this book describes how to shift from an 'arrogant speciesism' and materialistic lifestyle to a post-anthropocentric ecological humanism focusing on the 'good life' within ecological limits. This new political regime calls for a radical reinvention of our societies, a decentering of the humans within our metaphysical worldview, and a withdrawal of the capitalist technosphere at the benefit of the biosphere. It will require a new economic paradigm that replaces the unsustainable capitalist logic of growth by sustainable degrowth and steady economics. Rooted in ethical thinking and political philosophy, this book seeks to offer a concrete roadmap of how sustainable societies can be fostered.
