sobriety strategies pdf download: *Ensuring the Climate Record from the NPOESS and GOES-R Spacecraft* National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on a Strategy to Mitigate the Impact of Sensor Descope and Demanifests on the NPOESS and GOES-R Spacecraft, 2008-08-25 In 2000, the nation's next-generation National Polar-orbiting Operational Environmental Satellite System (NPOESS) program anticipated purchasing six satellites for \$6.5 billion, with a first launch in 2008. By November 2005, however, it became apparent that NPOESS would overrun its cost estimates by at least 25 percent. In June 2006, the planned acquisition of six spacecraft was reduced to four, the launch of the first spacecraft was delayed until 2013, and several sensors were canceled or descope in capability. Based on information gathered at a June 2007 workshop, Options to Ensure the Climate Record from the NPOESS and GOES-R Spacecraft, this book prioritizes capabilities, especially those related to climate research, that were lost or placed at risk following the 2006 changes. This book presents and recommends a prioritized, short-term strategy for recovery of crucial climate capabilities lost in the NPOESS and GOES-R program descopes. However, mitigation

of these recent losses is only the first step in establishing a viable long-term climate strategy—one that builds on the lessons learned from the well-intentioned but poorly executed merger of the nation's weather and climate observation systems.

sobriety strategies pdf download: Why Can't Church Be More Like an AA Meeting?

Stephen R. Haynes, 2021-10-26 Do Christians need recovery? Or is recovery something needed by the church itself? Addiction—whether to a substance or to a behavior—is a problem within faith communities, just like it is everywhere else. But because churches are rarely experienced as safe places for dealing with addiction, co-addiction, or the legacy of family dysfunction, Christians tend to seek recovery from these conditions in Twelve-Step fellowships. Once they become accustomed to the ethos of vulnerability, acceptance, and healing that these fellowships provide, however, they are often left feeling that the church has failed them, with many asking: why can't church be more like an AA meeting? Inspired by his own quest to find in church the sort of mutual support and healing he discovered in Twelve-Step fellowships, Stephen Haynes explores the history of Alcoholics Anonymous and its relationship to American Christianity. He shows that, while AA eventually separated from the Christian parachurch movement out of which it emerged, it retained aspects of Christian experience that the church itself has largely lost: comfort with brokenness and vulnerability, an emphasis on honesty and transparency, and suspicion toward claims to piety and respectability. Haynes encourages Christians to reclaim these distinctive elements of the Twelve-Step movement in the process of "recovering church." He argues that this process must begin with he calls "Step 0," which, as he knows from personal experience, can be the hardest step: the admission that, despite appearances, we are not fine.

sobriety strategies pdf download: Banished G. Cledwyn Jenkins, 2020-08-01 Banished is

dedicated to sex offender research, and its issues regarding society, mental health, and the law equally. It focuses on this problem in cultural, legal and scientific terms, specifically from the clinical point-of-view, though it is written for the general public. It offers an up-to-date and all-inclusive look into the mind and habits of the pedophile and child molester. This book offers current research into one of the most controversial subjects in society to date, discussing topics of mental illness and various psychological disorders, the law and how this problem is legally dealt with. It focuses on this problem in cultural, legal and scientific terms that are readily comprehensible, both from the clinical standpoint and the layman's point-of-view. The book offers a detailed review of the sex offender; the pedophile and the child molester, and directly explores his thinking processes, reasoning and related issues that offer a clear and concise exposé in these most hated people. In addition to covering the adult offender, this work also exemplifies the thought processes of child and adolescent offenders in order to offer cues for parents and educators of possible abuse or illicit behavior. Through direct examples of client art, case histories and offender testimonies, the book's purpose will surely educate, as well as in purposing methods for positive change in the process. The research and

findings are based on a journalistic foundation, as well as from an experiential point-of-view, where the author had worked with and had interviewed the subjects exemplified in the case studies section directly. One could view this book as a documentary in text form to that of a simple scientific assessment or exposé. Some examples; such as statistical data and related state and government laws, national and international legal information, as well as properly devised case study examples are utilized to help illustrate the intent of the book's overall purpose. Moreover, because there are sections regarding internet deviancy and its major influence on the human psyche, and that these sections offer raw information, the reader should be aware of the content and the reasoning for using it. It is done so to educate and to hopefully illustrate the realities of this global problem. In addition to a selection of thoroughly researched interviews with said offenders, in the form of case studies reminiscent to the current style of the American Psychological Association (APA) formats, I also highlight a selection of documented artwork, specifically by children and young adults while working as a therapist in various hospitals. This section may serve as an alert for parents and educators for possible cues of sexual abuse in or outside of the home, but such will also illustrate the sheer potency sexual abuse can cause upon its victims, and how it will be viewed from their unconscious psyche and conscious viewpoints.
