Yet it remains widely misunderstood. In *Trauma Proof* international expert Benjamin Perks redefines how we see childhood trauma, and outlines a new path towards healing and prevention. For 25 years, Perks has worked for the UN and UNICEF on eradicating global barriers to child wellbeing, including poverty, hunger, disease, the mobilisation of child soldiers and population displacement. But he has also been on a personal journey of healing from his own childhood, spent living in the UK's care system and on the streets. Today, new research is revealing little-known aspects of childhood trauma. It is no surprise that it drives addiction or poor mental health. But how does it explain a heightened risk for heart disease or diabetes? Why does it so comprehensively correlate with poor life outcomes? And how can we not only heal from, but prevent, the types of experiences that negatively impact on child development? In *Trauma Proof*, Perks explains the science behind these findings, and argues that making simple changes can break damaging inter-generational cycles. Ultimately, he shows how building secure attachments and improving the quality of your relationships can radically transform your life, at any age.

Featherstone, 2015-01-01 A blond-haired, blue-eyed Lutheran man is approached on the streets of Chicago by members of the Latin Kings so he may teach them how to pray, and he does so with grace--this man's story, one suspects, isn't going to be a typical one. Life has not been easy for Charles Featherstone. From being bullied by peers and teachers in school, to his refusing to become a bully himself by leaving the armed services, to wandering the world in search of work and finding unexpected hospitality as an outsider nearly everywhere, to witnessing the 9/11 attacks from his nearby office, Featherstone's story is a tale of survival akin to Jacob's wrestling the angel at the River Jabbok. It may well leave the reader limping a bit, too, for the encounter with God found in these pages is stark and startling. Truly God's love knows no bounds and cannot be captured by labels--but as Featherstone's life attests, that love just might capture you.

the things they carried pdf: *How White Men Won the Culture Wars* Joseph Darda,

2021-05-25 Reuniting white America after Vietnam. "If war among the whites brought peace and liberty to the blacks," Frederick Douglass asked in 1875, peering into the nation's future, "what will peace among the whites bring?" The answer then and now, after civil war and civil rights: a white reunion disguised as a veterans' reunion. How White Men Won the Culture Wars shows how a broad contingent of white men--conservative and liberal, hawk and dove, vet and nonvet--transformed the Vietnam War into a staging ground for a post-civil rights white racial reconciliation. Conservatives could celebrate white vets as deracinated embodiments of the nation. Liberals could treat them as minoritized heroes whose voices must be heard. Erasing Americans of color, Southeast Asians, and women from the war, white men could agree, after civil rights and feminism, that they had suffered and deserved more. From the POW/MIA and veterans' mental health movements to Rambo and "Born in the U.S.A.," they remade their racial identities for an age of color blindness and multiculturalism in the image of the Vietnam vet. No one wins in a culture war--except, Joseph Darda argues, white men dressed in army green.

the things they carried pdf: *War & Homecoming* Travis L. Martin, 2022-07-26 In *War & Homecoming: Veteran Identity and the Post-9/11 Generation*, Travis L. Martin explores how a new generation of veterans is redefining what it means to come home. More than 2.7 million veterans served in Iraq and Afghanistan. Their homecomings didn't include parades or national celebrations. Instead, when the last US troops left Afghanistan, American veterans raised millions of dollars for the evacuation of Afghan refugees, especially those who'd served alongside them. This brand of selflessness is one reason civilians regard veterans with reverence and pride. The phrase thank you for your service is ubiquitous. Yet, one in ten post-9/11 veterans struggles with substance abuse. Fifteen to twenty veterans die by suicide every day. Veterans aged eighteen to thirty-four die at the highest rates, leading advocates to focus on concepts like moral injury and collective belonging when addressing psychic wounds. Martin argues that many veterans struggle due to decades of stereotyping and a lack of healthy models of veteran identity. In the American unconscious, veterans are treated as either the superficially praised hero or the victimized wounded warrior, forever defined by past accomplishments. They are often appropriated as symbols in competing narratives of national identity. *War & Homecoming* critically examines representations of veterans in patriotic rhetoric, popular media, literature, and the lives of those who served. From this analysis, a new veteran identity emerges--veterans as storytellers who reject stereotypes, claim their symbolic authority, and define themselves through literature, art, and service. Their dynamic approach to life after military service allows for continued growth, agency, individuality, and inspiring examples of resilience for others.

the things they carried pdf: *The Puritan Culture of America's Military* Ronald Lorenzo, 2016-02-24 This book explores Puritanism and its continuing influence on U.S. and military law in the Global War on Terror, exploring connections between Puritanism and notions of responsibility in relation to military crimes, superstitious practices within the military, and urges for revenge. Engaging with the work of figures such as Durkheim, Fauconnet and Weber, it draws on primary data gathered through participation and observation at the U.S. Army courts-martial following events at Abu Ghraib, Operation Iron Triangle, the Baghdad canal killings and a war crimes case in Afghanistan, to show how Puritan cultural habits color and shape both American military actions and the ways in which these actions are perceived by the American public. A theoretically sophisticated examination of the cultural tendencies that shape military conduct and justice in the context of a contemporary global conflict, *The Puritan Culture of America's Military* will appeal to scholars across the social sciences with interests in social theory and sociology, cultural studies, politics and international relations and military studies.

the things they carried pdf: *A House in the Homeland* Carel Bertram, 2022-04-19 A powerful examination of soulful journeys made to recover memory and recuperate stolen pasts in the face of unspeakable histories. Survivors of the Armenian Genocide of 1915 took refuge across the

globe. Traumatized by unspeakable brutalities, the idea of returning to their homeland was unthinkable. But decades later, some children and grandchildren felt compelled to travel back, having heard stories of family wholeness in beloved homes and of cherished ancestral towns and villages once in Ottoman Armenia, today in the Republic of Turkey. Hoping to satisfy spiritual yearnings, this new generation called themselves pilgrims—and their journeys, pilgrimages. Carel Bertram joined scores of these pilgrims on over a dozen pilgrimages, and amassed accounts from hundreds more who made these journeys. In telling their stories, *A House in the Homeland* documents how pilgrims encountered the ancestral house, village, or town as both real and metaphorical centerpieces of family history. Bertram recounts the moving, restorative connections pilgrims made, and illuminates how the ancestral house, as a spiritual place, offers an opening to a wellspring of humanity in sites that might otherwise be defined solely by tragic loss. As an exploration of the powerful links between memory and place, house and homeland, rupture and continuity, these Armenian stories reflect the resilience of diaspora in the face of the savage reaches of trauma, separation, and exile in ways that each of us, whatever our history, can recognize.

the things they carried pdf: *Self-Translation and Power* Olga Castro, Sergi Mainer, Svetlana Page, 2017-08-07 This book investigates the political, social, cultural and economic implications of self-translation in multilingual spaces in Europe. Engaging with the 'power turn' in translation studies contexts, it offers innovative perspectives on the role of self-translators as cultural and ideological mediators. The authors explore the unequal power relations and centre-periphery dichotomies of Europe's minorised languages, literatures and cultures. They recognise that the self-translator's double affiliation as author and translator places them in a privileged position to challenge power, to negotiate the experiences of the subaltern and colonised, and to scrutinise conflicting minorised vs. hegemonic cultural identities. Three main themes are explored in relation to self-translation: hegemony and resistance; self-minorisation and self-censorship; and collaboration, hybridisation and invisibility. This edited collection will appeal to scholars and students working on translation, transnational and postcolonial studies, and multilingual and multicultural identities.

Roy, 2018-10-16 This book endeavors to cultivate activism literacies in White teachers in order to disrupt the system of white supremacy and racial oppression in education. Through the lens of Critical Race Teacher Activism (CRTA), this book seeks to support teachers in critiquing and transforming pedagogy and curriculum in predominantly white spaces in order to interrupt the single story and amplify voices that are marginalized, silenced, or omitted from curriculum.

the things they carried pdf: *Autofiction in English* Hywel Dix, 2018-06-04 This innovative volume establishes autofiction as a new and dynamic area of theoretical research in English. Since the term was coined by Serge Doubrovsky, autofiction has become established as a recognizable genre within the French literary pantheon. Yet unlike other areas of French theory, English-language discussion of autofiction has been relatively limited - until now. Starting out by exploring the characteristic features and definitions of autofiction from a conceptual standpoint, the collection identifies a number of cultural, historical and theoretical contexts in which the emergence of autofiction in English can be understood. In the process, it identifies what is new and distinctive about Anglophone forms of autofiction when compared to its French equivalents. These include a preoccupation with the conditions of authorship; writing after trauma; and a heightened degree of authorial self-reflexivity beyond that typically associated with postmodernism. By concluding that there is such a field as autofiction in English, it provides for the first time detailed analysis of the major works in that field and a concise historical overview of its emergence. It thus opens up new avenues in life writing and authorship research.
