The ETA's armed campaign for Basque independence lasted fifty years and led to more than 800 casualties. This book analyzes the factors that led to ETA ending its campaign of violence in 2011, despite having yet to achieve its political objectives. It explains how the Basque pro-independence movement's political leadership won an internal battle and brought ETA to a position in which abandoning violence was the only feasible choice. The work argues that the key factor leading to the cessation of violence was the loss of support for armed struggle within the pro-independence social base, and it examines why and how that support decreased so decisively. Written by a former journalist, the narrative is based on more than 30 interviews, including former members of ETA, Spanish judges, former ministers of the Spanish government, political leaders of all Basque political parties—from the Nationalist Left to the Partido Popular (PP)—and international mediators. As such, it is the first book to recount in detail the inside story of the internal struggle within the Nationalist Left movement, and particularly between the political party Batasuna and ETA. This book will be of much interest to students of political violence, ethnic conflict, nationalism, Spanish politics, security studies, and IR.

the long walk full text: Peregrinations Amy T Hamilton, 2018-06-15 Peregrinate: To travel or wander around from place to place. The land of the United States is defined by vast distances encouraging human movement and migration on a grand scale. Consequently, American stories are filled with descriptions of human bodies walking through the land. In *Peregrinations*, Amy T. Hamilton examines stories told by and about Indigenous American, Euroamerican, and Mexican walkers. Walking as a central experience that ties these texts together—never simply a metaphor or allegory—offers storytellers and authors an elastic figure through which to engage diverse cultural practices and beliefs including Puritan and Catholic teachings, Diné and Anishinaabe oral traditions, Chicana histories, and European literary traditions. Hamilton argues that walking bodies alert readers to the ways the physical world—more-than-human animals, trees, rocks, wind, sunlight, and human bodies—has a hand in creating experience and meaning. Through material ecocriticism, a reading practice attentive to historical and ongoing oppressions, exclusions, and displacements, she reveals complex layerings of narrative and materiality in stories of walking human bodies. This powerful and pioneering methodology for understanding place and identity, clarifies the wide variety of American stories about human relationships with the land and the ethical implications of the embeddedness of humans in the more-than-human world.

Using postcolonial and gender theory, Drouin traces the evolution of discourses of nation and gender in Québec from the Conquest of New France to the present, and she elaborates a theory of adaptation specific to Shakespeare studies. Drouin's book explains why Québécois playwrights seem so obsessed with rewriting *le grand Will*, what changes they make to the Shakespearean text, and how the differences between Shakespeare and the adaptations engage the nationalist, feminist, and queer concerns of Québec society. Close readings from ten plays investigate the radical changes to content that allowed Québécois playwrights to advocate for political change and contribute to the hot debates of the Quiet Revolution, the 1970 October Crisis, the 1980 and 1995 referenda, the rise of feminism, and the emergence of AIDS. Drouin reveals not only how Shakespeare has been adapted in Québec but also how Québécois adaptations have evolved in response to changes in the political climate. As a critical analysis in English of rich but largely ignored French plays, *Shakespeare in Québec* bridges Canada's *two solitudes*.

the long walk full text: The Last Children's Plague Richard J. Altenbaugh, 2015-09-16 Poliomyelitis, better known as polio, thoroughly stumped the medical science community. Polio's

impact remained highly visible and sometimes lingered, exacting a priceless physical toll on its young victims and their families as well as transforming their social worlds. This social history of infantile paralysis is plugged into the rich and dynamic developments of the United States during the first half of the twentieth century. Children became epidemic refugees because of anachronistic public health policies and practices. They entered the emerging, clinical world of the hospital, rupturing physical and emotional connections with their parents and siblings. As they underwent rehabilitation, they created ward cultures. They returned home to occasionally find hostile environments and always discover changed relationships due to their disabilities. The changing concept of the child, from an economic asset to an emotional commitment, medical advances, and improved sanitation policies led to significant improvements in child health and welfare. This study, relying on published autobiographies, memoirs, and oral histories, captures the impact of this disease on children's personal lives, encompassing public-health policies, hospitalization, philanthropic and organizational responses, physical therapy, family life, and schooling. It captures the anger, frustration, and terror not only among children but parents, neighbors, and medical professionals alike.

the long walk full text: Love and Narrative Form in Toni Morrison's Later Novels Jean Wyatt, 2017-03-01 In *Love and Narrative Form in Toni Morrison's Later Novels*, Jean Wyatt explores the interaction among ideas of love, narrative innovation, and reader response in Toni Morrison's seven later novels. Love comes in a new and surprising shape in each of the later novels; for example, Love presents it as the deep friendship between little girls; in *Home* it acts as a disruptive force producing deep changes in subjectivity; and in *Jazz* it becomes something one innovates and recreates each moment—like jazz itself. Each novel's unconventional idea of love requires a new experimental narrative form. Wyatt analyzes the stylistic and structural innovations of each novel, showing how disturbances in narrative chronology, surprise endings, and gaps mirror the dislocated temporality and distorted emotional responses of the novels' troubled characters and demand that the reader situate the present-day problems of the characters in relation to a traumatic African American past. The narrative surprises and gaps require the reader to become an active participant in making meaning. And the texts' complex narrative strategies draw out the reader's convictions about love, about gender, about race—and then prompt the reader to reexamine them, so that reading becomes an active ethical dialogue between text and reader. Wyatt uses psychoanalytic concepts to analyze Morrison's narrative structures and how they work on readers. *Love and Narrative Form* devotes a chapter to each of Morrison's later novels: *Beloved*, *Jazz*, *Paradise*, *Love*, *A Mercy*, *Home*, and *God Help the Child*.

By offering a linked series of interdisciplinary case studies that show translation in action beyond languages and texts, this book provides a capacious and innovative understanding of what translation is, what it does, how, and where. The volume uses translation as a means through which to interrogate processes of knowledge transfer and creation, interpretation and reading, communication and relationship building—but it does so in ways that refuse to privilege one discipline over another, denying any one of them an entitled

perspective. The result is a book that is grounded in the disciplines of the authors and simultaneously groundbreaking in how its contributors incorporate translation studies into their work. This is key reading for students in comparative literature—and in the humanities at large—and for scholars interested in seeing how expanding intellectual conversations can develop beyond traditional questions and methods.

Monjurul Kabir, 2018-07-21 This book is based on experience and reflections related to international support provided to parliaments and legislative bodies both in selected countries (Afghanistan, Bangladesh, Ghana, Serbia, and Kyrgyzstan) and globally. The author intends to provide a critique of parliamentary support, as part of development assistance or foreign aid, for having been conceived in narrow terms of technical assistance and for failing to appreciate that aid effectiveness calls for a sound understanding of a country's politics, culture, and history. The monograph examines the effectiveness of aid in both stable democracies, and fragile and transition countries. The project is ideal for audiences interested in regional politics, the Middle East, Africa, South Asia, Central Asia, and development/democracy studies.

the long walk full text: The Rise And Fall Of Apartheid David Welsh, 2010-11-22 On his way into Parliament on 2 February 1990 FW de Klerk turned to his wife Marike and said, referring to his forthcoming speech: 'South Africa will never be the same again after this.' Did white South Africa crack, or did its leadership yield sufficiently and just in time to avert a revolution? The transformation has been called a miracle, belying gloomy predictions of race war in which the white minority went into a laager and fought to the last drop of blood. Why did it happen? Professor Welsh views the topic against the backdrop of a long history of conflict spanning apartheid's rise and demise, and the liberation movement's suppression and subsequent resurrection. His view is that the movement away from apartheid to majority rule would have taken far longer and been much bloodier were it not for the changes undergone by Afrikaner nationalism itself. There were turning points, such as the Soweto uprising of 1976, but few believed that the transition from white domination to inclusive democracy would occur as soon - and as relatively peacefully - as it did. In effect, however, a multitude of different factors led the ANC and the National Party to see that neither side could win the conflict on its own terms. Utterly dissimilar in background, culture, beliefs and political style, Nelson Mandela and FW de Klerk were an unlikely pair of liberators. But both soon recognised that they were dependent on each other to steer the transformation process through to its conclusion.
