thinking critically john chaffee pdf: Deleuze's Kantian Ethos Carr Cheri Lynne Carr, 2018-05-15 Among the philosophical traditions that seem most at odds with Gilles Deleuze's project, two stand out: Kantianism and normative ethics. Both of these traditions represent forms of moralism that Deleuze explicitly rejects. In this book, Cheri Lynne Carr explores the very real potential of Deleuze's clandestine use of Kantian critique for developing a new ethical practice. This new practice is built on an idea implicit in much of Deleuzian thought: the idea of critique as a way of life. This new concept of a critical ethos is a powerful form of moral pedagogy directed at developing in us the wisdom to perceive unanticipated features of moral salience, evaluate our presupposed principles, affirm the limits imposed by those presuppositions and create concepts that capture new ways of thinking about moral problems.

thinking critically john chaffee pdf: *Television and the Self* Kathleen M. Ryan, Deborah A. Macey, 2013-04-05 Sitting prominently at the hearth of our homes, television serves as a voice of our modern time. Given our media-saturated society and television's prominent voice and place in the home, it is likely we learn about our society and selves through these stories. These narratives are

not simply entertainment, but powerful socializing agents that shape and reflect the world and our role in it. *Television and the Self: Knowledge, Identity, and Media Representation* brings together a diverse group of scholars to investigate the role television plays in shaping our understanding of self and family. This edited collection's rich and diverse research demonstrates how television plays an important role in negotiating self, and goes far beyond the treacly "very special" episodes found in family sit-coms in the 1980s. Instead, the authors show how television reflects our reality and helps us to sort out what it means to be a twenty-first-century man or woman.

thinking critically john chaffee pdf: An Aristocracy of Critics Stephen Bates, 2020-10-27 The story behind the 1940s Commission on Freedom of the Press—groundbreaking then, timelier than ever now A well-constructed, timely study, clearly relevant to current debates.—Kirkus, starred review In 1943, Time Inc. editor-in-chief Henry R. Luce sponsored the greatest collaboration of intellectuals in the twentieth century. He and University of Chicago president Robert Maynard Hutchins summoned the theologian Reinhold Niebuhr, the Pulitzer-winning poet Archibald MacLeish, and ten other preeminent thinkers to join the Commission on Freedom of the Press. They spent three years wrestling with subjects that are as pertinent as ever: partisan media and distorted news, activists who silence rather than rebut their opponents, conspiracy theories spread by shadowy groups, and the survivability of American democracy in a post-truth age. The report that emerged, *A Free and Responsible Press*, is a classic, but many of the commission's sharpest insights never made it into print. Journalist and First Amendment scholar Stephen Bates reveals how these towering intellects debated some of the most vital questions of their time—and reached conclusions urgently relevant today.

thinking critically john chaffee pdf: Student Success in Community Colleges Deborah J. Borocho, Laura Hope, Bruce M. Smith, Robert S. Gabriner, Pamela M. Mery, Robert M. Johnstone, Rose Asera, 2010-02-22 *Student Success in Community Colleges* As more and more underprepared students enroll in college, basic skills education is an increasing concern for all higher education institutions. *Student Success in Community Colleges* offers education leaders, administrators, faculty, and staff an essential resource for helping these students succeed and advance in college. By applying the book's self-assessment instrument, colleges can pinpoint how their current activities align with the most effective proven practices. Once the gaps are identified, community college leaders can determine the best strategic direction for improvement. Drawing on a broad knowledge base and illustrative examples from the most current literature, the authors cover organizational, administrative, and instructional practices; program components; student support services and strategies; and professional learning and development. Designed to help engage community college leadership and practitioners in addressing the practices, structures, and obstacles that enhance or impede the success of basic skills students, the book's strategies can be tailored to various institutional levels, showing how to unite faculty, staff, and administrators in a cooperative effort to effect institutional change. Finally, *Student Success in Community Colleges* reveals how investing in a comprehensive basic skills infrastructure can be a financially sustainable model for the institution as well as substantially beneficial to students and society. This is a most unusual and valuable book; it is packed with careful analysis and practical suggestions for improving basic skills programs in community colleges. Compiled by a team of practicing professionals in teaching, administration, and research, it is knowledgeable about what has been done and imaginative and practical about what can be done to improve the access and success of community college students. K. Patricia Cross, professor of higher education, emerita, University of California, Berkeley For its first hundred years the community college was committed primarily to access; in its second hundred years the

commitment has changed dramatically to success. This book provides the best road map to date on how community colleges can reach that goal. Terry O'Banion, president emeritus, League for Innovation, and director, Community College Leadership Program, Walden University This guide is the most comprehensive source of information about all facets of basic skills or developmental education. It will be invaluable not just to community college educators across the nation, but also to those in high schools and four-year colleges who share similar problems. W. Norton Grubb, David Gardner Chair in Higher Education, University of California, Berkeley

thinking critically john chaffee pdf: Strategic Communication Theory and Practice Carl H. Botan, 2017-10-13 A guide to strategic communication that can be applied across a range of subfields at all three levels—grand strategic, strategic, and tactical communication Communication is a core function of every human organization so when you work with communication you are working with the very core of the organization. Written for students, academics, and professionals, Strategic Communication Theory and Practice: The Cocreational Model argues for a single unified field of strategic communication based in the three large core subfields of public relations, marketing communication, and health communication, as well as strategic communicators working in many other subfields such as political communication, issues management, crisis communication, risk communication, environmental and science communication, social movements, counter terrorism communication, public diplomacy, public safety and disaster management, and others. Strategic Communication Theory and Practice is built around a cocreational model that shifts the focus from organizational needs and the messages crafted to achieve them, to a publics-centered view placing publics and their ability to cocreate new meanings squarely in the center of strategic communication theory and practice. The author—a noted expert in the field—outlines the theories, campaign strategies, common issues, and cutting edge challenges facing strategic communication, including the role of social media, ethics, and intercultural strategic communication. As the author explains, the term strategic communication properly refers only to the planned campaigns that grow out of research and understanding what publics think and want. This vital resource answers the questions of whether, and how, strategic-level skills can be used across fields, as it: Explores the role of theory and the cocreational meta-theory in strategic communication Outlines ethical practices and problems in the field Includes information on basic campaign strategies Offers the most recent information on risk communication, preparedness and terrorism communication, and employment in strategic communication Redefines major concepts, such as publics, from a cocreational perspective
