the bell jar pdf: Zero-Carbon Industry Jeffrey Rissman, 2024-02-27 The power sector and transportation tend to dominate conversations about climate change, but there's an under-the-radar source of climate pollution that must be addressed: industry. Globally, industrial activity is responsible for one-third of human-caused greenhouse gas emissions. Though industry is a major emitter, it is essential for producing the tools we need to fight climate change—like wind turbines, solar panels, and electric vehicles—and for meeting our everyday needs. How can industry eliminate its climate pollution while supplying transformational technologies? This book delivers a first-of-its-kind roadmap for the zero-carbon industrial transition, spotlighting the breakthrough innovations transforming the manufacturing sector and the policies that can accelerate this global shift. Jeffrey Rissman illustrates the scope of the challenge, diving into the workings of heavy polluters like steel, chemicals, plastics, cement, and concrete. He examines ways to affordably decarbonize manufacturing, such as electrifying industrial processes, using hydrogen, deploying carbon capture and storage, and growing material efficiency with lightweighting and 3D printing. But technologies are only part of the picture. Enacting the right policies—including financial incentives, research and development support, well-designed carbon pricing, efficiency and emissions standards, and green public procurement—can spur investment and hasten emissions reductions. Rissman provides a framework to ensure that the transition to clean industry enhances equity, health, and prosperity for communities worldwide. Engaging and comprehensive, Zero-Carbon Industry is the definitive guide to decarbonizing the vast—yet often overlooked—global industrial sector.

the bell jar pdf: Gender Design Uta Brandes, 2017-10-10 Die Auseinandersetzung mit Geschlecht als sozialer Konstruktion ist in sehr vielen Wissenschaftsbereichen seit Jahrzehnten state of the art. Im Design ist die Einbeziehung der Kategorie Gender allerdings noch immer fast ein blinder Fleck. Das ist merkwürdig, weil Design ja den ganz gewöhnlichen Alltag überall und jederzeit bestimmt, und damit auch die in diesem Alltag handelnden Subjekte. Und diese Interaktion zwischen Menschen und Dingen findet unabdingbar „gendered“ statt. Das vorliegende Buch setzt sich erstmals mit den essentiellen Fragen von Gender im Design theoretisch wie praktisch auseinander: Es erörtert die grundsätzliche Notwendigkeit der Einbeziehung von Gender in den Designprozess, und es stellt exemplarisch Design(forschungs)projekte zu diesem wichtigen Thema vor. Uta Brandes ist die erste Professorin, die explizit Gender & Design bis vor kurzem an der Köln International School of Design lehrte. Sie berät Unternehmen in Gender & Design-Fragen, ist Co-Gründerin und Vorsitzende des international Gender Design Network und betreut zahlreiche Projekte, insbesondere in Hong Kong, China und Japan.

the bell jar pdf: C.H.O.I.C.E.S. Model: Choosing Love Instead of Fear John L. Stone, 2023-12-05 C.H.O.I.C.E.S. Model: Choosing Love Instead of Fear is a self-empowerment book which was 35 years in the making and based on extensive research. That research distilled down to its essence demonstrates that stress is not, as is often portrayed in popular culture, the enemy. Data from two separate fields, academia, and industry, while having opposing views on who is responsible for reducing felt stress, both agree that the primary mitigator of harmful distress is locus of control (LOC). Internal LOC locates the control within the individual whereas external LOC locates the control from outside forces. The consensus by academia and industry is the more LOC is internal, the less distress is felt. Chosen versus imposed stressors yield less harmful impacts from the distress. This research becomes a powerful tool to help reduce distress by restoring control to the individual. Life can be so overwhelming that automatic knee jerk reactions are used to fend off a constant barrage of stressors. The CHOICES Model provides a way to be proactive. The more this is done consciously the greater the sense of wellbeing. The book presents seven life areas which give purpose and meaning. The areas include Community, Health, Occupation, Investment, Creativity, Education, and Spirituality. Each is essential to a quality life. The premise of this book is that an individual's perception of their own personal power increases with every small success and one area of success gives the individual confidence to believe in themselves enough to attempt challenges in the other domains. There's a chapter for each of these seven equally important domains. Each area is defined along with the rationale and tools necessary for personal development. Community is important because we are social beings with needs for belonging. Letting someone know you care allows joy to spring through both your hearts. No matter our physical or mental condition, health matters to all of us. Our personal level of wellbeing sets the limits for what can be our personal best. Build strength and immunity when feeling well and be gentle with yourself when you're not. Occupation is important because we all have a need to be part of something bigger than ourselves; a calling to make a difference; and a desire to leave a meaningful legacy. This needn't be one's vocation. It is literally what occupies our time and energy. It may be an avocation or volunteer service work. However we spend our time, let our life's work lift our hearts and move us all into better days. Investment is not limited to finances. This area is all about how we spend our resources. Besides money, it includes our time, energy, and level of commitment. Let's be generous and give of ourselves without expecting anything in return. In this way we all have the power to be superheroes. Creativity is important because it defines who we are. We build a life. We express who we are. We make something that only we can imagine. Expressions from our hearts are never wasted. When we bring something new into this world we give birth to something that will survive us. Education is something we do naturally and have done since we took our first breath. Lifelong learning helps us make our way in the world. We know that reading to a child instills curiosity and ignites intelligence. Let's read to a child tonight and if that's not possible, let's all continue reading to our inner child. Finally, spirituality provides transcendence to see and feel beyond our limitations and provides love

when facing the void. Namaste! The light within me bows to the light within you. Let's spread this message and celebrate the sacred in each other.

the bell jar pdf: *From Asylum to Prison* Anne E. Parsons, 2018-09-25 To many, asylums are a relic of a bygone era. State governments took steps between 1950 and 1990 to minimize the involuntary confinement of people in psychiatric hospitals, and many mental health facilities closed down. Yet, as Anne Parsons reveals, the asylum did not die during deinstitutionalization. Instead, it returned in the modern prison industrial complex as the government shifted to a more punitive, institutional approach to social deviance. Focusing on Pennsylvania, the state that ran one of the largest mental health systems in the country, Parsons tracks how the lack of community-based services, a fear-based politics around mental illness, and the economics of institutions meant that closing mental hospitals fed a cycle of incarceration that became an epidemic. This groundbreaking book recasts the political narrative of the late twentieth century, as Parsons charts how the politics of mass incarceration shaped the deinstitutionalization of psychiatric hospitals and mental health policy making. In doing so, she offers critical insight into how the prison took the place of the asylum in crucial ways, shaping the rise of the prison industrial complex.

the bell jar pdf: *Externe EU-Governance* Georg Simonis, Helmut Elbers, 2011-02-01 Wie gelingt es der EU, ihre Außenbeziehungen gegenüber Nachbarstaaten und auf entscheidenden Politikfeldern zu koordinieren, zu institutionalisieren und zu gestalten? Diese Frage ist mit gängigen Instrumenten der staatenbasierten Außenpolitikforschung schlecht beantwortbar. In diesem Band wird der Governanceansatz als analytisches Instrumentarium ausgearbeitet und, unter besonderer Berücksichtigung der normativen Basis der EU-Außenbeziehungen, in Fallstudien auf die oben gestellte Frage angewandt. Hierdurch wird eine wichtige Lücke der EU-Forschung geschlossen.

the bell jar pdf: *The Language of Mass Shooter Manifestos* Emily Powell, 2025-05-30 Bringing together scholarship from corpus linguistics, forensic linguistics, and criminology, this book offers a nuanced exploration of moral agency in the pre-crime narratives of offenders. The volume seeks to complement existing literature in forensic linguistics, which often explore criminal narratives elicited after the crime with the benefit of hindsight, by examining texts written in the midst of events. Analyses draw on a corpus of over 200,000 words of manifestos and diaries written by four 'lone attackers' who perpetrated mass shootings, and put together accounts of their lives and the preparation for their crimes. Incorporating stylistic approaches to non-fiction texts with those from corpus linguistics, Powell explores the ways in which these texts influence perpetrators and future offenders and, more broadly, the role of narrative as it relates to harmful actions. A closing section includes a taxonomy of moral agency which may serve as the foundation for future research on understanding agency, responsibility, and offending from a linguistic perspective. This book will be of interest to scholars in forensic linguistics, corpus linguistics, stylistics, and criminology.

the bell jar pdf: *Protection of Materials and Structures From the Space Environment* Jacob Kleiman, Masahito Tagawa, Yugo Kimoto, 2012-09-22 The goals of the 10th International Space Conference on "Protection of Materials and Structures from Space Environment" ICPMSE-10J, since its inception in 1992, have been to facilitate exchanges between members of the various engineering and science disciplines involved in the development of space materials, including aspects of LEO, GEO and Deep Space environments, ground-based qualification, and in-flight experiments and lessons learned from operational vehicles that are closely interrelated to disciplines of the atmospheric sciences, solar-terrestrial interactions and space life sciences. The knowledge of environmental conditions on and around the Moon, Mars, Venus and the low Earth orbit as well as other possible candidates for landing such as asteroids have become an important issue, and protecting both hardware and human life from the effects of space environments has taken on a new meaning in light of the increased interest in space travel and colonization of other planets. And while many material experiments have been carried out on the ground and in open space in the last 50 years (LDEF, MEEP, SARE, MISSE, AOP, DSPSE, ESEM, EURECA, HST, MDIM, MIS, MPID, MPAC and SEED), many questions regarding the environmental impact of space on

materials remain either poorly understood or unanswered. The coming generations of scientists will have to continue this work and tackle new challenges, continuing to build the level of confidence humans will need to continue the colonization of space. It is hoped that the proceedings of the ICPMSE-10J presented in this book will constitute a small contribution to doing so.

the bell jar pdf: *Age, Gender and Sexuality through the Life Course* Susan Pickard, 2018-04-19 *Age, Gender and Sexuality through the Life Course* argues that the gendered structure of temporality (defined in the dual sense of everyday time as well as age and stage of life) is a key factor underpinning the stalling of the gender revolution. Taking as its central focus the idealised young woman who serves as the mascot of contemporary success, this book demonstrates how the celebration of the Girl is (i) representative of social mobility, educational and professional achievement; (ii) possesses diligence, docility and emotional intelligence, and (iii) displays a reassuring sexuality and youthfulness – but is constructed from the outset to have a fleetingly short life span. Pickard undertakes a theoretical and empirical exploration of the contemporary female experience of education, work, motherhood, sexuality, the challenge of having-it-all. Furthermore, through additional analysis of the transitional ‘reproductive regime’ from youth into mid-life and beyond, this insightful monograph aims to demonstrate how age and time set very clear limits to what is possible and desirable for the female self; yet how the latter factors also, if used reflexively, can provide the key means of resisting and challenging patriarchy. This book is aimed at a broad interdisciplinary audience located in gender studies, age studies, culture studies, sociology and psychology; accessible for advanced undergraduates and beyond.

the bell jar pdf: *Carol Ann Duffy* Jane Dowson, 2016-05-17 This is the only monograph to consider the entire thirty-year career, publications, and influence of Britain's first female poet laureate. It outlines her impact on trends in contemporary poetry and establishes what we mean by ‘Duffy-esque’ concerns and techniques. Discussions of her writing and activities prove how she has championed the relevance of poetry to all areas of contemporary culture and to the life of every human being. Individual chapters discuss the lyrics of ‘love, loss, and longing’; the socially motivated poems about the 1980s; the female-centred volumes and poems; the relationship between poetry and public life; and poetry and childhood and written for children. The book should whet the appetite of readers who know little of Duffy’s work to find out more, while providing students and scholars with an in-depth analysis of the poems in their contexts. It draws on a wide range of critical works and includes an extensive list of further reading.

the bell jar pdf: *Installation art as experience of self, in space and time* Christine Vial Kayser, Sylvie Coëllier, 2021-09-07 Installation art has modified our relationship to art for over fifty years by soliciting the whole body, demonstrating its sensitivity to space, surroundings, and the living beings with which it is constantly interacting. This book analyses this modification of perception through phenomenological approaches convoking Husserl, Heidegger, Merleau-Ponty, as well as Levinas, Depraz, and the neuroscientist Varela. This theoretical framework is implicit in the various case studies which revisit works that have become classic or emblematic by Carl Andre, Bruce Nauman, Dan Graham; inaugural experiments that remain available only through photographic and written archives by Jean-Michel Sanejouand, Philippe Parreno, as well as the influence of the mode in the realm of music. The book also examines the transference of this Western form to Asia, revealing how it resonates with ancient Asian representations and practices—often associated with the spiritual. The distinct chapters underpin the role of space as a metaframe, the common ground of the various installations. While the nature and agency of space varies—from social, historical space, leisurely or political space, inner psychological space, to shared empty space—these installations reveal the chiasm between the individual body and the outside space. The chapters bear testimony of the process in which the physical journey of the spectator’s body within a material—at times invisible—space and its structural components takes place in time, as a succession of micro-experiences. ‘Installation art as experience of self, in space and time’ adds to the existing literature of art history a level of theoretical, experiential and transcultural analysis that will make this inquiry relevant to both university students and independent researchers in the academic fields

of philosophy, psychology, aesthetics, art theory and history, religious and Asian studies.
