the fire cat pdf: *Design by Fire* Emily Schlickman, Brett Milligan, 2023-08-31 Across the world, the risks of wildfires are increasing and expanding. Due to past and current human actions, we dwell in the age of fire - the Pyrocene - and the many challenges and climate adaptation questions it provokes. Exploring our past and current relationships with fire, this book speculates on the pyro futures yet to be designed and cared for. Drawing upon fieldwork, mapping, drone imagery, and interviews, this publication curates 27 global design case studies within the vulnerable and dynamic wildland-urban interface and its adjacent wildlands. The book catalogs these examples into three approaches: those that resist the creative and transformative power of fire and forces of landscape change, those that embrace and utilize those forces, and those that intentionally try to retreat and minimize human intervention in fire-prone landscapes. Rather than serving as a book of neatly packaged solutions, it is a book of techniques to be considered, tested, and evaluated in a time of fire.

Likewise, AC-130 crews were deemed unruly "biker gangs," but performed magnificently in every major US military operation from 1976 to 1995. Most of these combat operations were cloaked in secrecy, but records once classified for up to twenty years have now been opened. Based on this newly declassified information and hundreds of interviews with SOF veterans, *Ghostriders 1976-1995* is the first authoritative historical account of the AC-130 operations, written by an AC-130 Aerial Gunner who participated in every AC-130 combat operation from 1980 through 1994.

the fire cat pdf: Interrogation: World War II, Vietnam, and Iraq James A. Stone, David P. Shoemaker, Nicholas R. Dotti, 2010-03-09 In September 2004, the Intelligence Science Board, an advisory board appointed by the Director of National Intelligence, initiated the Study on Educating Information (EI). This study is an ongoing effort to review what is known scientifically about interrogation and other forms of human intelligence collection and to chart a path to the future. As part of our efforts, we have worked closely with faculty and students of the National Defense Intelligence College. The NDIC Press published *Educating Information: Interrogation: Science and Art, Foundations for the Future*, a book based on Phase I of the Study on EI. Three students, Special Agent James Stone, U.S. Air Force; Special Agent David Shoemaker, U.S. Air Force; and Major Nicholas Dotti, U.S. Army, completed master's thesis studies during Academic Year 2006-07 on topics related to interrogation. Special Agent Stone researched U.S. efforts during World War II to develop language and interrogation capacities to deal with our Japanese enemy. He found that military leaders, often working with civilian counterparts, created and implemented successful strategies, building on cultural and linguistic skills that substantially aided the war effort for the U.S. and its Allies. Special Agent Shoemaker studied the experiences of three successful interrogators during the Vietnam War. Like Stone, Shoemaker highlights the importance of a deep understanding of the language, psychology, and culture of adversaries and potential allies in other countries. Major Dotti examined recent policy and practice with regard to tactical and field interrogations, especially with regard to the efforts of Special Forces soldiers in Iraq. He concludes that the letter of current doctrine contradicts its intent. Major Dotti offers recommendations that he believes are both consistent with the intent of military doctrine and likely to increase the effectiveness of U.S. interrogation practices in the field--P. v.

the fire cat pdf: The Achilles Heel of Democracy Rachel E. Bowen, 2017-06-26 Featuring the first in-depth comparison of the judicial politics of five under-studied Central American countries, *The Achilles Heel of Democracy* offers a novel typology of 'judicial regime types' based on the political independence and societal autonomy of the judiciary. This book highlights the under-theorized influences on the justice system - criminals, activists, and other societal actors - and the ways that they intersect with more overtly political influences. Grounded in interviews with judges, lawyers, and activists, it presents the 'high politics' of constitutional conflicts in the context of national political conflicts as well as the 'low politics' of crime control and the operations of trial-level courts. The book begins in the violent and often authoritarian 1980s in Guatemala, El Salvador, Honduras, and Nicaragua, and spans through the tumultuous 2015 'Guatemalan Spring'; the evolution of Costa Rica's robust liberal judicial regime is traced from the 1950s.

the fire cat pdf: Stravinsky and the Russian Traditions, Volume Two Richard Taruskin,

2016-04-27 This book undoes 50 years of mythmaking about Stravinsky's life in music. During his spectacular career, Igor Stravinsky underplayed his Russian past in favor of a European cosmopolitanism. Richard Taruskin has refused to take the composer at his word. In this long-awaited study, he defines Stravinsky's relationship to the musical and artistic traditions of his native land and gives us a dramatically new picture of one of the major figures in the history of music. Taruskin draws directly on newly accessible archives and on a wealth of Russian documents. In Volume One, he sets the historical scene: the St. Petersburg musical press, the arts journals, and the writings of anthropologists, folklorists, philosophers, and poets. Volume Two addresses the masterpieces of Stravinsky's early maturity—Petrushka, The Rite of Spring, and Les Noces. Taruskin investigates the composer's collaborations with Diaghilev to illuminate the relationship between folklore and modernity. He elucidates the Silver Age ideal of neonationalism—the professional appropriation of motifs and style characteristics from folk art—and how Stravinsky realized this ideal in his music. Taruskin demonstrates how Stravinsky achieved his modernist technique by combining what was most characteristically Russian in his musical training with stylistic elements abstracted from Russian folklore. The stylistic synthesis thus achieved formed Stravinsky as a composer for life, whatever the aesthetic allegiances he later professed. Written with Taruskin's characteristic mixture of in-depth research and stylistic verve, this book will be mandatory reading for all those seriously interested in the life and work of Stravinsky.

the fire cat pdf: A War of Logistics Charles R. Shrader, 2015-10-23 Following the French reoccupation of Indochina at the end of World War II, the pro-Communist Vietnamese nationalists, or Viet Minh, launched a grassroots insurgency that erupted into a full-fledged war in 1949. After nearly ten years of savage combat, the western world was stunned when Viet Minh forces decisively defeated the French Union army at the battle of Dien Bien Phu in May 1954. Logistics dominated every aspect of the First Indochina War, dictating the objectives, the organization of forces, the timing and duration of the operations, and even the final outcome. In *A War of Logistics*, Charles R. Shrader meticulously examines both French Union and Viet Minh logistical units during the period of active conventional warfare, as well as external support provided to the French by the United States and to the Vietnamese by China. Although the Vietnamese had few advantages over their opponents, their military leaders brilliantly employed a highly committed network of soldiers and civilians, outfitted to accommodate the challenging terrain on which they fought. Drawing on extensive research such as declassified intelligence documents, the reports of French participants, and accounts by Viet Minh leaders, including Vo Nguyen Giap and Ho Chi Minh, *A War of Logistics* provides in-depth coverage of the often-ignored but critically important topic of logistics in modern military campaigns.

the fire cat pdf: Experience, Identity & Epistemic Injustice within Ireland's Magdalene Laundries Chloe K. Gott, 2022-02-10 How are the identities of women shaped by religious

disciplinary processes in Magdalene laundries and how do women re-engage with their sense of self after leaving the institutions? Chloë K. Gott situates these questions within the current cultural climate in which the institutions now sit, considering how they fit into Ireland's present as well as its past. This book represents the first significant secondary analysis to be conducted of 81 oral history interviews recorded as part of the Government of Ireland Collaborative Research project, 'Magdalene Institutions: Recording an Archival and Oral History', funded by the Irish Research Council. These were taken with women formerly incarcerated in these institutions, as well as others associated with this history. Grounded in qualitative analysis of this archive, the book is structured around the voices and words of survivors themselves. With a strong focus on how the experience of being incarcerated in a Magdalene laundry impacted on the gendered religious selves of the women, this book tracks the process of entering, working in and leaving a laundry, explored through the lens of epistemic injustice.
