teen romance books online: Inclusive Young Adult Fiction Melanie Ramdarshan Bold, 2019-01-04 This book examines 'diversity', or the lack thereof, in young adult fiction (YA) publishing. It focuses on cultural hegemony in the United Kingdom and explores how literary culture aimed at young adults reproduces and perpetuates 'racial' and ethnic cultural hierarchies. Diversity is described by the We Need Diverse Books project as 'all diverse experiences, including (but not limited to) LGBTQIA, Native, people of color, gender diversity, people with disabilities, and ethnic,

cultural, and religious minorities'. This study focuses on people of colour. While previous studies have looked at the representation of ethnic minorities in books for children and young adults, this book examines the experiences of 'own voice' cultural producers that create a counter-narrative. Specifically, this book will investigate the output and experiences of British young adult fiction authors of colour (BAME authors) published in the UK during the period 2006-2016, drawing upon semi-structured interviews with a sample of authors.

teen romance books online: Love Thy Self - Teen Version Author Kharisma/D.L. Miller, 2009-12-01 Many readers, who happen to pick up this book, may ask why I would choose to write this with an already large array of other self help materials collecting dust on the bookshelves. Well, with my perusal of the bookstores and libraries, I have found very few books written to address the self esteem of people of color, and the great need for them to celebrate self love and self preservation. The mission of this book is to allow African-American, Latin American, and young people of color the opportunity to embrace their individuality above societal norms, cultural expectations, gender roles, or any other forms of classism. Though we all fit into specific groups according to race, culture, and class, we people of color all collectively have something special, which makes us uniquely beautiful. One may also ask why I would target pre-teens/teens of color as opposed to speaking to all pre-teens/teens. One good reason to mention is the fact that I am an African American woman who has enjoyed the journey of self discovery; its twist and turns, ups and downs, and all of its ins and outs. Despite all the obvious obstacles I have had as an African American woman, I have learned to love who I am and achieve success with great pride. Secondly, I write to hopefully encourage and empower pre-teens/teens of color to love themselves from the depths of their souls to the surface of their mahogany, honey-brown, or caramel skin. As beautiful as we are, collectively, we have some serious issues with self esteem and confidence. Thirdly, I pray that this book will help young girls and boys to love who they are, denying themselves for no one.

Henning, Jean Donham Ph.D., 2020-06-09 Exploring the ways in which today's Internet-savvy young people view and use information to complete school assignments and make sense of everyday life, this new edition provides a review of the literature since 2010. The development of information literacy skills instruction can be traced from its basis in traditional reference services to its current growth as an instructional imperative for school librarians. Reviewing the scholarly research that supports best practices in the 21st-century school library, this book contains insights into improving instruction across content areas—drawn from the scholarly literatures of library and information studies, education, communication, psychology, and sociology—that will be useful to school, academic, and public librarians and LIS students. In this updated fourth edition, special attention is given to recent studies of information seeking in changing instructional environments made possible by the Internet and new technologies. This new edition also includes new chapters on everyday information seeking and motivation and a much-expanded chapter on Web 2.0. The new AASL standards are included

and explored in the discussion. This book will appeal to LIS professors and students in school librarianship programs as well as to practicing school librarians.
