Genghis Khan is history's greatest conqueror. As a teenager he was an outcast fleeing enemies on a mountain in northern Mongolia, an exile, a nobody. Yet it took only twenty years for Genghis to build the largest land empire in history - four times the size of Alexander's, twice the size of Rome's. How did he do it? What lessons does his life reveal about the nature of leadership? What is 'greatness' in leadership? What traits did Genghis possess exactly? Were they unique, or might some apply in other times and other places - even here and today? In Leadership Secrets of Genghis Khan, John

Man re-examines the life of Genghis Khan to discover the qualities, characteristics and strategies that made him the great leader that he was. The answers are sometimes surprising. Genghis was far from just the tyrant that history records, but rather a leader of exceptional vision and modernity. temujin leadership book: *The Blue Wolf* Inoue Yasushi, 2008-11-19 One of the world's most ruthless warriors, Chinggis Khan conquered nearly all of Asia in the twelfth and thirteenth centuries, transforming the scattered and impoverished Mongols into an exceptionally proud and powerful nation. In this riveting and thoroughly researched portrait, Japan's celebrated epic novelist drives at the root of the Khan's great desires and insatiable appetite for supremacy. Beginning with his birth in 1162, *The Blue Wolf* follows the crucial alliances that led to Chinggis Khan's great campaigns in North China, Bukhara, and Samarkand, as well as the state of Khorazm. The Khan was obsessed with his ancestry, not knowing whether he was the descendent of the blue wolf (mythical progenitor of the Mongols and the noble Borjigin line) or merely the bastard son of a Merkid tribesman. For Inoue

Yasushi, Chinggis's ancestral anxiety lies at the center of his relentless push for empire. He struggled with his paternity as intensely as he fought his battles, and his victories stood as proof that the brave warrior was a true Mongol. The question of paternity also formed the largest wedge between Chinggis and his eldest son, Jochi, a boy born in captivity and of similarly questionable heritage. Hailed for its sophistication and rich imagining of a remote world, *The Blue Wolf* puts a human cast on a legendary force that changed Asia and the world.

It helped to spread trade and technology, and it also contributed to the fall of the islamic caliphate. This book tells the story of genghis khan's life and conquests. When we think about history, we rarely pay much attention to the most destructive floods, the worst winters, the most devastating droughts or the ways that ecosystems have changed over time. In The Earth Transformed, Peter Frankopan, one of the world's leading historians, shows that the natural environment is a crucial, if not the defining, factor in global history - and not just of humankind. Volcanic eruptions, solar activities, atmospheric, oceanic and other shifts, as well as anthropogenic behaviour, are fundamental parts of the past and the present. In this magnificent and groundbreaking book, we learn about the origins of our species: about the development of religion and language and their relationships with the environment; about how the desire to centralise agricultural surplus formed the origins of the bureaucratic state; about how growing demands for harvests resulted in the increased shipment of enslaved peoples; about how efforts to understand and manipulate the weather have a long and deep history. All provide lessons of profound importance as we face a precarious future of rapid global warming. Taking us from the Big Bang to the present day and beyond, The Earth Transformed forces us to reckon with humankind's continuing efforts to make sense of the natural world. ----- 'This is epic, gripping, original history that leaps off the page' Sathnam Sanghera, author of Empireland 'All Historians aiming to tell a narrative face the problem of when exactly to start it.
