suite francaise download: *Adobe LiveCycle Designer, Second Edition* J. P. Terry, 2013-11-11 Creating intelligent forms can be challenging. Forms have to present critical information in a

compact format. Interactive forms that respond to data entry by the user require some programming. Dynamic forms also have to work seamlessly with the database that collects customer information. Plus, forms need to be designed well to eliminate confusion and entice completion by the user. As shown in this book, LiveCycle Designer addresses the many objectives of forms creation. It offers a digital handshake between the graphic designer and the data programmer. LiveCycle Designer lets form designers create more compelling and dynamic documents than is possible with Acrobat or Microsoft Word. Forms created with LiveCycle Designer automatically expand to accommodate different amounts of data and report that information back to a database. The new version of LiveCycle Designer (ES4) allows for the first time forms to be deployed in HTML5 format, so they can be used on a wider array of devices (page sizes can adjust to smaller screens) and in a wider range of software systems (no special reader or plugin needed to use them, just a Web browser). Adobe LiveCycle Designer: Creating Dynamic PDF and HTML5 Forms for Desktop and Mobile Applications shows design strategies as well as the technical underpinnings of PDF and XFA (Adobe XML Forms Architecture), the tools necessary to create intelligent forms.

suite francaise download: Software Quality Martin Wieczorek, Dirk Meyerhoff, 2011-06-28 1. 1 The Pressure on Information Technology (IT) In today's environment, the ability to react quickly to change by reducing the development life cycle in order to be first to market will give a company an important competitive edge. -James Martin The market conditions of the 21 st century put business under continual pressure. The most successful companies are those who are able to reduce their

time to market, to launch initiatives before their competitors, to respond very rapidly to opportunities in the marketplace or to change direction in response to a move by the competition or a change in circumstances. All of these business initiatives rely on support from Information Technology (IT). For a business to launch a new product in three months time, the supporting IT processes must be available and working in that three month time frame. In this fast moving environment, late IT delivery is not acceptable and may pose a major risk to the business. The marketplace of 21 st century business measures timescales in months, whereas in the past, timescales of two to three years were more typical. Internet related and e business projects frequently require even tighter timescales, measured in days rather than months. This need for speed puts tremendous pressure on IT departments. Pressure does not just come from the need for speed. There is also an ever-increasing rate of change within business.

suite francaise download: Semantics in Adaptive and Personalised Systems Pasquale Lops, Cataldo Musto, Fedelucio Narducci, Giovanni Semeraro, 2019-09-18 This monograph gives a complete overview of the techniques and the methods for semantics-aware content representation and shows how to apply such techniques in various use cases, such as recommender systems, user profiling and social media analysis. Throughout the book, the authors provide an extensive analysis of the techniques currently proposed in the literature and cover all the available tools and libraries to implement and exploit such methodologies in real-world scenarios. The book first introduces the problem of information overload and the reasons why content-based information needs to be taken into account. Next, the basics of Natural Language Processing are provided, by describing operations such as tokenization, stopword removal, lemmatization, stemming, part-of-speech tagging, along with the main problems and issues. Finally, the book describes the different approaches for semantics-aware content representation: such approaches are split into 'exogenous' and 'endogenous' ones, depending on whether external knowledge sources as DBpedia or geometrical models and distributional semantics are used, respectively. To conclude, several successful use cases and an extensive list of available tools and resources to implement the approaches are shown. *Semantics in Adaptive and Personalised Systems* definitely fills the gap between the extensive literature on content-based recommender systems, natural language processing, and the different types of semantics-aware representations.

suite francaise download: *French Arms Exports* Lucie Béraud-Sudreau, 2020-03-25 From De Gaulle onwards, France's strategic independence has been predicated on self-sufficiency in modern weapons. To achieve and maintain the requisite defence-industrial base, in the context of limited domestic orders, Paris sought to promote the export of its arms. During the Cold War, this underpinned but was also an expression of France's determination to resist bipolar domination. France offered customers around the world an alternative to reliance on one superpower or the other; and in doing so it generated the revenue to support an extensive domestic arms industry. The end of the Cold War ushered in fundamental changes, however: Western defence spending shrank and the global market was turned upside down. While France's arms-export policy was less affected by human-rights concerns than other democracies, it was not immune to pressures stemming from the consolidation of Europe's defence-industrial base and the increased interest of the EU in regulating the arms trade. This Adelphi book considers how France has responded to changing political and market circumstances in the way that it promotes and controls the export of weapons. It examines the rationale for considering a liberal arms-export policy as essential to French independence, and the institutional arrangements that underpinned this. It tracks the dramatic changes in the global arms market since 1990, in terms of demand and market competition, and charts the response of the French government to these changes. The book underlines how the French machinery of government, as a directing force behind the defence industry, has been resistant to the notion of export restraint - even in the case of sales to authoritarian regimes. However, it argues that France now faces a dilemma over whether to continue with a long-successful course, or to moderate its independence through greater collaboration to bolster European integration and better compete globally.

suite francaise download: Social Media Marketing Uwe Hettler, 2012-11-15 das Buch greift Aspekte des Web 2.0 auf und beleuchtet diese speziell aus Marketingperspektive. Kennzeichen des Web 2.0 bzw. des Mitmach-Webs sind neue Möglichkeiten der Teilnahme und des sozialen Austausches, die tradierte Rollenverständnisse einer Trennung zwischen Produzenten und Konsumenten aufweichen. So genannte Prosumer erbringen heute verschiedenartige Leistungen für Unternehmen und nehmen zum Teil wichtige Rollen im Innovationsprozess ein. Konsumenten tauschen ihre Produkt- und Markenerfahrungen über Blogs, Foren und Communities aus und erreichen über Multiplikatoreffekte oft schnell eine große Öffentlichkeit. Die klassische Unternehmenskommunikation verliert dadurch zunehmend ihren Hoheitsanspruch und zu einem gewissen Maß die Kontrolle über Kommunikationsprozesse. Unternehmen müssen sich vom Paradigma der - kontrollierten Information - verabschieden und neue Formen des Zuhörens und des onlinebasierten Kundendialogs lernen. Neue Herangehensweisen werden auch für das Online-Marketing gefordert, das neben dem Suchmaschinenmarketing schwerpunktmäßig noch auf Banner-Werbung setzt, deren Grenzen sich immer stärker abzeichnen. Dass das unternehmerische Marketing im Licht dieser Entwicklungen vor umwälzenden Herausforderungen steht, wird heute von Fachvertretern fast schon gebetsmühlenartig unterstrichen. Das Buch richtet sich an Entscheider in Marketingabteilungen und Werbeagenturen sowie an Studierende, die sich im Rahmen Ihrer Bachelor- und Masterausbildung mit Fragen des Marketings im Kontext von neuen Online-Medien beschäftigen. Darüber hinaus findet es Verwendung in Studiengängen wie Wirtschaftsinformatik, IT-Servicemanagement und Multimedia Marketing sowie Media Processing and Interactive Services.
