thunder in different languages: Are Some Languages Better than Others? R. M. W. Dixon, 2016-04-28 This book sets out to answer a question that many linguists have been hesitant to ask: are some languages better than others? Can we say, for instance, that because German has three genders and French only two, German is a better language in this respect? Jarawara, spoken in the Amazonian jungle, has two ways of showing possession: one for a part (e.g. 'Father's foot') and the other for something which is owned and can be given away or sold (e.g. 'Father's knife'); is it thus a better language, in this respect, than English, which marks all possession in the same way? R. M. W. Dixon begins by outlining what he feels are the essential components of any language, such as the ability to pose questions, command actions, and provide statements. He then discusses desirable features including gender agreement, tenses, and articles, before concluding with his view of what the ideal language would look like - and an explanation of why it does not and probably never will exist. Written in the author's usual accessible and engaging style, and full of personal anecdotes and unusual linguistic phenomena, the book will be of interest to all general language enthusiasts as well as to a linguistics student audience, and particularly to anyone with an interest in linguistic typology.

thunder in different languages: Literary Multilingualism in the Borderlands Marianna Deganutti, 2023-08-24 This book focuses on literary multilingualism and specifically on the challenging condition of writing in Trieste, a key European borderland located at the intersection between the Latin, Germanic and Slav civilisations. By focusing on some of the most representative modern writers operating in the area, such as Italo Svevo, Boris Pahor, Claudio Magris and James Joyce, this work offers a wide-ranging discussion of multilingual practices deriving from the different language choices made by these writers. Along with the most common manifest strategies, such as code-switching and hybridisations, Deganutti highlights how Triestine writers found innovative latent practices to engage with multilingualism, such as writing in an analogical way or exploiting internal linguistic stratifications. Moreover, she shows how they provided answers to the several linguistic, cultural and even political challenges they were subjected to, with the result of redefining linguistic boundaries that clearly separate different tongues. This book will be of interest to graduate students, researchers and academics interested in literary multilingualism in the fields of

sociolinguistics, borderland studies and comparative literature.

thunder in different languages: Figured Worlds Professor John Clammer, J. R. Clammer, Sylvie Poirier, Eric Schwimmer, 2004-01-01 World Visions can conceive of everything except alternative world visions. If this pronouncement by Umberto Eco is right, how can any ethnic group conceive of living with another group on the same territory - in Canada or elsewhere - if their world visions are incompatible? Can we sidestep incompatible world visions or should we try to understand them? *Figured Worlds* explores the possibilities of equilibrium between commitments to mutual understanding and the framing of strategies of negotiation. This collection begins its rich analytical investigation by describing how people - Australian Aborigines, New Zealand Maori, Japanese, and Africans - first learn the figured worlds of their own culture, made up of sensations, affirmations and will, prophecy, revelation, myth, dream, and metamorphoses. It then sets out how diverse figured worlds within a given social system are related, and concludes by offering insightful mappings of the dynamics of these relations, perceived in both their existential-ontological aspects, as well as their material-practical means. Comprising scholarship that is half Canadian and half British, this work offers important foundational perspectives into the thought worlds of cultures found within other cultures.
