sublime art pdf: Installation Art and the Practices of Archivalism David Houston Jones, 2016-03-31 On the leading edge of trauma and archival studies, this timely book engages with the recent growth in visual projects that respond to the archive, focusing in particular on installation art. It traces a line of argument from practitioners who explicitly depict the archive (Samuel Beckett, Christian Boltanski, Art & Language, Walid Raad) to those whose materials and practices are archival (Mirosław Bałka, Jean-Luc Godard, Silvia Kolbowski, Boltanski, Atom Egoyan). Jones considers in particular the widespread nostalgia for 'archival' media such as analogue photographs and film. He analyses the innovative strategies by which such artefacts are incorporated, examining five distinct types of archival practice: the intermedial, testimonial, personal, relational and monumentalist.

sublime art pdf: Samuel Johnson's Pragmatism and Imagination Stefka Ritchie, 2018-11-07 The

central theme of this book is an under-studied link between the canon of Francis Bacon's and Isaac Newton's scientific and philosophical thought and Samuel Johnson's critical approach that can be traced in a textual study of his literary works. The interpretive framework adopted here encourages familiarity with the history and philosophy of science, confirming that the history of ideas is an entirely human construct that constitutes an integral part of intellectual history. This further endorses the argument that intermediality can only be of benefit to future research into the richness of Johnson's literary style. As perceived boundaries are crossed between conventionally distinct communication media, the profile of Johnson that emerges is of a writer of passionate intelligence who was able to combine a pragmatic approach to knowledge with flights of imagination as a true artist.

sublime art pdf: *Alchemy in Contemporary Art* Urszula Szulakowska, 2017-07-05 Alchemy in Contemporary Art analyzes the manner in which twentieth-century artists, beginning with French Surrealists of the 1920s, have appropriated concepts and imagery from the western alchemical tradition. This study examines artistic production from c. 1920 to the present, with an emphasis on the 1970s to 2000, discussing familiar names such as Andre Breton, Salvador Dali, Yves Klein, Joseph Beuys, and Anselm Kiefer, as well as many little known artists of the later twentieth century. It provides a critical overview of the alchemical tradition in twentieth-century art, and of the use of occultist imagery as a code for political discourse and polemical engagement. The study is the first to examine the influence of alchemy and the Surrealist tradition on Australian as well as on Eastern European and Mexican art. In addition, the text considers the manner in which women artists such as Leonora Carrington, Remedios Varo, and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes.

sublime art pdf: The Concept of the Animal and Modern Theories of Art Roni Grén, 2017-07-31 This book examines the importance of the animal in modern art theory, using classic texts of modern aesthetics and texts written by modern artists to explore the influence of the human-animal relationship on nineteenth and twentieth century artists and art theorists. The book is unique due to its focus on the concept of the animal, rather than on images of animals, and it aims towards a theoretical account of the connections between the notions of art and animality in the modern age. Roni Grén's book spans various disciplines, such as art theory, art history, animal studies, modernism, postmodernism, posthumanism, philosophy, and aesthetics.

sublime art pdf: Digital Uncanny Kriss Ravetto-Biagioli, 2019 We are now confronted with a new type of uncanny experience, an uncanny evoked by parallel processing, aggregate data, and cloud-computing. The digital uncanny does not erase the uncanny feeling we experience as *d j vu* or when confronted with robots that are too lifelike. Today's uncanny refers to how non-human devices (surveillance technologies, algorithms, feedback, and data flows) anticipate human gestures, emotions, actions, and interactions, thus intimating that we are but machines and that our behavior is predicable precisely because we are machinic. It adds another dimension to those feelings in which we question whether our responses are subjective or automated - automated as in reducing one's subjectivity to patterns of data and using those patterns to present objects or ideas that would then elicit one's genuinely subjective-yet effectively preset-response. In fact, this anticipation of our responses is a feedback loop that we humans have produced by designing software that can study our traces, inputs, and moves. In this sense one could say that the digital uncanny is a trick we play on ourselves, a trick that we would not be able to play had we not developed sophisticated digital technologies. Digital Uncanny explores how digital technologies, particularly software systems working through massive amounts of data, are transforming the meaning of the uncanny that Freud tied to a return of repressed memories, desires, and experiences to their anticipation. Through a

close reading of interactive and experimental art works of Rafael Lozano-Hemmer, Bill Viola, Simon Biggs, Sue Hawksley, and Garth Paine, this book is designed to explore how the digital uncanny unsettles and estranges concepts of self, affect, feedback and aesthetic experience, forcing us to reflect on our relationship with computational media and by extension our relationship to each other and our experience of the world.

sublime art pdf: *Lucan and the Sublime* Henry J. M. Day, 2013-01-24 This is the first comprehensive study of the sublime in Lucan. Drawing upon renewed literary-critical interest in the tradition of philosophical aesthetics, Henry Day argues that the category of the sublime offers a means of moving beyond readings of Lucan's *Bellum Civile* in terms of the poem's political commitment or, alternatively, nihilism. Demonstrating in dialogue with theorists from Burke and Kant to Freud, Lyotard and Ankersmit the continuing vitality of Longinus' foundational treatise *On the Sublime*, Day charts Lucan's complex and instructive exploration of the relationship between sublimity and ethical discourses of freedom and oppression. Through the *Bellum Civile*'s cataclysmic vision of civil war and metapoetic accounts of its own genesis, through its heated linguistic texture and proclaimed effects upon future readers and, most powerfully of all, through its representation of its twin protagonists Caesar and Pompey, Lucan's great epic emerges as a central text in the history of the sublime.

sublime art pdf: *Grenzbeschreitungen* Martin Kolmar, 2021-10-11 Wie wollen wir leben und wie können wir unserem Leben Sinn geben angesichts der drängenden Krisen der Gegenwart? Wie können solche Fragen überhaupt beantwortet werden, wenn eine säkulare Kultur scheinbar nur Antworten auf Fragen nach dem wie?, nicht aber nach dem wozu? erlaubt. Martin Kolmar deutet im vorliegenden Buch die gegenwärtigen und bevorstehenden Krisen, allen voran die Klimakrise, als Krise der westlichen Denk- und Wahrnehmungsweisen und versucht einen Ausweg daraus aufzuzeigen. Dazu beginnt er mit einer Analyse westlicher Vorstellungswelten aus der Perspektive des Erhabenen. Es zeigt sich, dass das Erhabene als Grenzerfahrung überraschende und relevante neue Perspektiven auf die Gegenwart öffnet und zugleich einen Weg zu einer säkularen, rationalen Form der Sinnerfahrung erkennbar macht. Das Besondere dieses Buches ist die Verknüpfung philosophischer und gesellschafts- und kulturwissenschaftlicher Forschung mit Erkenntnissen der Psychologie und der Neurowissenschaft. Es zeigt auf, dass traditionelle Vorstellungen des Guten Lebens und der Verortung der eigenen Existenz als Teil der Natur, mit moderner Forschung korrespondieren. Ist man bereit, sich hierauf einzulassen, stellt insbesondere die Bedrohung durch die Klimakrise nicht nur ein mögliches Katastrophenszenario und eine große technologische Herausforderung dar, sondern eine Chance für ein besseres Leben, welches aus einer anderen Haltung ihm gegenüber resultiert.

sublime art pdf: *Art for Coexistence* Christine Ross, 2022-11-22 An exploration of how contemporary art reframes and humanizes migration, calling for coexistence—the recognition of the interdependence of beings. In *Art for Coexistence*, art historian Christine Ross examines contemporary art's response to migration, showing that art invites us to abandon our preconceptions about the current "crisis"—to unlearn them—and to see migration more critically, more disobediently. We (viewers in Europe and North America) must come to see migration in terms of coexistence: the interdependence of beings. The artworks explored by Ross reveal, contest, rethink, delink, and relink more reciprocally the interdependencies shaping migration today—connecting citizens-on-the-move from some of the poorest countries and acknowledged citizens of some of the wealthiest countries and democracies worldwide. These installations, videos, virtual reality works, webcasts, sculptures, graffiti, paintings, photographs, and a rescue boat, by artists including Banksy, Ai Weiwei, Alejandro González Iñárritu, Laura Waddington, Tania Bruguera, and others, demonstrate art's power to mediate experiences of migration. Ross argues that art invents a set of interconnected calls for more mutual forms of coexistence: to historicize, to become responsible, to empathize, and to story-tell. Art history, Ross tells us, must discard the legacy of imperialist museology—which dissocializes, dehistoricizes, and depoliticizes art. It must reinvent itself, engaging with political philosophy, postcolonial, decolonial, Black, and Indigenous studies, and critical refugee and migrant studies.

sublime art pdf: *Exploring Materiality and Connectivity in Anthropology and Beyond* Philipp Schorch, Martin Saxer, Marlen Elders, 2020-03-30 *Exploring Materiality and Connectivity in Anthropology and Beyond* provides a new look at the old anthropological concern with materiality and connectivity. It understands materiality not as defined property of some-thing, nor does it take connectivity as merely a relation between discrete entities. Somewhat akin to Heisenberg's uncertainty principle, it sees materiality and connectivity as two interrelated modes in which an entity is, or more precisely – is becoming, in the world. The question, thus, is how these two modes of becoming relate and fold into each other. Throughout the four-year research process that led to this book, the authors approached this question not just from a theoretical perspective; taking the suggestion of 'thinking through things' literally and methodologically seriously, the first two workshops were dedicated to practical, hands-on exercises working with things. From these workshops a series of installations emerged, straddling the boundaries of art and academia. These installations served as artistic-academic interventions during the final symposium and are featured alongside the other academic contributions to this volume. Throughout this process, two main themes emerged and structure Part II, Movement and Growth, and Part III, Dissolution and Traces, of the present volume, respectively. Part I, Conceptual Grounds, consists of two chapters offering conceptual takes on things and ties – one from anthropology and one from archaeology. As interrelated modes of becoming, materiality and connectivity make it necessary to coalesce things and ties into thing~ties – an insight toward which the chapters and interventions came from different sides, and one in which the initial proposition of the editors still shines through. Throughout the pages of this volume, we invite the reader to travel beyond imaginaries of a universe of separate planets united by connections, and to venture with us instead into the thicket of thing~ties in which we live.

sublime art pdf: *Ethical Materialities in Art and Moving Images* Silke Panse, 2024-12-26 Starting from the premise that after modernism and postmodernism □ in the Anthropocene □ an artwork cannot rest upon its separation from the planet, this volume develops new ethical practice and thought with respect to art, philosophy and moving images. Practitioners and theorists examine how the relations between the ethical and the material figure in a context in which a dearth of ethical practice and thought has caused the materialities of the Anthropocene and the climate catastrophe. Ethics are generally regarded as constituted through immaterial relations guided by

moral imperatives. By contrast, this volume argues that the singular ethicalities that are manifested in a work cannot be captured by abstract ethics. The explorations of the ethical here are not prescriptive, but creative. Through artistic and philosophical thought and practice, the contributions move beyond the division between an active practice of ethics and a contemplative theory of aesthetics. They ask what ethicalities and materialities are at play in the relations between the artist, the art, their worlds and the planet after new materialism and posthumanism. Rather than transcending the ethical through the material or the material through the ethical, the contributions articulate the singular relations between them and consider the inter- and intra-active ethical and material relations of art and images in biodiverse environments. They suggest that to bring out the ethical dimensions of the material and the material dimension of the ethical – without identifying one with the other – is a responsibility of art and images.

sublime art pdf: Democracy and Beauty Robert Gooding-Williams, 2025-06-03 What is beauty, and what is its political function? In what ways might it help undermine white supremacy and cultivate a more democratic political culture? *Democracy and Beauty* shines a light on W. E. B. Du Bois's attempts to answer these questions during the decade surrounding the First World War and, in so doing, offers a groundbreaking account of the philosopher's aesthetics. Robert Gooding-Williams reconstructs Du Bois's defense of the political potential of beauty to challenge oppressive systems and foster an inclusive democracy. White supremacy is a powerful force that defies rational revision, Du Bois argued, because it is rooted in the entrenched routines of its adherents. Beauty, however, has a distinctive role to play in the struggle against white supremacy. It can strengthen resolve and ward off despair by showing the oppressed that they can alter their social world, and it can unsettle and even transform the pernicious habits that perpetuate white supremacy. Gooding-Williams also explores Du Bois's account of the interplay among white supremacy, Christianity, capitalism, and imperialism as well as key tensions in his work. A rich engagement with Du Bois's philosophy of beauty, this book demonstrates the relevance of his social thought and aesthetics to present-day arguments about Black pessimism, Black optimism, and the aesthetic turn in Black studies.

sublime art pdf: Contemporary Photography and Theory Sally Miller, 2020-05-26 *Contemporary Photography and Theory* offers an essential overview of some of the key critical debates in fine art photography today. Building on a foundational understanding of photography, it offers an in-depth discussion of five topic areas: identity, landscape and place, the politics of representation, psychoanalysis and the event. Written in an accessible style, it introduces the critical literature relevant to photography that has emerged over recent decades. Moving beyond seminal works by writers such as Walter Benjamin, Roland Barthes, and Susan Sontag, it enables readers to explore an extended canon of theorists including Jacques Lacan, Judith Butler and Giorgio Agamben. The book is illustrated throughout and analyses a range of works by established and emergent artists in order to show how these theoretical concepts are central to understanding contemporary photography. These 15 short essays encourage readers to apply critical thinking to both their own work and that of others. They are the perfect starting point for essays as well being of suitable length for assigned readings, making this the ideal resource for learning about contemporary photography and theory.

sublime art pdf: Vitalitätseffekte Bettina Papenburg, 2023-06-21 Wie schaffen Bilder Wissen? Welche Rolle kommt der Ästhetik in der naturwissenschaftlichen Bildgebung zu? Was verändert sich an der Beweiskraft des Bildes durch die digitale Bilderzeugung? Bettina Papenburg befasst sich anhand von zellbiologischen Forschungs- und Lehrfilmen mit den bildgebenden Verfahren der computergestützten Mikroskopie. Aus einer medien- und filmwissenschaftlichen sowie kunst- und wissenschaftsgeschichtlichen Perspektive untersucht sie, wie digitale Bilder in der naturwissenschaftlichen Forschung als Erkenntnismedien wirken. Dabei zeigt sich, dass sich die fachlich geschulte, auf Erkenntnisgewinn ausgerichtete Wahrnehmung und die affektive Beteiligung an den Filmen nicht konträr zueinander verhalten, sondern einander bereichern und erweitern.

sublime art pdf: Charles Olson and American Modernism Mark Byers, 2018-05-03 This volume situates the work of American poet Charles Olson (1910-1970) at the centre of the early post-war American avant-garde. It shows Olson to have been one of the major advocates and theorists of American modernism in the late 1940s and early 1950s; a poet who responded fully and variously to the political, ethical, and aesthetic urgencies driving innovation across contemporary American art. Reading Olson's work alongside that of contemporaries associated with the New York Schools of painting and music (as well as the exiled Frankfurt School), the book draws on Olson's published and unpublished writings to establish an original account of early post-war American modernism. The development of Olson's work is seen to illustrate two primary drivers of formal innovation in the period: the evolution of a new model of political action pivoting around the radical individual and, relatedly, a powerful new critique of instrumental reason and the Enlightenment tradition. Drawing on extensive archival research and featuring readings of a wide range of artists including, prominently, Barnett Newman, Mark Rothko, David Smith, Wolfgang Paalen, and John Cage, *Charles Olson and American Modernism* offers a new reading of a major American poet and an original account of the emergence of post-war American modernism.

sublime art pdf: Steina Natalie Bell, 2025-03-11 The first comprehensive monograph in over a decade celebrating the work of pioneering video artist Steina, who is known for pushing perspective beyond the human-centered realm. Accompanying the related exhibition at MIT List Visual Arts Center and Buffalo AKG Art Museum, Steina brings renewed recognition to Steina (b. 1940, Iceland), tracing her oeuvre from early collaborative works with her partner Woody Vasulka to her independent explorations of optics and a liberated, non-anthropocentric subjectivity. It follows her practice from downtown New York to Buffalo to the vast landscapes of New Mexico and Iceland, which appear in her immersive video environments of the 1990s and 2000s. Venturing into nature and combining imaging technologies with reflective orbs, Steina reorientated the human body's relationship to nature and expanded how we access the natural world through media. Scholars including Gloria Sutton, Joey Heinen, and Ina Blom consider how Steina's generative sense of play gave way to methods of processing and computation; contextualize Steina alongside a group of her peers who shared an obsession with the electronic signal; and argue for her interest in video as a proto-virtual space. Steina has never felt more relevant. Steina, born Steinunn Briem Bjarnadottir, studied violin and music theory in Reykjavik before attending the State Music Conservatory in Prague, Czechoslovakia. In 1965, she emigrated to New York City. By the late 1960s, she began to focus entirely on video work, and in 1971, cofounded The Electronic Kitchen (later The Kitchen), an experimental electronic media space. Her work has been shown at the Centre Georges Pompidou, Paris, the Whitney Museum of American Art, New York, and many other places. A copublication with the MIT List Visual Arts Center and Buffalo AKG Art Museum

sublime art pdf: Media Studies 2.0 William Merrin, 2014-03-21 *Media Studies 2.0* offers an exploration of the digital revolution and its consequences for media and communication studies, arguing that the new era requires an upgraded discipline: a media studies 2.0. The book traces the history of mass-media and computing, exploring their merger at the end of the twenty-century and the material, ecological, cultural and personal elements of this digital transformation. It considers the history of media and communication studies, arguing that the academic discipline was a product of the analogue, broadcast-era, emerging in the early twentieth century as a response to the success of newspapers, radio and cinema and reflecting that era back in its organisation, themes and concepts. Digitalisation, however, takes us beyond this analogue era (media studies 1.0) into a new, post-broadcast era. Merrin argues that the digital-era demands an upgraded academic discipline: one reflecting the real media life of its students and teaching the key skills needed by the twenty-first century user. *Media 2.0* demand a media studies 2.0 This original and critical overview of contemporary developments within media studies is ideal for general students of media and communication, as well as those specifically studying new and digital media.
