the right stuff pdf: The Right-and Wrong-Stuff Carter Cast, 2018-01-09 Warning: Your career might be in danger of going off the rails. You probably have blind spots that are leaving you closer to the edge than you realize. Fortunately, Carter Cast has the solution. In this smart, engaging book he shows you how to avoid career derailment by becoming more self-aware, more agile, and more effective. This is the book you wish you had twenty years ago, which is why you should read it now. -- Daniel H. Pink, New York Times bestselling author of Drive and To Sell Is Human The Right -- and Wrong -- Stuff is a candid, unvarnished guide to the bumpy road to success. The shocking truth is that 98 percent of us have at least one career-derailment risk factor, and half to two-thirds actually go off the rails. And the reason why people get fired, demoted, or plateau is because they let the wrong stuff act out, not because they lack talent, energy, experience, or credentials. Carter Cast himself had all the right stuff for a brilliant career, when he was called into his boss's office and berated for being obstinate, resistant, and insubordinate. That defining moment led to a years-long effort to understand why he came so close to getting fired, and what it takes to build a successful career. His wide range of experiences as a rising, falling, and then rising star again at PepsiCo, an entrepreneur, the CEO of Walmart.com, and now a professor and venture capitalist enables him to identify the five archetypes found in every workplace. You'll recognize people you work with (maybe even yourself) in Captain Fantastic, the Solo Flyer, Version 1.0, the One-Trick Pony, and the Whirling Dervish, and, thanks to Cast's insights, they won't be able to trip up your future.

the right stuff pdf: Gender and the Race for Space Erinn McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a

distinctly American (anti-communist) masculinity, which appeared—on the surface anyway—to resolve not only an American “crisis of masculinity” but helped win the Cold War on an ideological and popular level. This American image focused on strict gender binaries of man as the protector, controlling technology and containing communism, while woman was the passive actor with spaceflight technology—left behind in the home waiting for the return of the astronaut husband. Allowing women to fly into space would have represented a lack of individual control with spaceflight technology.

the right stuff pdf: The 1960s on Film Jim Willis, Mark Miller, 2021-10-11 The 1960s on Film tells the narrative of the 1960s through the lens of the movie camera, analyzing 10 films that focus on the people, events, and issues of the decade. Films create both an impression of and - at times for younger audiences - a primary definition of events, people, and issues of an era. The 1960s on Film examines the 1960s as the decade was presented in ten films that focused on that decade. This book analyzes both what the films have to say about the era and how close they come to accurately depicting it. For example, films such as *Mississippi Burning* and *Selma* tell the story of racial conflict and hope for reconciliation in the 1960s. Other films such as *The Right Stuff* and *Hidden Figures* show the deep fascination America had at that time with the burgeoning space program and NASA, while *Easy Rider* analyzes the role of rock music and drugs among young people of the decade. *The Deer Hunter* studies the controversies surrounding the war in Vietnam.

the right stuff pdf: Showing and Telling: Film heritage institutes and their performance of public accountability Nico de Klerk, 2019-03-25 'Showing and Telling' is the first academic work to explore how publicly funded film heritage institutes account for their mandate in their public activities. It does that by inspecting and evaluating public presentations and visitor information about these presentations. The research was done by juxtaposing two complementary approaches. The first is grounded in the author's experience as a collection researcher and curator and makes a case for the richness of archival objects usually ignored for their lack of aesthetic qualities. The second is a survey of the public activities of 24 institutes worldwide, based on their websites, in February 2014; the latter constitutes a unique source. This original work uncovers the disconnect between the curatorial activities of these institutes and their missions. A central finding is that publicly funded film heritage institutes give their public an inadequate sense of cinema history. By and large they offer a mainstream-oriented repertoire of presentations, overwhelmingly consisting of feature fiction; they show a disproportionate amount of recent and new works, often through commercial distribution; their screenings consist of an unexplained melee of technological formats (sometimes substandard); and their presentations monotonously frame film as art, although their professed aesthetics are mostly of a cinephile nature and rest on received opinion. Specific materials, early cinema in particular, and specialist knowledge, both historical and methodological, are largely restricted to their network of peer communities. Wholesome transfer of full knowledge, in word and image, to the public is not a major concern. 'Showing and Telling' concludes with recommendations for curatorial activities. Firstly, with a conceptual apparatus that allows a more complete understanding of film heritage and its histories. Secondly, with a plea for rethinking the institutes' gatekeeper function and for developing more varied, imaginative, and informative public presentations, both on site and online, that reflect the range of their collections and their histories.

the right stuff pdf: Aeromedical Psychology Carrie H. Kennedy, Gary G. Kay, 2017-11-01 Aeromedical psychology is that branch of psychology pertaining to the assessment, selection and evaluation of aviation personnel. This book, Aeromedical Psychology, is designed to provide the means for a variety of clinicians to carry out sound assessment and selection procedures, perform informed evaluations and make subsequent recommendations regarding flight status and treatment strategies geared to the aviation environment. To facilitate a dynamic understanding of the field, the book emphasizes an integration of applications and theory, case examples and research. The book is divided into three parts. The first presents assessment and selection procedures for aviation personnel (i.e. air traffic controllers, flight officers and pilots) and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles. In the second part, the waiver standards put forth by both the FAA and the various branches of the military are presented, as well as the waiver decision process. Clinical issues unique to aviation - notably fear of flying, motivation to fly and airsickness - are addressed, as well as possible courses of intervention, treatment and disposition. In the final part, more specialized issues pertaining to aeromedical psychology are dealt

with, namely the psychopharmacological research and regulations applicable to recreational pilots and aviation personnel, managing the aftermath of aviation mishaps and the psychologist's role in accident investigations.

Yet our faith has been shattered. We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In *The Venture Alchemists*, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank, Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures—making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses, alongside many good intentions and moral compromises. But this story remains unfinished, and *The Venture Alchemists* ultimately offers hope from the people who, decades ago, warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.

the right stuff pdf: *Mercury Rising: John Glenn, John Kennedy, and the New Battleground of the Cold War* Jeff Shesol, 2021-06-01 A riveting history of the epic orbital flight that put America back into the space race. If the United States couldn't catch up to the Soviets in space, how could it compete with them on Earth? That was the question facing John F. Kennedy at

the height of the Cold War—a perilous time when the Soviet Union built the wall in Berlin, tested nuclear bombs more destructive than any in history, and beat the United States to every major milestone in space. The race to the heavens seemed a race for survival—and America was losing. On February 20, 1962, when John Glenn blasted into orbit aboard Friendship 7, his mission was not only to circle the planet; it was to calm the fears of the free world and renew America's sense of self-belief. *Mercury Rising* re-creates the tension and excitement of a flight that shifted the momentum of the space race and put the United States on the path to the moon. Drawing on new archival sources, personal interviews, and previously unpublished notes by Glenn himself, *Mercury Rising* reveals how the astronaut's heroics lifted the nation's hopes in what Kennedy called the hour of maximum danger.

the right stuff pdf: [The Cold War on Film](#) Paul Frazier, 2021-07-12 *The Cold War on Film* illustrates how to use film as a teaching tool. It stands on its own as an account of both the war and the major films that have depicted it. Memories of the Cold War have often been shaped by the popular films that depict it—for example, *The Manchurian Candidate*, *The Hunt for Red October*, and *Charlie Wilson's War*, among others. *The Cold War on Film* examines how the Cold War has been portrayed through a selection of 10 iconic films that represent it through dramatization and storytelling, as opposed to through documentary footage. The book includes an introduction to the war's history and a timeline of events. Each of the 10 chapters that follow focuses on a specific Cold War film. Chapters offer a uniquely detailed level of historical context for the films, weighing their depiction of events against the historical record and evaluating how well or how poorly those films reflected the truth and shaped public memory and discourse over the war. A comprehensive annotated bibliography of print and electronic sources aids students and teachers in further research.

the right stuff pdf: *Law and Regulation of Commercial Mining of Minerals in Outer Space* Ricky Lee, 2012-03-05 This monograph addresses the legal and policy issues relating to the commercial exploitation of natural resources in outer space. It begins by establishing the economic necessity and technical feasibility of space mining today, an estimate of the financial commitments required, followed by a risk analysis of a commercial mining venture in space, identifying the economic and legal risks. This leads to the recognition that the legal risks must be minimised to enable such projects to be financed. This is followed by a discussion of the principles of international space law, particularly dealing with state responsibility and international liability, as well as some of the issues arising from space mining activities. Much detail is devoted to the analysis of the content of the common heritage of mankind doctrine. The monograph then attempts to balance such interests in creating a legal and policy compromise to create a new regulatory regime.
